This Prospectus constitutes a prospectus for the purposes of Article 5.3 of the Prospectus Directive relating to the Securities, and should be read together with any documents incorporated by reference within it.

Application will be made for the Securities to be (i) admitted to trading on the NASDAQ Stockholm Stock Exchange and (ii) listed on the Official List and admitted to trading on the Luxembourg Stock Exchange (each a regulated market for the purposes of Directive 2014/65/EU on Markets in Financial Instruments). On the approval of this Prospectus as a prospectus for the purpose of Article 5.3 of the Prospectus Directive by the CSSF, notification of such approval will be made to the Swedish Financial Supervisory Authority (*Sw. CSSF disclaimer

Credit ratings

The credit ratings of GSI¹ referred to in this Prospectus have been issued by Fitch, Inc. ("**Fitch**"), Moody's

¹ The information for this rating has been extracted from information made available by each rating agency referred to below. The Issuer confirms that such information has been accurately reproduced and that, so far as it is aware, and is able to ascertain from information published by such ratings agencies, no facts have been omitted which would render the reproduced information inaccurate or misleading.

As at the date of this Prospectus the ratings for GSI were:

Short-term debt:

Fitch, Inc. rating was F1: An 'F1' rating indicates the highest short-term credit quality and the strongest intrinsic capacity for timely payment of financial commitments; may have an added '+' to denote any exceptionally strong credit feature.

Moody's rating was P-1: 'P-1' Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

S&P rating was A-1: A short-term obligation rated 'A-1' is rated in the highest category by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

Long-term debt:

Fitch, Inc. rating was A: An 'A' rating indicates high credit quality and denotes expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

Moody's rating was A1: Obligations rated 'A' are considered upper-medium grade and are subject to low credit risk. Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from 'Aa' through 'Caa'. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

S&P rating was A+: An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial

In general, European regulated investors are restricted from using a rating for regulatory purposes if such rating is not either (1) issued or validly endorsed by a credit rating agency established in the European Union and registered with the European Securities and Markets Authority ("**ESMA**") under the CRA Regulation or (2) issued by a credit rating agency established outside the European Union which is certified under the CRA Regulation.

The EU affiliates of Fitch, Moody's and S&P are registered under the CRA Regulation. The ESMA has approved the endorsement by such EU affiliates of credit ratings issued by Fitch, Moody's and S&P. Accordingly, credit ratings issued by Fitch, Moody's and S&P may be used for regulatory purposes in the EU.

Credit ratings may be adjusted over time, and there is no assurance that these credit ratings will be effective after the date of this Prospectus. A credit rating is not a recommendation to buy, sell or hold the Securities.

The list of credit rating agencies registered under the CRA Regulation (as updated from time to time) is published on the website of the ESMA (www.esma.europa.eu/page/list-registered-and-certified-CRAs).

Autocall Event				
An " Autocall Event " occurs if the Autocall Reference Value of each Underlying Asset in the Basket on any Autocall Observation Date is greater than or equal to the Autocall Level for such Autocall Observation Date.				
Defined terms used above:				
<ul style="list-style-type: none"> • Autocall Level: in respect of each Underlying Asset, 90 per cent. of the Asset Initial Price of such Underlying Asset. • Autocall Reference Value: in respect of an Underlying Asset, the Reference Price of such Underlying Asset on the relevant Autocall Observation Date. 				
<hr/> <u>Non-scheduled Early Repayment Amount</u>				
Unscheduled early redemption: The Securities may be redeemed prior to the scheduled maturity (i) at the Issuer's option (a) if the Issuer determines a change in applicable law has the effect that performance by the Issuer or its affiliates under the Securities or hedging transactions relating to the Securities has become (or there is a substantial likelihood in the immediate future that it will become) unlawful or impracticable (in whole or in part), (b) where applicable, if the Calculation Agent determines that certain additional disruption events or adjustment events as provided in the terms and conditions of the Securities have occurred in relation to the underlying assets or (ii) upon notice by a Holder declaring such Securities to be immediately repayable due to the occurrence of an event of default which is continuing.				
In such case, the Non-scheduled Early Repayment Amount payable on such unscheduled early redemption shall be, for each Security, an amount representing the fair market value of the Security taking into account all relevant factors less all costs incurred by the Issuer or any of its affiliates in connection with such early redemption, including those related to unwinding of any underlying and/or related hedging and funding arrangement.				
The Non-scheduled Early Repayment Amount may be less than your initial investment and therefore you may lose some or all of your investment on an unscheduled early redemption.

Unless previously exercised early, or purchased and cancelled, the Settlement Amount payable in respect of each Security on the maturity date will be:

SECTION D – RISKS

D.2	Key risks that are specific to the Issuer	<p>The payment of any amount due on the Securities is subject to our credit risk. The Securities are our unsecured obligations. The Securities are not bank deposits and are not insured or guaranteed by the UK Financial Services Compensation Scheme or any other government or governmental or private agency, or deposit protection scheme in any jurisdiction. The value of and return on your securities will be subject to our credit risk and to changes in the market's view of our creditworthiness.</p> <p>References in Element B.12 above to the "prospects" and "financial or trading position" of the Issuer, are specifically to the Issuer's ability to meet its full payment obligations under the Securities in a timely manner. Material information about the Issuer's financial condition and prospects is included in GSI's annual and interim reports. You should be aware, however, that each of the key risks highlighted below could have a material adverse effect on the Issuer's businesses, operations, financial and trading position and prospects, which, in turn, could have a material adverse effect on the return investors receive on the Securities.</p> <p>The Issuer is subject to a number of key risks:</p> <ul style="list-style-type: none"> • GSI's businesses have been and may continue to be adversely affected by conditions in the global financial markets and economic conditions generally. • GSI's businesses and those of its clients are subject to extensive and pervasive regulation around the world. • GSI's businesses have been and may be adversely affected by declining asset values. This is particularly true for those businesses in which it has net "long" positions, receives fees based on the value of assets managed, or receives or posts collateral. • GSI's businesses have been and may be adversely affected by disruptions in the credit markets, including reduced access to credit and higher costs of obtaining credit. • GSI's investment banking, client execution and investment management businesses have been adversely affected and may continue to be adversely affected by market uncertainty or lack of confidence among investors and CEOs due to general declines in economic activity and other unfavourable economic, geopolitical or market conditions. • GSI's investment management business may be affected by the poor

		<p>technology may adversely affect GSI's business and may increase competition.</p> <ul style="list-style-type: none"> • GSI's commodities activities, particularly its power generation interests and physical commodities activities, subject GSI to extensive regulation, potential catastrophic events and environmental, reputational and other risks that may expose it to significant liabilities and costs. • In conducting its businesses around the world, GSI is subject to political, economic, legal, operational and other risks that are inherent in operating in many countries. • GSI may incur losses as a result of unforeseen or catastrophic events, including the emergence of a pandemic, terrorist attacks, extreme weather events or other natural disasters. • Favourable or simply less adverse developments or market conditions involving industries or markets in a business where GSI has a lower concentration of clients in such industry or market may result in GSI underperforming relative to a similar business of a competitor that has a higher concentration of clients in such industry or market. For example, GSI has a smaller corporate client base in its market-making businesses than many of its peers and therefore GSI's competitors may benefit more from increased activity by corporate clients. • Certain of GSI's businesses and its funding may be adversely affected by changes in the reference rates, currencies, indexes, baskets, exchange-traded funds or other financial metrics to which the products offered by GSI or funding raised by GSI are linked.

Your Securities may be adjusted or redeemed prior to maturity due to a change in law. Any such adjustment may have a negative effect on the value of and return on your Securities; the amount you receive following an early redemption may be less than your initial investment and you could lose some or all of your investment. The Issuer of your Securities may be substituted with another company. We may amend the terms and conditions of your Securities in certain circumstances without your consent.

RISK FACTORS

An investment in your Securities is subject to the risks described below. You should carefully review (i) the applicable risk factors in the section entitled "Risk Factors" (pages 54 to 69) from the Base Prospectus incorporated by reference in this Prospectus (see the section entitled "Documents Incorporated by Reference" below) and (ii) the additional risk factors set out below, as well as the terms and conditions of the Securities described in this Prospectus. You should carefully consider whether the Securities are suited to your particular circumstances, including to consult your own professional advisers as necessary. We do not give to you as a prospective purchaser of Securities any assurance or guarantee as to the merits, performance or suitability of the Securities, and you should be aware that we act as an arm's-length contractual counterparty and not as an advisor or fiduciary.

In these Risk Factors, "we" and "our" mean Goldman Sachs.

RISK WARNING OF POTENTIAL LOSS OF SOME OR ALL OF YOUR INVESTMENT

You may lose some or all of your entire investment in the Securities where:

- **The Issuer fails or is otherwise unable to meet its payment or delivery obligations:** The Securities are unsecured obligations. They are not bank deposits and are not insured or guaranteed by the UK Financial Services Compensation Scheme or any other government or governmental or private agency or deposit protection insurance scheme in any jurisdiction. Therefore, if the Issuer fails or is otherwise unable to meet its payment or delivery obligations under the Securities, you will lose some or all of your investment.
- **The final redemption amount of the Securities is less than the purchase price, due to the performance of the Underlying Asset(s):** Where the terms of your Securities do not provide for scheduled minimum payment of the face value or issue price of the Securities at maturity, whether you receive some or all of your money back at maturity (and any positive return) will depend on the performance of the Underlying Asset(s). Therefore, depending on the performance of the Underlying Asset(s), you may lose some or all of your investment.
- **The secondary sale price is less than the original purchase price:** The market price of your Securities prior to maturity may be significantly lower than the purchase price you pay for them. Consequently, if you sell your Securities before the stated scheduled redemption date, you may receive far less than your original invested amount.
- **The Securities are redeemed early due to an unexpected event and the amount you receive is less than the original purchase price:** Your Securities may be redeemed in certain extraordinary circumstances as described in this Prospectus prior to scheduled maturity and, in such case, the early redemption amount paid to you may be less than what you paid for the Securities.

These circumstances are more fully described below.

A. FACTORS THAT MAY AFFECT OUR ABILITY TO FULFIL OUR OBLIGATIONS UNDER THE SECURITIES

The Issuer may partially or wholly fail to meet its obligations under the Securities. Investors should therefore take the creditworthiness of the Issuer into account in their investment decision. Credit risk means the risk of insolvency or illiquidity of the Issuer, i.e., a potential, temporary or final inability to fulfil its interest and repayment obligations on time. An increased insolvency risk is typical of issuers that have a low creditworthiness.

Although the return on your Securities will be based on the performance of the Underlying Asset(s), the payment of any amount due on the Securities is subject to the credit risk of the Issuer. The Securities are our unsecured obligations. Investors are dependent on our ability to pay all amounts due on the Securities, and therefore investors are subject to our credit risk and to changes in the market's view of our creditworthiness.

The Securities are not bank deposits and are not insured or guaranteed by the UK Financial Services Compensation Scheme or any other government or governmental or private agency, or deposit protection scheme in any jurisdiction. Investors are dependent on our ability to pay all amounts due on the Securities, and therefore investors are subject to our credit risk and to changes in the market's view of our creditworthiness.

Goldman Sachs International ("**GSI**") is a member of a group of companies of which The Goldman Sachs Group, Inc. is the holding company (the "**Goldman Sachs Group**" or "**Goldman Sachs**"). However, the Securities are not insured or guaranteed by The Goldman Sachs Group, Inc. ("**GSG**"), or any affiliate of GSG or any other entity. As a holder of Securities, **you will not have any recourse against The Goldman Sachs Group, Inc. or any other company in the Goldman Sachs Group other than GSI, and shall not have recourse against any other person, with respect to the performance of the Securities.**

You should also read "*Risk Factors 2. Risks relating to GSI*" (pages 54 to 69) (as amended from time to time) in the Base Prospectus incorporated by reference herein.

1. Risks relating to the potential exercise by a UK resolution authority of its resolution powers in relation to GSI

The EU Bank Recovery and Resolution Directive ("**BRRD**") entered into force on July 2, 2014. EU member states were required to adopt and publish the laws, regulations and administrative provisions necessary to comply with the BRRD by December 31, 2014 and to apply those with effect from January 1, 2015, except in relation to the bail-in provisions, which were to apply from January 1, 2016 at the latest. Its stated aim is to provide national "resolution authorities" with powers and tools to address banking crises pre-emptively in order to safeguard financial stability and minimise taxpayers' exposure to losses.

The majority of the requirements of the BRRD have been implemented in the UK through the UK Banking Act 2009, as amended and related statutory instruments (together, the "**UK Banking Act**"). The UK Banking Act provides for a "resolution regime" granting substantial powers to the Bank of England (or, in certain circumstances, HM Treasury), to implement resolution measures (in consultation with other UK authorities) with respect to a UK financial institution (for example, such as GSI) where the UK resolution authority considers that the relevant institution is failing or is likely to fail, there is no reasonable prospect of other measures preventing the failure of the institution and resolution action is necessary in the public interest.

The resolution powers available to the UK resolution authority include powers to:

- write down the amount owing, including to zero, or convert the relevant securities into other securities, including ordinary shares of the relevant institution (or a subsidiary) - the so-called "bail-in" tool;
- transfer all or part of the business of the relevant institution to a "bridge bank";
- transfer impaired or problem assets to an asset management vehicle; and

- sell the relevant institution to a commercial purchaser.

In addition, the UK resolution authority is empowered to modify contractual arrangements, suspend enforcement or termination rights that might otherwise be triggered and disapply or modify laws in the UK (with possible retrospective effect) to enable the recovery and resolution powers under the UK Banking Act to be used effectively.

You should assume that, in a resolution situation, financial public support will only be available to GSI (or any member of the Goldman Sachs Group) as a last resort after the relevant UK resolution authorities have assessed and used, to the maximum extent practicable, the resolution tools, including the bail-in tool.

You should be aware that the exercise of any such resolution power or even the suggestion of any such potential exercise in respect of GSI (or any member of the Goldman Sachs Group) could have a material adverse effect on the rights of holders of Securities, and could lead to a loss of some or all of the investment. The resolution regime is designed to be triggered prior to insolvency of the relevant institution, and holders of securities issued by such institution may not be able to anticipate the exercise of any resolution power (including exercise of the "bail-in" tool) by the UK resolution authority. Further, holders of securities issued by an institution which has been taken into a resolution regime will have very limited rights to challenge the exercise of powers by the UK resolution authority, even where such powers have resulted in the write down of the securities or conversion of the securities to equity.

B. FACTORS WHICH ARE MATERIAL FOR THE PURPOSES OF ASSESSING THE MARKET RISKS IN RELATION TO THE SECURITIES

1. Risks associated with the value and liquidity of your Securities

1.1 The estimated value of your Securities (as determined by reference to pricing models used by us) at the time the terms and conditions of your Securities are set on the trade date, will be less than the original issue price of your Securities

The original issue price for your Securities will exceed the estimated value of your Securities as from the trade date, as determined by reference to our pricing models and taking into account our credit spreads. The difference between the estimated value of your Securities as of the time the terms and conditions of your Securities were set on the trade date and the original issue price is a result of many factors, including among others on issuance (the underwriting discount and commissions where permitted by applicable law), the expenses incurred in creating, documenting and marketing the Securities and our own internal funding costs (being an amount based on what we would pay to holders of a non-structured security with a similar maturity). The difference may be greater when the Securities are initially traded on any secondary markets and may gradually decline in value during the term of the Securities. Information with respect to the amount of these inducements, commissions and fees are included in this Prospectus and may be obtained from the Issuer upon request.

In estimating the value of your Securities as of the time the terms and conditions of your Securities were set on the trade date, our pricing models consider certain variables, including principally our credit spreads, interest rates (forecasted, current and historical rates), volatility, price-sensitivity analysis and the time to maturity of the Securities. These pricing models are proprietary and rely in part on certain assumptions about future events, which may prove to be incorrect. As a result, the actual value you would receive if you sold your Securities in the secondary market, if any, to others may differ, perhaps materially, from the estimated value of your Securities determined by reference to our models due to, among other things, any differences in pricing models or assumptions used by others.

1.2 The value and quoted price of your Securities (if any) at any time will reflect many factors and cannot be predicted

The value and quoted price of your Securities (if any) at any time will reflect many factors and cannot be predicted. The following factors, amongst others, many of which are beyond our control, may influence the market value of your Securities:

- the volatility — i.e., the frequency and magnitude of changes — of the levels of the Underlying Asset or basket of Underlying Assets;
- whether your Securities are linked to a single Underlying Asset or a basket of Underlying Assets;
- the level, price, value or other measure of the Underlying Asset(s) to which your Securities are linked, the participation rate, the weighting multipliers, the cap level and/or the buffer level and/or other payout term, as applicable;
- the dividend rates of the stocks underlying the Underlying Asset(s);
- economic, financial, regulatory, political, military and other events that affect stock markets generally and the stocks underlying the Underlying Asset(s) or basket of Underlying Asset(s), and which may affect the closing level of the Underlying Asset(s) or the basket closing level;
- economic, financial, regulatory, geographic, judicial, political and other developments that affect the level, value or price of the Underlying Asset(s), and real or anticipated changes in those factors;
- interest rates and yield rates in the market;
- the time remaining until your Securities mature; and
- our creditworthiness, whether actual or perceived, and including actual or anticipated upgrades or downgrades in our credit ratings or changes in other credit measures.

If we make a market in the Securities, the price quoted by us would reflect any changes in market conditions and other relevant factors, including any deterioration in our creditworthiness or perceived creditworthiness. These changes may adversely affect the value of your Securities, including the price you may receive for your Securities in any market making transaction. To the extent that we make a market in the Securities, the quoted price will reflect the estimated value determined by reference to our pricing models at that time, plus or minus its customary bid and ask spread for similar sized trades of structured securities and subject to the declining excess amount described in risk factor 1.1 (*The estimated value of your Securities (as determined by reference to pricing models used by us) at the time the terms and conditions of your Securities are set on the trade date, will be less than the original issue price of your Securities*) above.

Further, if you sell your Securities, you will likely be charged a commission for secondary market transactions, or the price will likely reflect a dealer discount. This commission or discount will further reduce the proceeds you would receive for your Securities in a secondary market sale.

If you sell your Securities prior to maturity, you may receive less than the face amount or initial purchase price of your Securities. You cannot predict the future performance of the applicable Underlying Asset(s) based on its historical performance.

You should note that the issue price and/or offer price of the Securities may include subscription fees, placement fees, direction fees, structuring fees and/or other additional costs. Any such fees and costs may

not be taken into account for the purposes of determining the price of such Securities on the secondary market and could result in a difference between the original issue price and/or offer price, the theoretical value of the Securities, and/or the actual bid/offer price quoted by any intermediary in the secondary market. Any such difference may have an adverse effect on the value of the Securities, particularly immediately following the offer and the issue date relating to such Securities, where any such fees and/or costs may be deducted from the price at which such Securities can be sold by the initial investor in the secondary market.

There is no assurance that we or any other party will be willing to purchase your Securities at any price and, in this regard, we are not obligated to make a market in the Securities. See risk factor 1.3 (*Your Securities may not have an active trading market; the aggregate amount or number of Securities outstanding at any time may be significantly less than the outstanding on the issue date, and this could have a negative impact on your ability to sell your Securities in the secondary market*) below.

1.3 Your Securities may not have an active trading market; the aggregate amount or number of Securities outstanding at any time may be significantly less than the outstanding on the issue date, and this could have a negative impact on your ability to sell your Securities in the secondary market

Unless we expressly tell you otherwise, or to the extent that the rules of any stock exchange on which the Securities are listed and admitted to trading require us to provide liquidity in respect of the Securities, there may be little or no secondary market for your Securities and you may be unable to sell them.

If we do make a market for the Securities, we may cease to do so at any time without notice to you and we are not obligated to provide any quotation of bid or offer price(s) of the Securities which is favourable to you.

For those Securities for which an application will be or has been made to be listed and admitted to trading on a stock exchange, we give no assurance that such application will be accepted, that any particular Securities will be so admitted, or that an active trading market in the Securities will develop. We may discontinue any such listing at any time and this may have a material adverse effect on a purchaser's ability to resell its Securities in the secondary market.

Even if a secondary market for your Securities develops, it may not provide significant liquidity and transaction costs in any secondary market could be high. As a result, the difference between bid and asked prices for your Securities in any secondary market could be substantial. See also risk factor 1.2 (*The value and quoted price of your Securities (if any) at any time will reflect many factors and cannot be predicted*) above. There may be less liquidity in the secondary market for the Securities also if they are exclusively offered to retail investors without any offer to institutional investors.

If so indicated in this Prospectus, on the Issue Date a specified amount of Securities will be issued to and made available for sale by GSI as dealer, and may be listed and admitted to trading on one or more regulated markets of any European Economic Area Member State for purchase by investors. However, the Issuer and GSI (acting as dealer) will reserve the right to cancel some or all of the Securities held by GSI at any time prior to the final maturity of the Securities. Accordingly, the aggregate amount or number of Securities outstanding at any time may be significantly less than that outstanding on the Issue Date, and this could have a negative impact on your ability to sell the Securities in the secondary market. Any such right of cancellation by GSI shall be exercised in accordance with applicable laws, the terms and conditions of the Securities and the applicable rules of the relevant stock exchange(s) and markets, including as to notification.

You should therefore not assume that the Securities can be sold at a specific time or at a specific price

during their life, and you should assume that you may need to hold them until they mature.

2. Risks associated with certain products or product features

The "Worst-of"("Minimum Performance", "Barrier Worst Closing Price" and "Barrier Worst Asset Performance") feature means that you will be exposed to the performance of each Underlying Asset and, in particular, to the Underlying Asset which has the worst performance

If the terms and conditions of your Securities provides that the return on the Securities depends on the "worst-of" performance of the basket of Underlying Assets, you will be exposed to the performance of each Underlying Asset and, in particular, to the Underlying Asset which has the worst performance. This means that, irrespective of how the other Underlying Assets perform, if any one or more Underlying Assets fail to meet a relevant threshold or barrier for the payment of interest or the calculation of any redemption amount, you might receive no interest payments and/or could lose some or all of your initial investment.

3. Risks associated with certain terms of the Securities, including adjustment, early redemption, substitution, Issuer call option, exercise and amendments

3.1 Your Securities may be redeemed prior to maturity due to a change in law event, and you may lose some or all of your investment

Where, due to a change in law, our performance under the Securities or hedging transactions relating to the Securities has become (or there is a substantial likelihood in the immediate future that it will become) illegal or impractical, we may, in our discretion, redeem the Securities.

If we elect to early redeem the Securities, if permitted by applicable law, we shall pay to you an amount equal to the non-scheduled early repayment amount of such Securities. Unless the terms of your Securities provide that "Par" is applicable, the non-scheduled early repayment amount will be determined on the basis of market quotations obtained from qualified financial institutions or, where insufficient market quotations are obtained, will be an amount determined by us to be the fair market value of such Securities immediately prior to such early redemption (taking into account such illegality), adjusted to account fully for any of our reasonable expenses and costs including, those relating to the unwinding of our related hedging and funding arrangements (if any). The non-scheduled early repayment amount may be less than your initial investment and you may therefore lose some or all of your investment.

Following any such early redemption of the Securities, you may not be able to reinvest the proceeds from such redemption at a comparable return and/or with a comparable interest rate for a similar level of risk. You should consider such reinvestment risk in light of other available investments when you purchase the Securities.

3.2 The Issuer of your Securities may be substituted with another company

The Issuer may be substituted as principal obligor under the Securities by any company from the Goldman Sachs Group of companies. Whilst the new issuer will provide an indemnity in your favour in relation to any additional tax or duties that become payable solely as a result of such substitution, you will not have the right to consent to such substitution.

3.4 We may amend the terms and conditions of your Securities in certain circumstances without your consent; amendments to the Securities will bind all holders thereof

The terms and conditions of the Securities may be amended by us without your consent as a holder of the Securities in any of the following circumstances:

- to correct a manifest or proven error or omission;
- where the amendment is of a formal, minor or technical nature; or
- where such amendment will not materially and adversely affect the interests of holders.

In certain other circumstances, the consent of a defined majority of holders is required to make amendments. The terms and conditions of the Securities contain provisions for holders of Securities to call and attend meetings to vote upon such matters or to pass a written resolution in the absence of such a meeting. Resolutions passed at such a meeting, or passed in writing, can bind all holders of Securities, including investors that did not attend or vote, or who do not consent to the amendments.

4 Risks associated with foreign exchange rates

You may be exposed to foreign exchange risk on your Securities

Where the terms of your Securities provide that payments will be made in a currency which is different from the currency of the Underlying Asset(s), and the Securities do not have a 'quanto' feature (as described in the next paragraph), or in the case of Underlying Asset(s) that themselves contain currency conversions (such as a global equity index that converts all stock prices to a single currency for purposes of calculating the index level), you may be exposed not only to the performance of the Underlying Asset(s) but also to the performance of such foreign currency, which cannot be predicted. Depreciation of the currency in which the payments under the Securities is denominated or the currency of the Underlying Asset(s) could result in a decrease in the value of and return on your Securities.

If the Underlying Asset(s) are not denominated in the currency of the Securities and at the same time only the performance of the Underlying Asset(s) in their denominated currency is relevant to the payout on the Securities, the Securities are referred to as currency-protected Securities or Securities with a "quanto" feature. Under such "quanto" feature, any change in the rate of exchange between the currency of the Underlying Asset(s) and the Securities is disregarded for the purposes of determining the return on the Securities. Accordingly, a "quanto" feature means that you will not have the benefit of any change in the rate of exchange between the currency of the Underlying Asset(s) and the Securities that would otherwise increase the performance of the Underlying Asset(s) in the absence of such "quanto" feature. In addition, changes in the relevant exchange rate may indirectly influence the level, price, rate or other applicable value of the relevant Underlying Asset(s) which, in turn, could have a negative effect on the value of and return on the Securities.

Further, foreign exchange fluctuations between your home currency and the currency in which payments under the Securities is denominated may affect you if you intend to convert gains or losses from the exercise or sale of Securities into your home currency.

Foreign exchange rates are, and have been, highly volatile and determined by supply and demand for currencies in the international foreign exchange markets; such fluctuations in rates are subject to economic factors, including, among others, inflation rates in the countries concerned, interest rate differences between the respective countries, economic forecasts, international political factors, currency convertibility and safety of making financial investments in the currency concerned, speculation and measures taken by governments and central banks.

Foreign currency exchange rates can either float or be fixed by sovereign governments. From time to time, governments use a variety of techniques, such as intervention by a country's central bank or imposition of regulatory controls or taxes, to affect the exchange rate of their currencies. Governments may also issue a new currency to replace an existing currency or alter the exchange rate or exchange characteristics by devaluation or revaluation of a currency. Thus, a particular concern in purchasing

Securities with foreign exchange risks as described above is that their yields or payouts could be significantly and unpredictably affected by governmental actions. Even in the absence of governmental action directly affecting currency exchange rates, political or economic developments in the country of the relevant currency or elsewhere could lead to significant and sudden changes in the exchange rate of that currency and others. These changes could negatively (or positively) affect the value of and return on the Securities as participants in the global currency markets move to buy or sell the relevant currency in reaction to these developments.

Governments have imposed from time to time and may in the future impose exchange controls or other conditions, including taxes, with respect to the exchange or transfer of a currency that could affect exchange rates as well as the availability of the currency for a Security at its maturity or on any other payment date. In addition, your ability to move currency freely out of the country in which payment in the currency is received or to convert the currency at a freely determined market rate could be limited by governmental actions.

5. Risks associated with Securities that reference one or more Underlying Asset(s)

5.1 The value of and return on your Securities depends on the performance of the Underlying Asset(s)

The return on your Securities may depend on the performance of one or more Underlying Asset(s). The level, price, rate or other applicable value of the Underlying Asset(s) may be subject to unpredictable change over time. This degree of change is known as "volatility". The volatility of an Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. Volatility does not imply direction of the level, price, rate or other applicable value, though an Underlying Asset that is more volatile is likely to increase or decrease in value more often and/or to a greater extent than one that is less volatile.

Where the performance of an Underlying Asset in relation to your Securities is calculated on a "European basis" – i.e., a comparison is made between the Underlying Asset's level, price, rate or other applicable value on a start date and a future date to determine performance – you will not benefit from any increase in the Underlying Asset's level, price, rate or other applicable value from the start date up to, but excluding, the specified date on which the Underlying Asset's price will be determined for the purpose of your Securities.

5.2 Past performance of an Underlying Asset is not indicative of future performance

You should not regard any information about the past performance of the Underlying Asset(s) as indicative of the range of, or trends in, fluctuations in the Underlying Asset(s) that may occur in the future.

5.3 You will not have any rights of ownership in the Underlying Asset(s)

The Underlying Asset(s) will not be held by us for your benefit and, as such, you will not have any rights of ownership, including, without limitation, any voting rights, any rights to receive dividends or other distributions or any other rights with respect to any Underlying Asset(s).

5.4 Following a disruption event, the valuation of the Underlying Asset(s) may be postponed and/or valued by us in our discretion

If we (as Calculation Agent) determine that a disruption event in relation to the Underlying Asset(s) has occurred which affects the determination of the level, price, rate or other applicable value of the

Underlying Asset(s) on any relevant day, we may postpone the valuation and ultimately determine the level, price, rate or other applicable value in our discretion. Any such postponement and/or alternative valuation may have a negative effect on the value of and return on your Securities. In the event that the valuation day of the Underlying Asset(s) is postponed, the date on which final cash settlement is made on your Securities may be postponed.

5.5 Following the occurrence of certain extraordinary events in relation to the Underlying Asset(s) or with respect to index linked securities, following the occurrence of an index adjustment event, the terms and conditions of your Securities may be adjusted or the Securities may be redeemed early at the non-scheduled early repayment amount

If we (as Calculation Agent) determine that an extraordinary event (as described below in relation to each type of Underlying Asset) has occurred in relation to the Underlying Asset(s) or an Index Adjustment Event has occurred in relation to an Index, then we may adjust the terms and conditions of the Securities (without your consent) to account for such event or we may redeem the Securities early. Any adjustment made to the terms and conditions of the Securities may have a negative effect on the value of and return on the Securities.

In the event of early redemption, we will pay to you the non-scheduled early repayment amount. Unless the terms of your Securities provide that "Par" is applicable, the non-scheduled early repayment amount will be determined on the basis of market quotations obtained from qualified financial institutions or, where insufficient market quotations are obtained, will be an amount determined by us to be the fair market value of the Securities immediately prior to (and taking into account the circumstances leading to) such early redemption (and the fact that such circumstances are taken into account will tend to reduce any amount payable on the Securities on early redemption), adjusted to account fully for our reasonable expenses and costs including those relating to the unwinding of any underlying and/or related hedging and funding arrangements. The non-scheduled early repayment amount may be less than your initial investment and you may therefore lose some or all of your investment.

Following any such early redemption of the Securities, you may not be able to reinvest the proceeds from an investment at a comparable return and/or with a comparable interest rate for a similar level of risk. You should consider such reinvestment risk in light of other available investments when you purchase the Securities.

6. Risks associated with particular types of Underlying Assets

6.1 Risks associated with Shares as Underlying Assets

(a) Various unpredictable factors may affect the performance of Shares

The performance of Shares is dependent upon macroeconomic factors, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as business risks faced by the issuers thereof. Any one or a combination of such factors could adversely affect the performance of the Underlying Asset(s) which, in turn, would have a negative effect on the value of and return on your Securities.

(b) You will not be able to participate in dividends or other distributions on the Shares

The return on your Securities will not be linked to dividends or any other distributions paid on the Shares. Accordingly, you may receive a lower return on the Securities than you would have received had you invested directly in the Underlying Asset(s).

(c) Actions by the issuer of a Share may negatively affect the Securities

We give no assurance that all events occurring prior to the issue date of the Securities that would affect the trading price of the relevant Share will have been publicly disclosed. Subsequent disclosure of any such events or the disclosure of or failure to disclose material future events concerning the share issuer could affect the trading price of the Share and therefore the trading price of the Securities.

Also, you should be aware that the issuer of the Share(s) will have no involvement in the offer and sale of the Securities and will have no obligation to you as a holder of Securities. The issuer of the Share(s) may take any actions in respect of such Share(s) without regard to your interests as a holder of Securities, and any of these actions could have a negative effect on the value of and return on the Securities.

(d) Following the occurrence of an extraordinary event in relation to the Share(s), the terms and conditions of your Securities may be adjusted or the Securities may be redeemed early at the non-scheduled early repayment amount

If a delisting, insolvency, merger event, nationalisation or tender offer (all as defined in the terms and conditions of the Securities) occurs in relation to the underlying Share(s) or the issuer of the relevant underlying Shares, this will be an 'Extraordinary Event' leading to the adjustment by us (as Calculation Agent) of the terms and conditions of the Securities (without the consent of holders) or the early redemption of the Securities. If we redeem your Securities, the non-scheduled early repayment amount payable to you may be less than you paid for the Securities.

(e) The occurrence of a potential adjustment event may lead to an adjustment to the terms of the Securities that could have a negative effect on the value of and return on your Securities

A 'potential adjustment event' is an event which has a diluting or concentrating effect on the theoretical value of the Underlying Asset(s). If a Potential Adjustment Event occurs, we may elect to amend the terms and conditions of the Securities (such amendment to be determined without your consent) to account for the diluting or concentrative effect of the event. Any adjustment made to the terms and conditions of the Securities may have a negative effect on the value of and return on your Securities.

(f) Your Securities may be adjusted or redeemed prior to maturity due to a change in law. Any such adjustment may have an adverse effect on the value of and return on the Securities; and the amount you receive following an early redemption may be less than your initial investment

Where, due to a change in law, we would incur a materially increased cost in performing our obligations under the Securities, we may, in our discretion, either (i) amend the terms and conditions of the Securities to account for such change in law or (ii) redeem the Securities and for an amount which may be less than you paid for the Securities. See risk factor 5.5 (*Following the occurrence of certain extraordinary events in relation to the Underlying Asset(s) or with respect to index linked securities, following the occurrence of an index adjustment event, the terms and conditions of your Securities may be adjusted or the Securities may be redeemed early at the non-scheduled early repayment amount*) above.

7. Risks associated with discretionary powers of the Issuer and the Calculation Agent including in relation to our hedging arrangements

As described elsewhere in these risk factors, the occurrence of certain events – relating to the Issuer, our hedging arrangements, the Underlying Asset(s), taxation, the relevant currency or other matters – the occurrence of which may give rise to discretionary powers on our part (as Issuer or as Calculation Agent) under the terms and conditions of the Securities.

In relation to the Underlying Asset(s), a key investment objective of the Securities is to allow holders to gain an economic exposure to the Underlying Asset(s). Therefore, if an Underlying Asset is materially impacted by an unexpected event or the relevant level, price, rate or other applicable value can no longer be calculated, then it may not be possible to achieve the investment objective of your Securities based on their original terms. In that case, we may have discretionary powers under the terms and conditions of the Securities (as described elsewhere in these risk factors) to (i) adjust the terms and conditions of the Securities to preserve the original economic terms and rationale, (ii) in certain cases, substitute the Underlying Asset(s) for another, (iii) calculate the relevant level, price, rate or other applicable value itself, (iv) postpone payment (v) redeem the Securities early or (vi) apply some combination thereof.

In relation to our hedging arrangements, we (including through one or more affiliates of the Issuer) may enter into one or more arrangements to cover our exposure to the relevant cash amounts to be paid or assets to be delivered under the Securities as these fall due. We describe some of the potential types of arrangements in risk factor 10.1 (*Anticipated hedging activities by Goldman Sachs or our distributors may negatively impact investors in the Securities and cause our interests and those of our clients and counterparties to be contrary to those of investors in the Securities*) below. The particular hedging arrangements (if any) undertaken by us, and their cost, will likely be a significant determinant of the price and the economic terms and conditions of your Securities. Accordingly, if an event occurs which negatively impacts our hedging arrangements, we may have discretionary powers under the terms and conditions of your Securities as described in the paragraph immediately above to account for such impact on our heading arrangements. The exercise by us of such discretionary powers may have a negative impact on the value of and return on your Securities.

8. Risks associated with taxation

8.1 Tax laws may change and this may have a negative impact on your Securities

Tax law and practice is subject to change, possibly with retrospective effect and this could adversely affect the value of your Securities to you and/or their market value generally. Any such change may (i) cause the tax treatment of the relevant Securities to change from what you understood the position to be at the time of purchase; (ii) render the statements in this Prospectus concerning relevant tax law and practice in relation to the Securities inaccurate or inapplicable in some or all respects to certain Securities or have the effect that this Prospectus does not include material tax considerations in relation to certain Securities; or (iii) give us the right to redeem the Securities early, if such change has the effect that our performance under the Securities or hedging transaction relating to the Securities is unlawful or impracticable (see risk factor 3.1 (*Your Securities may be redeemed prior to maturity due to a change in law event, and you may lose some or all of your investment*)). You should consult your own tax advisers about the tax implications of holding any Security and of any transaction involving any Security.

9. Risks associated with certain terms of public offers or listings

9.1 Certain specific information may not be known at the beginning of an offer period

This Prospectus may provide that certain specific information relating to your Securities (such as certain amounts, levels, percentages, prices, rates or values (as applicable) used to determine or calculate amounts payable or assets deliverable in respect of the Securities) may not be fixed or determined until the end of the offer period. In such case, this Prospectus will specify in place of the relevant amounts, levels, percentages, prices, rates or values (as applicable), such indicative amounts, levels, percentages, prices, rates or values (as applicable), or an indicative range thereof, which may be subject to a minimum or maximum amount, level, percentage, price, rate or value (as applicable).

The actual amounts, levels, percentages, prices, rates or values (as applicable) will be determined based

on market conditions by the Issuer on or around the end of the offer period and may be the same as or different from any indicative amount specified in this Prospectus, provided that such actual amounts will not be less than any indicative minimum amount specified therein and will not be more than any indicative maximum amount specified therein.

You will be required to make your investment decision based on the indicative amounts or indicative range rather than the actual amounts, levels, percentages, prices, rates or values (as applicable), which will only be fixed or determined at the end of the offer period after their investment decision is made but will apply to the Securities once issued.

If terms of the Securities provide that an indicative range of amounts, levels, percentages, prices, rates or values (as applicable), you should, for the purposes of evaluating the risks and benefits of an investment in the Securities, assume that the actual amounts, levels, percentages, prices, rates or values (as applicable) fixed or determined at the end of the offer period may have a negative impact on the amounts payable or assets deliverable in respect of the Securities and consequently, have an adverse impact on the return on the Securities (when compared with other amounts, levels, percentages, prices, rates or values (as applicable) within any indicative range, or less than any indicative maximum amount, or greater than any indicative minimum amount). You should therefore make your decision to invest in the Securities on that basis.

9.2 Potential conflicts of interest relating to distributors or other entities involved in the offer or listing of the Securities

Potential conflicts of interest may arise in connection with the Securities, as any distributors or other entities involved in the offer and/or the listing of the Securities as indicated in this Prospectus, will act pursuant to a mandate granted by the Issuer and can receive commissions and/or fees on the basis of the services performed in relation to such offer and/or listing.

9.3 Certain considerations relating to public offers of the Securities

If the Securities are distributed by means of a public offer, under certain circumstances indicated in the terms of the Securities, the Issuer and/or the other entities indicated in the terms of the Securities will have the right to withdraw or revoke the offer, and the offer will be deemed to be null and void according to the terms indicated in the terms of the Securities.

The Issuer and/or the other entities specified in the terms of the Securities may also terminate the offer early by immediate suspension of the acceptance of further subscription requests and by giving notice to the public in accordance with the terms of the Securities. Any such termination may occur even where the maximum amount for subscription in relation to that offer (as specified in the terms of the Securities), has not been reached. In such circumstances, the early closing of the offer may have an impact on the aggregate number of Securities issued and, therefore, may have an adverse effect on the liquidity of the Securities.

Furthermore, under certain circumstances indicated in the terms of the Securities, the Issuer and/or the other entities indicated in the terms of the Securities will have the right to extend the offer period and/or to postpone the originally designated issue date, and related interest payment dates and the maturity date. For the avoidance of doubt, this right applies also in the event that the Issuer publishes a supplement to this Prospectus in accordance with the provisions of the Prospectus Directive.

10. Risks associated with conflicts of interest between Goldman Sachs and purchasers of Securities

The various roles and trading activities of Goldman Sachs could create conflicts of interest between you and us.

10.1 Anticipated hedging activities by Goldman Sachs or our distributors may negatively impact investors in the Securities and cause our interests and those of our clients and counterparties to be contrary to those of investors in the Securities

In anticipation of the sale of the Securities, we and/or our affiliates expect to hedge our obligations under the Securities by purchasing futures and/or other instruments linked to the Underlying Asset(s) or components thereof, or, if applicable, the foreign currencies in which Underlying Asset(s) are denominated, as applicable. We also expect to adjust the hedge by, among other things, purchasing or selling any of the foregoing, and perhaps other instruments linked to the Underlying Asset(s) or any components thereof (the "**Underlying Components**"), at any time and from time to time, and to unwind the hedge by selling any of the foregoing on or before the final valuation date for your Securities. Alternatively, we may hedge all or part of our obligations under the Securities with unaffiliated distributors of the Securities which we expect will undertake similar market activity. We may also enter into, adjust and unwind hedging transactions relating to other underlier-linked securities whose returns are linked to changes in the level of the Underlying Asset(s) or one or more of the Underlying Components, as applicable.

In addition to entering into such transactions itself, or distributors entering into such transactions, Goldman Sachs may structure such transactions for its clients or counterparties, or otherwise advise or assist clients or counterparties in entering into such transactions. These activities may be undertaken to achieve a variety of objectives, including: permitting other purchasers of the Securities or other securities to hedge their investment in whole or in part; facilitating transactions for other clients or counterparties that may have business objectives or investment strategies that are inconsistent with, or contrary to, those of investors in the Securities; hedging the exposure of Goldman Sachs to the Securities including any interest in the Securities that it reacquires or retains as part of the offering process, through its market-making activities or otherwise; enabling Goldman Sachs to comply with its internal risk limits or otherwise manage firmwide, business unit or product risk; and/or enabling Goldman Sachs to take directional views as to relevant markets on behalf of itself or its clients or counterparties that are inconsistent with or contrary to the views and objectives of the investors in the Securities.

Any of these hedging or other activities may adversely affect the levels of the Underlying Asset(s) — directly or indirectly by affecting the price of the Underlying Components — and therefore the market value of your Securities and the amount we will pay on your Securities, if any, at maturity. In addition, you should expect that these transactions will cause Goldman Sachs or its clients, counterparties or distributors to have economic interests and incentives that do not align with, and that may be directly contrary to, those of an investor in the Securities. Neither Goldman Sachs nor any distributor will have any obligation to take, refrain from taking or cease taking any action with respect to these transactions based on the potential effect on an investor in the Securities, and may receive substantial returns on hedging or other activities while the value of the Securities declines. In addition, if the distributor from which you purchase Securities is to conduct hedging activities in connection with the Securities, that distributor may otherwise profit in connection with such hedging activities and such profit, if any, will be in addition to the compensation that the distributor receives for the sale of the Securities to you. You should be aware that the potential to earn fees in connection with hedging activities may create a further incentive for the distributor to sell the Securities to you in addition to the compensation they would receive for the sale of the Securities.

10.2 Goldman Sachs' trading and investment activities for its own account or for its clients could negatively impact investors in the Securities

Goldman Sachs is a global investment banking, securities and investment management firm that provides a wide range of financial services to a substantial and diversified client base that includes corporations, financial institutions, governments and high-net-worth individuals. As such, it acts as an investor,

investment banker, research provider, investment manager, investment advisor, market maker, trader, prime broker and lender. In those and other capacities, Goldman Sachs purchases, sells or holds a broad array of investments, actively trades securities, derivatives, loans, commodities, currencies, credit default swaps, indices, baskets and other financial instruments and products for its own account or for the accounts of its customers, and will have other direct or indirect interests, in the global fixed income, currency, commodity, equity, bank loan and other markets. Any of Goldman Sachs' financial market activities may, individually or in the aggregate, have an adverse effect on the market for your Securities, and you should expect that the interests of Goldman Sachs or its clients or counterparties will at times be adverse to those of investors in the Securities.

Goldman Sachs regularly offers a wide array of securities, financial instruments and other products into the marketplace, including existing or new products that are similar to your Securities, or similar or linked to the Underlying Asset(s). Investors in the Securities should expect that Goldman Sachs will offer securities, financial instruments, and other products that will compete with the Securities for liquidity, research coverage or otherwise.

10.3 Goldman Sachs' market-making activities could negatively impact investors in the Securities

Goldman Sachs actively makes markets in and trades financial instruments for its own account and for the accounts of customers. These financial instruments include debt and equity securities, currencies, commodities, bank loans, indices, baskets and other products. Goldman Sachs' activities include, among other things, executing large block trades and taking long and short positions directly and indirectly, through derivative instruments or otherwise. The securities and instruments in which Goldman Sachs takes positions, or expects to take positions, include securities and instruments of the Underlying Asset(s) or the Underlying Components thereof, securities and instruments similar to or linked to the foregoing or the currencies in which they are denominated. Market making is an activity where Goldman Sachs buys and sells on behalf of customers, or for its own account, to satisfy the expected demand of customers. By its nature, market making involves facilitating transactions among market participants that have differing views of securities and instruments. As a result, you should expect that Goldman Sachs will take positions that are inconsistent with, or adverse to, the investment objectives of investors in the Securities.

If Goldman Sachs becomes a holder of any Underlying Asset or Underlying Component thereof, as applicable, in its capacity as a market-maker or otherwise, any actions that it takes in its capacity as securityholder, including voting or provision of consents, will not necessarily be aligned with, and may be inconsistent with, the interests of investors in the Securities.

10.4 You should expect that Goldman Sachs personnel will take research positions, or otherwise make recommendations, provide investment advice or market colour or encourage trading strategies that might negatively impact investors in the Securities

Goldman Sachs and its personnel, including its sales and trading, investment research and investment management personnel, regularly make investment recommendations, provide market colour or trading ideas, or publish or express independent views in respect of a wide range of markets, issuers, securities and instruments. They regularly implement, or recommend to clients that they implement, various investment strategies relating to these markets, issuers, securities and instruments. These strategies include, for example, buying or selling credit protection against a default or other event involving an issuer or financial instrument. Any of these recommendations and views may be negative with respect to the Underlying Asset(s) or Underlying Components thereof, as applicable, or other securities or instruments similar to or linked to the foregoing or result in trading strategies that have a negative impact on the market for any such securities or instruments, particularly in illiquid markets. In addition, you should expect that personnel in the trading and investing businesses of Goldman Sachs will have or develop independent views of the Underlying Asset(s) or Underlying Components thereof, as applicable,

the relevant industry or other market trends, which may not be aligned with the views and objectives of investors in the Securities.

10.5 Goldman Sachs regularly provides services to, or otherwise has business relationships with, a broad client base, which may include the sponsors or issuers of the Underlying Asset(s) or Underlying Components thereof or other entities that are involved in the transaction

Goldman Sachs regularly provides financial advisory, investment advisory and transactional services to a substantial and diversified client base, and you should assume that Goldman Sachs will, at present or in the future, provide such services or otherwise engage in transactions with, among others, the sponsors or issuers of the Underlying Asset(s) or Underlying Components thereof, or transact in securities or instruments or with parties that are directly or indirectly related to the foregoing. These services could include making loans to or equity investments in those companies, providing financial advisory or other investment banking services, or issuing research reports. You should expect that Goldman Sachs, in providing such services, engaging in such transactions, or acting for its own account, may take actions that have direct or indirect effects on the Underlying Asset(s) or Underlying Components thereof, as applicable, and that such actions could be adverse to the interests of investors in the Securities. In addition, in connection with these activities, certain Goldman Sachs personnel may have access to confidential material non-public information about these parties that would not be disclosed to Goldman Sachs employees that were not working on such transactions as Goldman Sachs has established internal information barriers that are designed to preserve the confidentiality of non-public information. Therefore, any such confidential material non-public information would not be shared with Goldman Sachs employees involved in structuring, selling or making markets in the Securities or with investors in the Securities.

In any offering under the Programme, as well as in all other circumstances in which Goldman Sachs receives any fees or other compensation in any form relating to services provided to or transactions with any other party, no accounting, offset or payment in respect of the Securities will be required or made; Goldman Sachs will be entitled to retain all such fees and other amounts, and no fees or other compensation payable by any party or indirectly by holders of the Securities will be reduced by reason of receipt by Goldman Sachs of any such other fees or other amounts. Any such fees or other amounts received by Goldman Sachs will be made in accordance with all applicable laws and regulations.

10.6 An offering of the Securities may reduce an existing exposure of Goldman Sachs or facilitate a transaction or position that serves the objectives of Goldman Sachs or other parties

A completed offering of Securities may reduce Goldman Sachs' existing exposure to the Underlying Asset(s) or Underlying Components thereof, as applicable, securities and instruments similar to or linked to the foregoing or the currencies in which they are denominated, including exposure gained through hedging transactions in anticipation of this offering. An offering of Securities will effectively transfer a portion of Goldman Sachs' exposure (and indirectly transfer the exposure of Goldman Sachs' hedging or other counterparties) to investors in the Securities.

The terms of an offering (including the selection of the Underlying Asset(s) and the establishment of other transaction terms) may have been selected in order to serve the investment or other objectives of Goldman Sachs or another client or counterparty of Goldman Sachs. In such a case, Goldman Sachs would typically receive the input of other parties that are involved in or otherwise have an interest in the offering, transactions hedged by the offering, or related transactions. The incentives of these other parties would normally differ from and in many cases be contrary to those of investors in the Securities.

Every such offering of Securities will be designed, distributed and monitored in accordance with all applicable legal and regulatory requirements (including any product governance requirements).

10.7 Other investors in the Securities may not have the same interests as you

Other investors in the Securities are not required to take into account the interests of any other investor in exercising remedies or voting or other rights in their capacity as securityholders or in making requests or recommendations to us as to the establishment of other transaction terms. The interests of other investors may, in some circumstances, be adverse to your interests. For example, certain investors may take short positions (directly or indirectly through derivative transactions) on assets that are the same or similar to your Securities, Underlying Asset(s) or other similar securities, which may adversely impact the market for or value of your Securities.

10.8 As Calculation Agent, we will have the authority to make determinations that could affect the market value and return on your Securities

Unless otherwise specified in the terms of the Securities, the Calculation Agent will be Goldman Sachs International. The Calculation Agent has the authority (i) to determine whether certain specified events and/or matters so specified in the conditions relating to the Securities have occurred, and (ii) to determine the consequence of such event, including potentially, revised calculations, adjustments, postponements or early redemption of the Securities. See risk factor 7 (*Risks associated with discretionary powers of the Issuer and the Calculation Agent including in relation to our hedging arrangements*) above. Any such determination made by the Calculation Agent (in the absence of manifest or proven error) shall be binding on the Issuer and all purchasers of the Securities. Any such determinations may have an adverse impact on the value of and return on the Securities.

10.9 Risks associated with potential 'bail-in' of Securities

See risk factor 1 (*Risks relating to the potential exercise by a UK resolution authority of its resolution powers in relation to GSI*) above.

PERFORMANCE SCENARIOS

THE SCENARIOS AND FIGURES PRESENTED BELOW ARE FOR ILLUSTRATIVE PURPOSES ONLY. THE SETTLEMENT AMOUNT (IF APPLICABLE), THE AUTOMATIC EARLY EXERCISE AMOUNT (IF APPLICABLE) AND THE COUPON AMOUNT (IF APPLICABLE) IN RESPECT OF EACH CERTIFICATE WILL BE CALCULATED IN ACCORDANCE WITH THE TERMS OF THE CERTIFICATES AS SET OUT IN THE TERMS AND CONDITIONS OF THE SECURITIES.

For the purposes of each Performance Scenario:

- (i) the Calculation Amount per Certificate is SEK 10,000, and the Issue Price per Certificate (of the Calculation Amount) is assumed to be 100 per cent. of the Calculation Amount; and
- (ii) in respect of each Underlying Asset, the Autocall Level is 90 per cent. of the Asset Initial Price of such Underlying Asset, Coupon Barrier Level 2 is 60 per cent. of the Asset Initial Price of such Underlying Asset and the Barrier Level is 60 per cent. of the Asset Initial Price of such Underlying Asset.

For the purposes of these Performance Scenarios only, (i) the Step-Up Coupon Autocall Event Percentage for the first Autocall Observation Date (being the Valuation Date scheduled to fall on July 2, 2019) is deemed to be 0.12, (ii) the Coupon Value is deemed to be 0.04, and (iii) the Final Step-Up Coupon Percentage is deemed to be 0.60. The actual Step-Up Coupon Autocall Event Percentage for the first Autocall Observation Date, the Coupon Value and the Final Step-Up Coupon Percentage will each be determined by the Calculation Agent on or around July 2, 2018 and, in respect of (i) the Step-Up Coupon Autocall Event Percentage for the first Autocall Observation Date may be a lesser or greater amount than 0.12 (but shall not be less than 0.09), (ii) the Coupon Value may be a lesser or greater percentage than 0.04 (but shall not be less than 0.03), and (iii) the Final Step-Up Coupon Percentage may be a lesser or greater percentage than 0.60 (but shall not be less than 0.45). Therefore, as the actual Step-Up Coupon Autocall Event Percentage for the first Autocall Observation Date, the Coupon Value and the Final Step-Up Coupon Percentage may each be lower than the deemed values used for the purposes of these Performance Scenarios, the actual amounts received by investors may be less than the amounts stated in the Scenarios below.

AUTOMATIC EARLY EXERCISE

Scenario 1 – Automatic Early Exercise but no Coupon Amount: *The Reference Price in respect of each Underlying Asset for the first Autocall Observation Date is greater than or equal to its respective Autocall Level. The Basket Performance for the first Autocall Observation Date is 0.20.*

In this Scenario, the Certificates will be exercised on such Autocall Observation Date, and the Automatic Early Exercise Amount payable per Certificate (of the Calculation Amount) on the Automatic Early Exercise Date immediately following such Autocall Observation Date will be an amount equal to the Autocall Event Amount for the first Autocall Observation Date, i.e., SEK 12,000. No Coupon Amount will be payable on the Coupon Payment Date immediately following such Autocall Observation Date.

Scenario 2 – Automatic Early Exercise but no Coupon Amount: *The Reference Price in respect of each Underlying Asset for the first Autocall Observation Date is greater than or equal to its respective Autocall Level. The Basket Performance for the first Autocall Observation Date is 0.10.*

In this Scenario, the Certificates will be exercised on such Autocall Observation Date, and the Automatic Early Exercise Amount payable per Certificate (of the Calculation Amount) on the Automatic Early Exercise Date immediately following such Autocall Observation Date will be an amount equal to the Autocall Event Amount for the first Autocall Observation Date, i.e., SEK 11,200. No Coupon Amount will be payable on the Coupon Payment Date immediately following such Autocall Observation Date.

Scenario 3 – no Automatic Early Exercise but Coupon Amount: *The Reference Price in respect of one Underlying Asset for the first Autocall Observation Date is less than its Autocall Level but greater than or equal to its Coupon Barrier Level 2, and the Reference Price in respect of each other Underlying Asset for such Autocall Observation Date is greater than or equal to its respective Autocall Level.*

In this Scenario, the Certificates will not be exercised on such Autocall Observation Date. A Coupon Amount of 4.00 per cent. of the Calculation Amount, i.e., SEK 400, will be payable per Certificate (of the Calculation Amount) on the Coupon Payment Date immediately following such Autocall Observation Date.

Scenario 4 – no Automatic Early Exercise and no Coupon Amount: *The Reference Price in respect of one Underlying Asset for the first Autocall Observation Date is less than its Coupon Barrier Level 2 and the Reference Price in respect of each other Underlying Asset for such Autocall Observation Date is greater than or equal to its respective Autocall Level.*

In this Scenario, the Certificates will not be exercised on such Autocall Observation Date and no Coupon Amount will be payable on the Coupon Payment Date immediately following such Autocall Observation Date.

No Coupon Amount will be payable per Certificate (of the Calculation Amount) on the Coupon Payment Date falling on the Maturity Date.

Scenario 6 – positive scenario but no Coupon Amount: *The Certificates have not been exercised on an Applicable Date, and the Final Closing Price in respect of each Underlying Asset is 90 per cent. or more of its respective Asset Initial Price. The Final Basket Performance is 0.55.*

In this Scenario, the Certificates will be redeemed on the Maturity Date and the Settlement Amount payable per Certificate (of the Calculation Amount) will be an amount equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the Trigger Percentage, i.e., SEK 16,000. No Coupon Amount will be payable per Certificate (of the Calculation Amount) on the Coupon Payment Date falling on the Maturity Date.

Scenario 7 – neutral scenario plus Coupon Amount: *The Certificates have not been exercised on an Applicable Date, the Final Closing Price in respect of one Asset is 89 per cent. of its Asset Initial Price and the Final Closing Price in respect of each other Asset is 90 per cent. or more of its respective Asset Initial Price.*

In this Scenario, the Certificates will be redeemed on the Maturity Date and the Settlement Amount payable per Certificate (of the Calculation Amount) will be 100 per cent. of the Calculation Amount, i.e., SEK 10,000. Additionally, a Coupon Amount of SEK 400 will be payable per Certificate (of the Calculation Amount) on the Coupon Payment Date falling on the Maturity Date.

Scenario 8 – negative scenario and no Coupon Amount: *The Certificates have not been exercised on an Applicable Date, the Final Closing Price in respect of one Asset is 59 per cent. of its Asset Initial Price and the Final Closing Price in respect of each other Asset is 60 per cent. or more of its respective Asset Initial Price.*

In this Scenario, the Certificates will be redeemed on the Maturity Date and the Settlement Amount payable per Certificate (of the Calculation Amount) will be 59 per cent. of the Calculation Amount, i.e., SEK 5,900. No

Coupon Amount will be payable on the Coupon Payment Date falling on the Maturity Date. **In this Scenario, an investor who purchased the Certificates at the Issue Price will sustain a substantial loss of the amount invested in the Certificates.**

Scenario 9 – negative scenario and no Coupon Amount: *The Certificates have not been exercised on an Applicable Date, the Final Closing Price in respect of one Asset is zero per cent. of its Asset Initial Price and the Final Closing Price in respect of each other Asset is 60 per cent. or more of its respective Asset Initial Price.*

In this Scenario, the Certificates will be redeemed on the Maturity Date and the Settlement Amount payable per Certificate (of the Calculation Amount) will be zero per cent. of the Calculation Amount, i.e., zero. No Coupon Amount will be payable on the Coupon Payment Date falling on the Maturity Date. **In this Scenario, an investor will sustain a total loss of the amount invested in the Certificates (other than any Coupon Amounts, if applicable).**

9. **UNITED STATES TAX CONSIDERATIONS**

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Certificates, the Certificates will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Certificates for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Certificates.

Händelse vid Automatisk Förtida Inlösen

En "**Händelse för Automatisk Förtida Inlösen**" inträffar om Referensvärdet (Autocall) för varje Underliggande Tillgång i Korgen på någon Observationsdag för Automatisk Förtida Inlösen är större än eller lika med Nivån för Automatisk Förtida Inlösen för sådan Observationsdag för Automatisk Förtida Inlösen.

Definerade begrepp som används ovan:

- **Nivå för Automatisk Förtida Inlösen:** avseende en Underliggande Tillgång, 90 procent av den Initiala Tillgångskursen för sådan Underliggande Tillgång.
- **Referensvärde (Autocall):** avseende en Underliggande Tillgång, Referenskursen för sådan Underliggande Tillgång på den relevanta Observationsdagen för Automatisk Förtida Inlösen.

Belopp för Icke-planerad Förtida Inlösen

Icke-planerad förtida inlösen: Värdepapperen kan lösas in före den planerade förfallotiden (i) enligt Emittentens beslutsrätt (a) om Emittenten bedömer att ändringar i tillämplig rätt påverkar Emittentens eller dess närståendes utföranden under Värdepapperen eller hedgningstransaktioner avseende Värdepapperen på ett sådant sätt att detta har blivit (eller om det föreligger betydande sannolikhet för att inom den närmaste framtiden, det kommer att bli) olagligt eller ogenomförbart (helt eller delvis), (b) om tillämpligt, om Beräkningsagenten anser att vissa ytterligare avbrottshändelser eller justeringshändelser enligt villkoren för Värdepapperen har inträffat med avseende på de underliggande tillgångarna eller (ii) efter mottagande av meddelande från en Innehavare som förklarar sådana Värdepapper omedelbart uppsagda till återbetalning på grund av inträffandet av en uppsägningsgrundande händelse som alltjämt fortgår.

Beloppet för Icke-planerad Förtida Inlösen som ska betalas på en sådan icke-planerad förtida inlösen ska i sådant fall, för varje Värdepapper, vara ett belopp motsvarande det rimliga marknadsvärdet av Värdepapperet med beaktande av samtliga relevanta omständigheter med avdrag för samtliga kostnader som åsamkas Emittenten eller något av dess närstående företag i samband med sådan förtida inlösen, innefattande också sådana som avser avslutande av ett underliggande och/eller relaterat hedgnings- eller finansieringsarrangemang.

Beloppet för Icke-planerad Förtida Inlösen kan vara lägre än er ursprungliga investering och ni kan därför förlora delar eller hela er investering vid en icke-planerad förtida inlösen.

Avvecklingsbelopp

Om ej dessförinnan utövade i förtid eller köpta och annullerade kommer Avvecklingsbeloppet som ska erläggas på förfallodagen att vara:

$$BB \times \text{Aktiverand e Procenttal}$$

Om en Barriärhändelse har inträffat men en Aktiverande Händelse inte har inträffat kommer Avvecklingsbeloppet som ska erläggas, avseende respektive Värdepapper, att beräknas i enlighet med formeln nedan:

$$BB \times \text{Inlösenprocenttal}$$

Om en Barriärhändelse har inträffat och en Aktiverande Händelse har inträffat, kommer Avvecklingsbeloppet som ska erläggas, avseende respektive Värdepapper, att beräknas i enlighet med formeln nedan:

$$BB \times \frac{\text{Slutligt Referensvärde}}{\text{Initialt Referensvärde}}$$

- **Procentsats för Slutlig Ökande Kupong:** ett tal fastställt av Beräkningsagenten på eller omkring 2 juli 2018, baserat på marknadsförhållanden och som anges i ett meddelande publicerat av Emittenten på eller omkring emissionsdagen (13 juli 2018). På datumet för detta Prospekt, Procentsatsen för Slutlig Ökande Kupong är indikativt satt till 0,60, men kan vara ett mindre eller större belopp förutsatt att det inte är mindre än 0,45.
- **Slutligt Värde:** avseende en Underliggande Tillgång, den Slutliga Stängningskursen för sådan Underliggande Tillgång.
- **Slutligen Sämst Presterande Tillgång:** den Underliggande Tillgången i korgen med den lägsta Slutliga Tillgångsutvecklingen, som utgörs av det Slutliga Värdet dividerat med det Initiala Värdet.

AVSNITT D – RISKER																											
D2	Nyckelrisker som	Betalningen av varje belopp som förfaller under Värdepapperen är utsatt för																									

<p>är specifika för Emittenten</p>	<p>kreditrisken förknippad med oss. Värdepapperen är våra icke-säkerställda förpliktelser. Värdepapperen är inte banksättningar och är inte försäkrade eller garanterade av the UK Financial Services Compensation Scheme eller någon annan stat eller statligt eller privat organ eller någon insättningsgaranti i någon jurisdiktion. Värdet för och avkastningen från dina värdepapper kommer att vara utsatt för vår kreditrisk och för förändringar i marknadens syn på vår kreditvärdighet.</p> <p>Hänvisningarna i Punkt B.12 ovan till Emittentens "utsikter" och "finansiella position eller handelsposition", är specifika i förhållande till Emittentens möjlighet att möta dess fulla betalningsansvar avseende Värdepapperen i tid. Väsentlig information om Emittentens finansiella ställning och framtidsutsikter är inkluderat i GSI:s års- och delårsrapporter. Du bör dock vara medveten om att varje huvudsaklig risk som framgår nedan kan ha en väsentlig negativ påverkan på Emittentens rörelse, verksamhet, finansiella ställning och handelsställning samt framtidsutsikter vilket i sin tur kan ha en väsentlig negativ påverkan på den avkastning på Värdepapperen som investerare erhåller.</p> <p>Emittenten är föremål för flera huvudsakliga risker:</p> <ul style="list-style-type: none"> • GSI:s verksamheter har påverkats och kan fortsätta att påverkas negativt av förhållanden på den globala finansmarknaden och allmänt av ekonomiska förhållanden. • GSI:s verksamheter och dess kunders verksamheter är föremål för omfattande och genomgripande regleringar runt om i världen. • GSI:s verksamheter har påverkats och kan fortsätta att påverkas negativt av sjunkande värden på tillgångar. Detta gäller särskilt för verksamheter med långa positioner, som uppstår ersättning baserat på hanterade tillgångar eller som mottar eller ställer säkerheter. • GSI:s verksamheter har påverkats och kan fortsätta att påverkas negativt av störningar på kreditmarknaderna, inklusive försämrad tillgång till krediter och högre kostnader för erhållande av krediter. • GSI:s verksamheter avseende investment banking, kundtransaktioner och investeringsförvaltning har påverkats och kan fortsätta att påverkas av osäkerhet på marknaden eller bristande förtroende hos investerare och verkställande direktörer på grund av minskad marknadsaktivitet och andra oförmånliga förhållanden hänförliga till ekonomi, geopolitik eller marknad. • GSI:s investeringsförvaltning kan påverkas av dåliga investeringsresultat för dess investeringsprodukter. • GSI:s kan lida skada till följd av ineffektiva processer och strategier avseende riskhantering. • GSI:s likviditet, lönsamhet och verksamheter kan påverkas negativt av en oförmåga att komma in på lånemarknaden eller att sälja tillgångar eller genom en försämrad kreditrating eller en ökning av dess kreditspreadar. • En oförmåga att på lämpligt sätt identifiera och hantera potentiella intressekonflikter kan negativt påverka GSI:s verksamheter. • Brister i GSI:s eller tredje mans operationella system eller infrastruktur, liksom mänskliga fel, kan försämra GSI:s likviditet, störa GSI:s verksamheter, resultera i offentliggörande av konfidentiell information, skada GSI:s rykte och orsaka förluster. • En oförmåga att skydda GSI:s datorsystem, nätverk och information samt GSI:s klienters information, mot cyberattacker och liknande hot kan försämra GSI:s möjlighet att bedriva GSI:s verksamhet, resultera i offentliggörande, stöld eller förstörelse av konfidentiell information, skada GSI:s rykte och
---	---

		<p>orsaka förluster.</p> <ul style="list-style-type: none"> • GSI:s verksamheter, lönsamhet och likviditet kan påverkas negativt av en försämrad kreditvärdighet eller obestånd hos tredje man som är skyldig GSI pengar, värdepapper eller andra tillgångar eller vars värdepapper eller obligationer GSI innehar. • Koncentration av risker ökar risken för stora förluster i GSI:s aktiviteter avseende market-making, emissionsgarantier, investeringar och utlåning. • Sektorn för finansiella tjänster är både mycket konkurrensutsatt och sammankopplad. • GSI:s står inför förhöjda risker då nya affärsaktiviteter föranleder affärsförbindelser med en bredare skara av kunder och motparter och ger exponeringar mot nya tillgångsslag och nya marknader. • Derivattransaktioner och fördröjda avvecklingar kan exponera GSI:s för oväntade risker och potentiella förluster. • GSI:s verksamheter kan påverkas negativt om GSI misslyckas med att anställa och behålla kvalificerade medarbetare. • GSI:s kan påverkas negativt av offentliga och regulatoriska prövningar eller negativ publicitet. • Väsentliga händelser innefattande juridiskt ansvar eller åtgärder av tillsynsorgan mot GSI kan få avsevärda negativa finansiella verkningar eller orsaka väsentlig renomméskada för GSI, vilket i sin tur allvarligt kan skada GSI:s affärsmöjligheter. • Ökningen av elektronisk handel och introducerandet av ny teknologi för handel kan ha en negativ påverkan på GSI:s verksamhet och kan öka konkurrensen. • GSI:s aktiviteter relaterade till råvaror, särskilt avseende kraftalstring och fysiska råvaror, gör GSI till föremål för omfattande regleringar, och involverar vissa potentiella risker, inklusive miljörelaterade, renommérelaterade och andra risker som kan exponera Koncernen för väsentliga ansvarsförpliktelser och kostnader. • Genom dess verksamhet runt om i världen exponeras GSI för risker hänförliga till politik, ekonomi och juridik samt operationella och andra risker som är naturliga då verksamhet bedrivs i många länder. • GSI kan lida skada till följd av oförutsedda eller katastrofartade händelser inklusive pandemier, terroristattacker, extremt väder eller andra naturkatastrofer. • Fördelaktiga eller helt enkelt mindre negativa utvecklingar eller marknadsförhållanden som berör branscher eller marknader där Koncernen har en lägre koncentration av klienter i sådan bransch eller marknad, kan resultera i att Koncernen underpresterar jämfört med en liknande verksamhet hos en konkurrent som har en högre koncentration av klienter i en sådan bransch eller marknad. Till exempel, Koncernen har en mindre företagskundbas inom dess marknadsgarantverksamhet än många av dess jämlingar och därför kan Koncernens konkurrenter dra större fördel från ökad aktivitet hos företagskunder. • Vissa av Koncernens verksamheter och dess finansiering kan påverkas negativt av ändringar i referensräntor, valutakurser, index, korgar, börshandlade fonder eller andra finansiella mätvärden till vilka produkterna som erbjuds av Koncernen är eller finansiering upptagen av Koncernen är relaterade till.

Sådant belopp kan vara mindre än din initiala investering och du kan förlora del av eller hela din investering. <p>Risker förknippade med Aktierelaterade Värdepapper:</p> <ul style="list-style-type: none"> Utvecklingen för aktier är beroende av många oförutsägbara faktorer. Du kan erhålla en lägre avkastning från Värdepapperen än vad du skulle ha erhållit från en investering direkt i aktierna eftersom kursen för aktierna kanske inte inkluderar värdet av utdelningar. Emittenten av en aktie kan vidta vilken åtgärd som helst avseende en aktie utan hänsyn till dina intressen som Innehavare av Värdepapperen och vilken som helst av dessa åtgärder kan negativt påverka värdet för och avkastningen från Värdepapperen. <p>Risker förknippade med Värdepapper relaterade till en korg av underliggande tillgångar:</p> <ul style="list-style-type: none"> En liten korg kommer generellt sett att vara mer sårbar för ändringar i värdet för de underliggande tillgångarna och en ändring i sammansättningen av en korg kan ha en negativ inverkan på korgutvecklingen. En hög korrelation av korgkomponenter kan ha en väsentlig effekt på belopp som ska erläggas avseende Värdepapperen och den negativa utvecklingen för en enskild korgkomponent kan inverka mer än en positiv utveckling för en eller flera andra korgkomponenter och kan ha en inverkan på avkastningen från Värdepapperen. Dina Värdepapper kan justeras eller lösas in i förtid på grund av förändring i lag. Vilken som helst av sådana justeringar kan ha en negativ effekt på värdet för och avkastningen från dina Värdepapper; beloppet du erhåller efter en förtida inlösen kan vara mindre än din initial investering och du kan förlora del av eller hela din investering. Emittenten av dina Värdepapper kan bli ersatt av ett annat bolag. Vi kan ändra villkoren för dina Värdepapper under vissa omständigheter utan ditt samtycke.
