

IMPORTANT NOTICE

In accessing the attached final terms (the "Final Terms") you agree to be bound by the following terms and conditions.

EU MiFID II product governance – Solely for the purposes of the manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties, professional clients and retail clients, each as defined in Directive 2014/65/EU (as amended, "**MiFID II**"); (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate; and (iii) the following channels for distribution of the Notes to retail clients are appropriate - investment advice, portfolio management, non-advised sales, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable. Any person subsequently offering, selling or recommending the Notes (a "distributor") should take into consideration the manufacturer's target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels.

PROHIBITION OF SALES TO UK RETAIL INVESTORS – The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom ("**UK**"). For these purposes, a "**retail investor**" means a person who is neither: (i) a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 ("**EUWA**"); nor (ii) a qualified investor as defined in paragraph 15 of Schedule 1 to the Public Offers and Admissions to Trading Regulations 2024. Consequently no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the "**UK PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

The information contained in the Final Terms may be addressed to and/or targeted at persons who are residents of particular countries only as specified in the Final Terms and/or in the Base Prospectus (as defined in the Final Terms) and is not intended for use and should not be relied upon by any person outside those countries and/or to whom the offer contained in the Final Terms is not addressed. **Prior to relying on the information contained in the Final Terms, you must ascertain from the Final Terms and/or the Base Prospectus whether or not you are an intended addressee of the information contained therein.**

Neither the Final Terms nor the Base Prospectus constitutes an offer to sell or the solicitation of an offer to buy securities in the United States or in any other jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration, exemption from registration or qualification under the securities law of any such jurisdiction.

The securities described in the Final Terms and the Base Prospectus have not been, and will not be, registered under the U.S. Securities Act of 1933, as amended (the "**Securities Act**") and may not be offered or sold directly or indirectly within the United States or to, or for the account or benefit of, U.S. persons or to persons within the United States of America (as such terms are defined in Regulation S under the Securities Act ("**Regulation S**"). The securities described in the Final Terms will only be offered in offshore transactions to non-U.S. persons in reliance upon Regulation S.

What are the Key Risks Specific to the Issuer?

Negative economic developments and conditions in the markets in which the Nordea Group operates can adversely affect the Nordea Group's business and results of operations: The Nordea Group's

performance is significantly influenced by the general economic conditions in the Nordic markets (Denmark, Finland, Norway and Sweden). Development of the economic conditions in other markets where the Nordea Group currently operates can also affect the Nordea Group's performance. Economic developments have affected and may continue to affect the Nordea Group's business in a number of ways, including, among others, the income, wealth, liquidity, business and/or financial condition of the Nordea Group's customers, which, in turn, could further reduce the Nordea Group's credit quality and demand for the Nordea Group's financial products and services.

Disruptions and volatility in the global financial markets may adversely impact the Nordea Group:

In recent years, the global financial markets have experienced disruptions and volatility. If any of these conditions continue to persist, or should there be any further turbulence in the markets, this could have a material adverse effect on the Nordea Group's customers and its business, financial condition and results of operations. Further, any of these factors could have a material adverse effect on the Nordea Group's ability to access capital and liquidity on financial terms acceptable to the Nordea Group.

Deterioration in counterparties' credit quality may affect the Nordea Group's financial performance:

Risks arising from changes in credit quality and the recoverability of loans and amounts due from counterparties are inherent in a wide range of the Nordea Group's businesses. The Nordea Group makes provisions for loan losses in accordance with IFRS. However, the provisions made are based on available information, estimates and assumptions and are subject to uncertainty, and there can be no assurances that the provisions will be sufficient to cover the amount of loan losses as they occur. Adverse changes in the credit quality of the Nordea Group's borrowers and counterparties or a decrease in collateral values, are likely to affect the recoverability and value of the Nordea Group's assets and require an increase in the Nordea Group's individual provisions and potentially in collective provisions for impaired loans, which in turn would adversely affect the Nordea Group's financial performance. In particular, the Nordea Group's exposure to corporate customers is subject to adverse changes in credit quality should the economic environment in the Nordea Group's markets deteriorate.

The Nordea Group is exposed to market price risk: The Nordea Group's customer-driven trading operations and its treasury operations (where the Nordea Group holds investment and liquidity portfolios for its own account) are the key contributors to market price risk in the Nordea Group. To the extent volatile market conditions persist or recur, the fair value of the Nordea Group's bond, derivative and structured credit portfolios, as well as other classes, could fall more than estimated, and therefore cause the Nordea Group to record write-downs. In addition, because the Nordea Group's trading and investment income depends to a great extent on the performance of financial markets, volatile market conditions could result in a significant decline in the Nordea Group's trading and investment income, or result in a trading loss, which, in turn, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations.

Liquidity risk is inherent in the Nordea Group's operations: Liquidity risk is the risk that the Nordea Group will be unable to meet its obligations as they fall due or meet its liquidity commitments only at an increased cost. A substantial portion of the Nordea Group's liquidity and funding requirements is met through reliance on customer deposits, as well as ongoing access to wholesale funding markets, including issuance of long-term debt market instruments, such as covered bonds. The volume of these funding sources, in particular long-term funding, may be constrained during periods of liquidity stress. Turbulence in the global financial markets and economy may adversely affect the Nordea Group's liquidity and the willingness of certain counterparties and customers to do business with the Nordea Group, which may result in a material adverse effect on the Nordea Group's business and results of operations.

Operational risks, including risks in connection with investment advice, may affect the Nordea Group's business:

The Nordea Group's business operations are dependent on the ability to process a large number of complex transactions across different markets in many currencies. The Nordea Group's operations are carried out through a number of entities. Operational losses, including monetary damages, reputational damage, costs, and direct and indirect financial losses and/or write-downs, may result from many different sources. As a part of its banking and asset management activities, the Nordea Group also provides its customers with investment advice, access to internally as well as externally managed funds and serves as custodian of third party funds. In the event of losses incurred by its customers due to investment advice from the Nordea Group, or the misconduct or fraudulent actions of external fund managers, the Nordea Group's customers may seek compensation from the Nordea Group. Although the Nordea Group has implemented risk controls and taken other actions to mitigate

exposures and/or losses, there can be no assurances that such procedures will be effective in controlling each of the operational risks faced by the Nordea Group.

The Nordea Group's business is subject to the impact of environmental, social and governance and other sustainability risks: The Nordea Group may be exposed to sustainability risk as a result of current or future environmental, social and governance ("ESG") events or conditions. In addition to resulting in potential direct losses or costs, sustainability risk can further exacerbate the risks the Nordea Group is facing. Credit risk is considered the risk category most significantly impacted by sustainability factors over the longer term. The Nordea Group may also be subject to increased regulatory scrutiny, new disclosure requirements or other additional costs. If they were to realise, environmental, social and governance and other sustainability risks could have a material adverse effect on the Nordea Group's reputation, business, financial condition and results of operations.

3. Key Information on the Securities

What are the Main Features of the Securities?

- (a) The Notes are Equity Linked Notes in Registered Form bearing ISIN SE0027620188.
- (b) The Notes are issued in SEK in denominations of SEK 10,000,000. The total nominal amount of the Notes will be specified in the Final Terms Confirmation Announcement following completion of the Offer Period. The Notes mature in September 2029.
- (c) ***"Basket Long" structure:*** The return of the Notes depends on the performance of the underlying Basket during the lifetime of the investment. The performance of the underlying Basket will be measured by comparing the Initial Price, the price of the basket constituents on the initial valuation date, to the Final Price, the average price of each basket constituent on 7 valuation dates. If the Final Price of the Basket is higher than the Initial Price of the underlying Basket, the Notes will pay the nominal amount plus the nominal amount multiplied with the positive performance multiplied with the participation ratio, on the redemption date. If the Final Price of the underlying Basket is lower than the Initial Price of the underlying Basket, the Notes will pay the nominal amount, on the redemption date. The negative return of the Note is limited by the minimum redemption amount
- (d) By investing in the Notes, an investor will be assuming the risk that the Issuer will not be able to make payments on the securities in accordance with their terms. On an insolvency of the Issuer, there is a risk that the investors may lose some or all of their investment. The Notes constitute unsecured and unsubordinated obligations of the Issuer and rank *pari passu* without any preference among themselves and at least *pari passu* with all other outstanding unsecured and unsubordinated obligations of the Issuer, present and future. The Notes could also be subject to the bail-in power in the event of a resolution of the Issuer under directive 2014/59/EU, as implemented in Finland, and may be written down or converted into other securities (including ordinary shares) if the resolution authority determines that this is necessary in order to restore the viability of the Issuer.
- (e) The Notes are freely transferable by their terms, although the Base Prospectus summarises certain legal restriction on the offers and sales of Notes in certain jurisdictions.

Where will the Securities be Traded?

Application will be made for the Notes to be admitted to trading on Nasdaq Stockholm effective as of 17 September 2026.

What are the Key Risks that are Specific to the Securities?

Complexity of the product: the performance structure for structured Notes is sometimes complex and may contain mathematical formulae or relationships which, for an investor, may be difficult to understand and compare with other investment alternatives. In addition, the relationship between yield and risk may be difficult to assess.

There may be no active trading market for the Notes: the Notes will be new securities which may not be widely distributed and/or may be unlisted and, even if listed, may not have an active trading market.

The lack of an active trading market may result in reduced liquidity for the Notes, with the result that the investor may have to hold such Notes until they are redeemed. Nordea is under no obligation to buy back or make a market in any Notes. Noteholders should be aware that the secondary market for the Notes and instruments of this kind may be illiquid due to, among other things, the disruptions and volatility in the global financial markets that have continued through recent years. Noteholders should also be aware that inflation could have an adverse effect on the value of the relevant Notes (including, without limitation, capital protected Notes), including where the return on the Notes is below the level of the relevant inflation rate(s).

Performance of the Reference Assets: with structured Notes, the Noteholder's right to yield and repayment of principal depends on the performance of one or more underlying assets (the "**Reference Assets**") and the performance structure. The value of the Notes may be affected by the value of the Reference Assets at specific points during the term of the relevant Notes, the intensity of the price fluctuations of the Reference Asset(s), expectations regarding future volatility, market interest rates and expected distributions on the Reference Asset(s). The value of Notes can fluctuate above or below their issue price during the lifetime of such Notes. Where there is a high level of interdependence between the individual basket constituents, any move in the performance of the basket constituents will exaggerate the performance of the Notes. Moreover, a small basket or an unequally weighted basket will generally leave the basket more vulnerable to changes in the value of any particular basket constituent. In addition to exposure to the Reference Assets, an investment in Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Notes.

Currency fluctuations: foreign exchange rates may be affected by complex political and economic factors, including relative rates of inflation, interest rate levels, the balance of payments between countries, the extent of any governmental surplus or deficit and the monetary, fiscal and/or trade policies pursued by the governments of the relevant currencies. Currency fluctuations may affect the value or level of the Reference Assets in complex ways. If such currency fluctuations cause the value or level of the Reference Assets to vary, the value or level of the Notes may fall. If the value or level of one or more Reference Asset(s) is denominated in a currency that is different from the currency of the Notes, investors in the Notes may be subject to increased foreign exchange risk. Previous foreign exchange rates are not necessarily indicative of future foreign exchange rates.

Risks relating to market disruption and extraordinary events: Reference Assets may be affected by disruption to their normal trading markets, or extraordinary events such as delisting, nationalisation, bankruptcy, liquidation or dilutive or other events (including e.g. declaration or payment of extraordinary dividend) affecting the relevant Reference Asset. For all structured Notes, events such as changes in the law or increased costs for risk management may arise. If so, the Issuer may, at its sole discretion, make any adjustments in the composition of the assets and the calculation of the yield or value of Notes or replace one Reference Asset with another Reference Asset, as the Issuer deems necessary.

Equities as Reference Assets: the Notes are not sponsored or promoted by the issuer of the equities. The equity issuer does not, therefore, have an obligation to take into account the interests of the investors in the Notes and so the actions of such equity issuer could adversely affect the market value of the Notes. The investor in the Notes is not entitled to receive any dividend payments or other distributions to which a direct holder of the underlying equities would otherwise be entitled.

på andra marknader där Nordeakoncernen för tillfället verkar kan också påverka Nordeakoncernens resultat. Ekonomisk utveckling har påverkat, och kan komma att fortsätta påverka Nordeakoncernens verksamhet på flera sätt, bland annat Nordeakoncernens kunders intäkter, tillgångar, likviditet, verksamhet och/eller finansiell status, vilket i sin tur kan försämra Nordeakoncernens kreditvärdighet samt efterfrågan på Nordeakoncernens finansiella produkter och tjänster.

Störningar och volatilitet på de globala finansmarknaderna kan ha en negativ inverkan på Nordeakoncernen: Under de senaste åren har de globala finansmarknaderna varit föremål för störningar och hög volatilitet. Om dessa förhållanden fortsätter råda, eller om det skulle uppstå någon ytterligare turbulens på marknaden, kan det ha en väsentlig negativ inverkan på Nordeakoncernens kunder, verksamhet, finansiella ställning och resultat. Dessutom kan dessa faktorer ha en väsentlig negativ inverkan på Nordeakoncernens tillgång till kapital och likviditet på finansiella villkor som är godtagbara för Nordeakoncernen.

Försämring av motparters kreditvärdighet kan påverka Nordeakoncernens finansiella resultat: Risker i samband med förändringar av kreditvärdigheten hos, och möjligheten till återbetalning av lån och förfallna belopp från, motparter gäller för stora delar av Nordeakoncernens verksamheter. Nordeakoncernen gör avsättningar för kreditförluster i enlighet med IFRS. Avsättningarna är dock baserade på tillgänglig information, uppskattningar och antaganden och är föremål för osäkerhet, och det är inte säkert att avsättningarna kommer vara tillräckliga för att täcka kreditförluster när de väl uppstår. Negativa förändringar av Nordeakoncernens låntagares och motparters kreditvärdighet, eller en försämring av värdet på säkerheter påverkar sannolikt möjligheten till återbetalning och värdet på Nordeakoncernens tillgångar och kräver sannolikt en ökning av Nordeakoncernens individuella reserveringar och möjligen även av modellbaserade reserveringar för osäkra lånefordringar, vilket i sin tur skulle ha en negativ inverkan på Nordeakoncernens finansiella resultat. Särskilt Nordeakoncernens exponering mot företagskunder är föremål för försämrade kreditvärdighet för det fall ekonomin på Nordeakoncernens marknader försämras.

Nordeakoncernen är utsatt för marknadsprisrisk: Nordeakoncernens kunddrivna värdepappershandel och treasury-funktion (där Nordeakoncernen håller investerings- och likviditetsportföljer för egen räkning) är de största bidragande faktorerna till marknadsprisrisk i Nordeakoncernen. I den utsträckning volatila marknadsförhållanden håller i sig eller återkommer, kan värdet på Nordeakoncernens obligations-, derivat- och strukturerade kreditportföljer, likväl som andra typer av instrument, minska mer än beräknat, och därför medföra nedskrivningar. Utöver det kan volatila marknadsförhållanden, på grund av att Nordeakoncernens handels- och investeringsintäkter till stor del är beroende av förhållandena på de finansiella marknaderna, resultera i en avsevärd nedgång i Nordeakoncernens handels- och investeringsintäkter, eller resultera i en handelsförlust, vilket i sin tur kan ha en väsentlig negativ inverkan på Nordeakoncernens verksamhet, finansiella ställning och verksamhetsresultat.

Det finns en inneboende likviditetsrisk i Nordeakoncernens verksamhet: Likviditetsrisk är risken för att Nordeakoncernen inte ska kunna betala sina skulder när de förfaller eller nå upp till likviditetsåtaganden endast till en högre kostnad. En stor del av Nordeakoncernens likviditets- och finansieringskrav uppfylls genom insättningar från kunder, samt kontinuerlig tillgång till kapitalmarknaderna, bland annat utfärdandet av långfristiga skuldebrev, t.ex. säkerställda obligationer. Storleken på dessa finansieringskällor, särskilt den långfristiga finansieringen, kan vara begränsad under perioder med begränsad likviditet. Oroligheter på de globala finansmarknaderna och ekonomin kan negativt påverka Nordeakoncernens likviditet och vissa motparters och kunders benägenhet att göra affärer med Nordeakoncernen, vilket kan få en väsentlig negativ effekt på Nordeakoncernens verksamhet och verksamhetsresultat.

Operationella risker, inklusive risker i samband med investeringsrådgivning, kan påverka Nordeakoncernens verksamhet: För att Nordeakoncernens verksamhet ska fungera måste koncernen kunna genomföra ett stort antal komplexa transaktioner på olika marknader i många valutor. Nordeakoncernen bedriver sin verksamhet genom flera olika bolag. Verksamhetsförluster, inklusive skadestånd, försämrade rykte, kostnader, direkta och indirekta ekonomiska förluster och/eller nedskrivningar kan uppstå av flera olika orsaker. Som en del av bankverksamheten och tillgångsförvaltningen erbjuder Nordeakoncernen sina kunder investeringsrådgivning, tillgång till internt såväl som externt förvaltade fonder samt agerar förvaringsinstitut för fonder som förvaltas av tredje part. För det fall förluster uppstår hos kunder som fått investeringsrådgivning från Nordeakoncernen, alternativt på grund av försummelse eller bedrägliga handlingar av externa

fondförvaltare, kan Nordeakoncernen krävas på ersättning. Trots att Nordeakoncernen har implementerat riskkontroller och vidtagit andra åtgärder för att minska exponeringen och/eller förlusterna, finns inga garantier för att åtagandena kommer att vara effektiva i att hantera de olika verksamhetsrisker som Nordeakoncernen står inför.

Nordeakoncernens verksamhet är föremål för hållbarhetsrisker kopplade till miljö, socialt ansvar, bolagsstyrning och annat: Nordeakoncernen kan utsättas för hållbarhetsrisk till följd av nuvarande eller framtida händelser eller förhållanden avseende miljö, socialt ansvar eller bolagsstyrning ("ESG"). Förutom att leda till potentiella direkta förluster eller kostnader kan hållbarhetsrisker ytterligare förstärka de risker som Nordeakoncernen är föremål för. Kreditrisk anses vara den riskkategori som påverkas mest av hållbarhetsfaktorer på lång sikt. Nordeakoncernen kan också bli föremål för ökad regulatorisk granskning, nya krav på informationsgivning eller andra ökade kostnader. Skulle de infalla kan hållbarhetsrisker kopplade till miljö, socialt ansvar, bolagsstyrning eller annat ha en väsentlig negativ inverkan på Nordeakoncernens rykte, verksamhet, finansiella ställning och verksamhetsresultat.

3. Central information om Värdepappren

Vad är värdepapprens centrala egenskaper?

- (a) Lånen är Aktielänkade lån i registrerad form med ISIN SE0027620188.
- (b) Lånen är utgivna i SEK med denominering 10 000 000 SEK. Det totala nominella beloppet för Lånen kommer att specificeras i Bekräftelsen av de Slutliga Villkoren som presenteras efter att Erbjudandeperioden avslutats. Lånen förfaller i september 2029.
- (c) **Lån med strukturen "Lång Korg":** Lånens avkastning bestäms av värdeutvecklingen för den underliggande Korgen under Lånens löptid. Den underliggande korgens värdeutveckling kommer bestämmas genom att starkursen, värdet av den underliggande korgens komponenter på den inledande värderingsdagen, jämförs med slutkursen, det genomsnittliga värdet av den underliggande korgens komponenter vid 7 avslutande värderingsdagar. Om Korgens slutkurs är högre än Korgens starkurs kommer Lånen på återbetalningsdagen betala det nominella beloppet ökat med det nominella beloppet multiplicerat med Korgens positiva värdeutveckling multiplicerat med Deltagandegraden. Om Korgens slutkurs är lägre än Korgens starkurs kommer Lånen på återbetalningsdagen betala det nominella beloppet.
- (d) Genom att investera i Lånen bär investeraren risken för att Emittenten inte kommer att kunna göra några betalningar under värdepappren i enlighet med dess villkor. Om Emittenten skulle bli insolvent finns en risk för att investerare förlorar hela eller delar av det investerade beloppet. Lånen utgör icke säkerställda och icke efterställda förpliktelser för Emittenten och är i förmånsrättsligt hänseende pari passu utan inbördes rangordning och åtminstone pari passu med Emittentens alla övriga nuvarande och framtida utestående icke säkerställda och icke efterställda förpliktelser. Lånen kan också bli föremål för skuldnedskrivning om Emittenten bli föremål för resolution enligt direktiv 2014/59/EU, så som det implementerats i Finland, och därmed skrivs ner eller ombildas till andra värdepapper (inklusive ordinarie aktier) om resolutionsmyndigheten anser att det är nödvändigt för att återställa Emittentens möjlighet till fortlevnad.
- (e) Lånen är fritt omsättningsbara enligt dess villkor. Grundprospektet sammanfattar dock vissa legala restriktioner vad gäller erbjudande och försäljning av Lånen i vissa jurisdiktioner.

Var kommer Värdepappren handlas?

Ansökan kommer göras för Lånen för att godkännas för upptagande till handel på Nasdaq Stockholm med effekt från 17 september 2026.

Vilka är de centrala riskerna som är specifika för Värdepappren?

Produktens komplexitet: avkastningsstrukturen för strukturerade Lån är ibland komplex och kan innehålla matematiska formler eller samband som för en investerare kan vara svåra att förstå och jämföra med andra investeringsalternativ. Förhållandet mellan risk och avkastning kan dessutom vara svårt att utvärdera.

Det kan komma att saknas en aktiv marknad för handel med Lånen: Lånen kommer att vara nya värdepapper som eventuellt inte kommer att spridas i någon större utsträckning och/eller inte vara noterade och, även om de skulle vara noterade, kan komma att sakna en aktiv marknad. Avsaknaden av en aktiv marknad kan resultera i begränsad likviditet i Lånen, med följden att investeraren kan behöva inneha Lån till dess att de löses in. Nordea har ingen skyldighet att köpa tillbaka eller upprätthålla en marknad för några Lån. Innehavare av Lån bör känna till att sekundärmarknaden för Lån och lån av den här typen kan vara illikvid bland annat på grund av de störningar och den volatilitet på de globala finansiella marknaderna som har förekommit under de senaste åren. Innehavare av Lån bör även vara medvetna om att inflation kan ha en negativ inverkan på de Låns värde (vilket, utan att utesluta andra Lån, innefattar kapitalskyddade Lån), inklusive fall då Lånen avkastning understiger inflationstakten(/-erna).

Referenstillgångarnas värdeutveckling: för strukturerade Lån är Innehavarnas rätt till avkastning och återbetalning av kapitalbeloppet, beroende av värdeutvecklingen för en eller flera underliggande tillgångar ("Referenstillgångar") och den gällande avkastningsstrukturen. Värdet på strukturerade Lån påverkas av värdet på Referenstillgångarna vid vissa tidpunkter under Lånens löptid, hur mycket priserna hos Referenstillgångarna varierar, förväntningarna angående den framtida volatiliteten, marknadsräntor och förväntad utdelning på Referenstillgångarna. Lånens värde kan komma att fluktuera och över- eller understiga priset under Lånens löptid. Där det är en hög nivå av ömsesidigt beroende mellan de individuella delarna av korgens innehåll kan en ändring i värdeutvecklingen hos korgens delar förstärka Lånens värdeutveckling. Dessutom kan en liten korg eller en ojämnt viktad korg innebära sårbarhet för ändringar i värdet hos vilken som helst av de specifika korgkomponenterna. Om enskilda komponenter i korgen i hög grad är beroende av varandra kan en ändring i värdeutvecklingen hos korgens delar förstärka Lånens värdeutveckling. Utöver exponeringen mot Referenstillgångar medför en investering i Lånen en risk för att efterföljande förändringar i marknadsräntan kan på ha en negativ påverkan på Lånens värde.

Valutafluktuationer: Växelkurserna för utländska valutor kan påverkas av komplexa politiska och ekonomiska faktorer, inklusive relativa inflationstakter, räntenivåer, betalningsbalansen mellan länder, storleken på staters budgetöverskott eller budgetunderskott och monetära, skattemässiga och/eller handelspolitiska policyer som följs av de relevanta valutornas stater. Valutafluktuationer kan påverka värdet eller nivån hos Referenstillgångarna på komplexa sätt. Om sådana valutafluktuationer får värdet eller nivån hos Referenstillgångarna att variera, så kan värdet eller nivån på Lånen minska. Om värdet eller nivån hos en eller flera Referenstillgångar är angivna i en valuta som är annan än valutan i vilken Lånen är emitterade, kan den som investerar i Lånen utsättas för en ökad risk hänförlig till växelkurser för utländska valutor. Historiska växelkurser för utländska valutor behöver inte nödvändigtvis utgöra en indikation beträffande framtida växelkurser.

Risker relaterade till störningar på marknaden och extraordinära händelser: Referenstillgångar kan påverkas av störningar på de marknader där de vanligen handlas eller av extraordinära händelser såsom avnotering, nationalisering, konkurs, likvidation eller utspädning eller andra händelser (såsom tillkännagivande eller betalning av efterutdelning) som påverkar den berörda Referenstillgången. Alla strukturerade Lån kan bli föremål för händelser såsom lagändringar eller ökade kostnader för riskhantering. Om det sker kan Emittenten ensidigt göra justeringar i tillgångarnas sammansättning och i beräkningen av avkastningen eller värdet på Lånen, eller ersätta en Referenstillgång med en annan Referenstillgång, utefter vad Emittenten finner lämpligt.

Aktier som Referenstillgångar: aktielänkade Lån är inte stödda eller främjade av emittenten av aktierna. Emittenten av aktierna har därför inte någon skyldighet att beakta intresset för dem som investerat i Lånen varför åtgärder tagna av en sådan emittent av aktier skulle kunna inverka negativt på Lånens marknadsvärde. Den som investerat i Lånen har inte rätt att få några utbetalningar eller andra utdelningar till vilka en direkt ägare av de underliggande aktierna annars skulle ha rätt.
