Risk factors associated with the Guarantor: The Guarantor is subject to the following key risks:

- JPMorgan Chase is a major, global financial services group and faces a variety of risks that are substantial and inherent in its businesses, and which may affect the Guarantor's ability to fulfil its obligations under the guarantee, including regulatory, legal and reputation risks, political and country risks, market and credit risks, liquidity and capital risks and operational, strategic, conduct and people risks. Failure to appropriately manage these risks could have a material adverse effect on JPMorgan Chase's results of operations and financial condition.
- JPMorgan Chase Bank, N.A. is a wholly-owned subsidiary of the JPMorgan Chase group. It is the principal bank subsidiary of the JPMorgan Chase group. As such, it will be subject to the risks of the JPMorgan Chase group including regulatory, legal and reputation risks, political and country risks, market and credit risks, liquidity and capital risks and operational, strategic, conduct and people risks, and affected by events which impact the JPMorgan Chase group.

What are the key risks that are specific to the Securities?

Risk factors associated with the Securities: The Securities are subject to the following key risks:

- **At maturity, the Securities do not provide for the full scheduled payment of the face value of the Securities:** Depending on the performance of each of the Underlying and the FX Rate, you may lose some or all of your investment.
- **Risks relating to certain features of the Securities:**
 - The inclusion of a leverage feature means that the Securities will be more speculative and riskier than otherwise, since smaller changes in the performance of the Underlying and/or FX Rate can reduce (or increase) the return on the Securities by more than in the absence of such feature. A small movement in the value of the Underlying and/or FX Rate can have a significant effect on the value of the Securities.
 - The amount payable on the Securities will be based on the arithmetic average of the applicable levels, prices, rates or other applicable values of the Underlying on specified averaging dates. If such level, price, rate or other applicable value of the Underlying dramatically surged on the last of such averaging dates or dramatically diminished on the last of the initial averaging dates, the amount payable on the Securities may be significantly less than it would have been had the amount payable been linked only to the applicable level, price, rate or other applicable value of the particular Underlying on that last averaging date.
 - The final redemption amount is determined based on the performance of the Underlying on the Averaging Dates and the FX Rate on the Final Valuation Date only (rather than in respect of multiple periods throughout the term of the Securities), and therefore investors in the Securities will not benefit from any movement in level of the Underlying and the FX Rate during the term of the Securities that is not reflected in the performance of the Underlying on the Averaging Dates and the FX Rate on the Final Valuation Date.
- **Risks relating to the Underlying and the FX Rate:**
 - Past performance of the Underlying and the FX Rate is not indicative of future performance or the range of, or trends or fluctuations in, the level, price or other value of such Underlying and the FX Rate that may occur in the future, and performance may be subject to unpredictable change over time. The Underlying and the FX Rate may perform differently from the historical performance and you may not realise the returns which you expect to receive from investing in the Securities. Investors will not have any legal or beneficial rights of ownership in the Underlying or the FX Rate, and no claim

against the index sponsor or any other third party in relation to the Underlying or the FX Rate; such parties have no obligation to act in investors' interests.

- The market value of and the return on the Securities depends on the performance of the Underlying and its components and other macroeconomic factors. The index sponsor (and the Issuer of the Securities) may be subject to regulatory changes regarding the publication and use of the Underlying during the life of the Securities which may negatively impact the performance of the Underlying. The Issuer and/or the Calculation Agent may adjust the terms of the Securities in respect of the Underlying referenced in order to comply with statutory requirements and such adjustments may affect the value of and return on the Securities and may even result in the early redemption of the Securities (the early redemption amount of which may be less than the initial investment amount or zero).
- The FX Rate is influenced by a wide variety of macroeconomic factors which may adversely affect the performance of the FX Rate and the value and return on the Securities. The FX Rate may also be affected by factors that are almost impossible to predict such as measures taken by governments and central banks, including imposition of regulatory controls or taxes or replacing, devaluing or revaluing a currency. Such factors could negatively influence the performance of the FX Rate which could in turn have a negative impact on the value of and return on the Securities.
- **No or limited liquidity:** The Securities may have no liquidity or the market for such Securities may be limited and this may adversely impact their value or your ability to dispose of them.
- **Secondary market value:** The market value of the Securities prior to maturity may be significantly lower than their original purchase price. Consequently, if you sell your Securities before their scheduled maturity (assuming you are able to), you may lose some of your original investment.
- **Early redemption:** The Securities may be redeemed prior to their scheduled maturity in certain extraordinary circumstances and in such case, the early redemption amount paid to investors may be less than their original investment. In such case, you may only be able to reinvest the proceeds on less favourable market terms compared to when the Securities were purchased.

JPMSP:s förmåga att utföra sina respektive skyldigheter enligt Värdepapperen kan påverkas av oförmåga eller underlåtenhet att prestera, i enlighet med sina respektive hedgningsarrangemang, hos sådana andra J.P. Risikfaktorer hänförliga till Garanten: Garanten är föremål för följande risker:

- JPMorgan Chase är en stor, global koncern för finansiella tjänster och står inför en rad olika risker som är väsentliga och inneboende i dess verksamheter, och som kan påverka Garantens förmåga att uppfylla sina skyldigheter enligt garantin, inklusive regulatoriska, juridiska och ryktesrisker, politiska och landsrisker, marknads- och kreditrisker, likviditets- och kapitalrisker samt operativa, strategiska, uppförande- och mänskliga risker. Underlåtenhet att hantera dessa risker på lämpligt sätt kan ha en väsentlig negativ inverkan på JPMorgan Chases resultat av verksamheten och finansiella ställning.
- JPMorgan Chase Bank, N.A. är ett helägt dotterföretag till JPMorgan Chase-koncernen. Det är det huvudsakliga bankdotterföretaget till JPMorgan Chase-koncernen. Som sådan kommer den att vara föremål för riskerna för JPMorgan Chase-koncernen, inklusive regulatoriska, juridiska och ryktesrisker, politiska och landsrisker, marknads- och kreditrisker, likviditets- och kapitalrisker och operativa, strategiska, uppförande- och mänskliga risker, och påverkas av händelser som påverkar JPMorgan Chase-koncernen.

Vilka nyckelrisker är specifika för Värdepapperen?

Risikfaktorer hänförliga till Värdepapperen: Värdepapperen är föremål för följande nyckelrisker:

- **Vid förfall tillhandahåller inte Värdepapperen fullständig planerad betalning av det nominella värdet för Värdepapperen:** Beroende på utvecklingen för var och en av den Underliggande och Valutakursen kan du förlora en del av eller hela av din investering.
- **Risker hänförliga till Värdepapperens specifika egenskaper:**
 - Inkluderandet av en hävstångsfunktion innebär att Värdepapperen kommer att vara mer spekulativa och mer riskfyllda än annars, eftersom mindre förändringar i utvecklingen för den Underliggande kan minska (eller öka) avkastningen på Värdepapperen mer än i frånvaro av en sådan funktion. En liten rörelse i värdet på den Underliggande kan ha en betydande effekt på värdet på Värdepapperen.
 - Beloppet som ska betalas under Värdepapperen kommer att baseras på det aritmetiska genomsnittet för tillämpliga nivåer, priser, kurser eller andra tillämpliga värden för den Underliggande på angivna genomsnittsdagar. Om en sådan nivå, pris, kurs eller annat tillämpligt värde för den Underliggande dramatiskt ökat på den sista av sådana genomsnittsdagar eller dramatiskt minskat på den sista av de initiala genomsnittsdagarna, kan det belopp som ska betalas under Värdepapperen vara betydligt mindre än det skulle ha varit om det betalningsbara beloppet endast hade kopplats till tillämplig nivå, pris, kurs eller annat tillämpligt värde för den givna Underliggande på den sista genomsnittsdagen.
 - Beloppet för slutlig inlösen fastställs baserat på utvecklingen för den Underliggande på Genomsnittsdagarna och Valutakursen på den Slutliga Värderingsdagen endast (snarare än med avseende på flera perioder under Värdepapperens löptid), och därför kommer investerare i Värdepapperen inte att dra nytta av någon förändring i nivån för den Underliggande och Valutakursen under Värdepapperens löptid som inte återspeglas i utvecklingen för den Underliggande på Genomsnittsdagarna och Valutakursen på den Slutliga Värderingsdagen.
- **Risker hänförliga till den Underliggande och Valutakursen:**
 - Historisk utveckling för den Underliggande indikerar inte framtida utveckling eller intervallet för eller trender för eller fluktuationer i, nivån, kursen eller annat värde för sådan Underliggande som kan komma att inträffa i framtiden, och utveckling kan bli föremål för oförutsägbara förändringar över tid. Den Underliggande kan utvecklas annorlunda än den historiska utvecklingen och du kanske inte kan få

realisera de avkastningar som du förväntar dig att från investeringen i Värdepapperen.

- Investerares kommer inte att ha några juridiska eller indirekta egendomsrättigheter i den Underliggande eller Valutakursen och inget krav mot indexsponsorn eller någon annan tredje part i förhållande till den Underliggande eller Valutakursen; sådana parter har ingen skyldighet att agera i investerarens intresse.
- Marknadsvärdet och avkastningen på Värdepapperen beror på utvecklingen för den Underliggande och dess komponenter och andra makroekonomiska faktorer. Indexsponsorn (och Emittenten av Värdepapperen) kan bli föremål för regulatoriska förändringar beträffande publicering och användning av den Underliggande under Värdepapperens löptid, vilket kan ha en negativ inverkan på utvecklingen för den Underliggande. Emittenten och/eller Beräkningsagenten kan justera villkoren för Värdepapperen med avseende på den relaterade Underliggande för att uppfylla lagstadgade krav och sådana justeringar kan påverka värdet på och avkastningen från Värdepapperen och kan till och med leda till förtida inlösen av Värdepapperen (vars inlösenbelopp kan vara mindre än det initiala investeringsbeloppet eller noll).
- Valutakursen påverkas av en mängd olika makroekonomiska faktorer som kan påverka utvecklingen för Valutakursen och värdet på och avkastningen från Värdepapperen. Valutakursen kan också påverkas av faktorer som i det närmaste är omöjliga att förutsäga, till exempel åtgärder som vidtas av regeringar och centralbanker, inklusive införande av regulatoriska kontroller eller skatter eller börser, devalvering eller omvärdering av en valuta. Sådana faktorer kan negativt påverka utvecklingen för Valutakursen som i sin tur kan ha en negativ inverkan på värdet på och avkastningen från Värdepapperen.
- **Ingen eller begränsad likviditet:** Värdepapperen kanske inte har någon likviditet eller så kan marknaden för sådana Värdepapper vara begränsad och detta kan negativt påverka dessas värde eller din möjlighet att avyttra dem.
- **Andrahandsmarknadsvärde:** Marknadsvärdet på Värdepapperen före förfall kan vara betydligt lägre än dessas ursprungliga inköpspris. Följaktligen, om du säljer dina Värdepapper innan planerat förfall (förutsatt att du kan), kan du förlora en del av din ursprungliga investering.
- **Förtida inlösen:** Värdepapperen kan lösas in före planerat förfall under vissa extraordinära omständigheter och i sådana fall kan det förtida inlösenbeloppet som betalas till investerare vara mindre än deras ursprungliga investering. I sådant fall kanske du bara kan återinvestera intäkterna på mindre gynnsamma marknadsvillkor jämfört med när Värdepapperen köptes.
