It is anticipated that the Interest Amount will be published by the Issuer on the website of the Central Bank of Ireland (www.centralbank.ie) and on the website of the Authorised Offeror (www.guarantum.se) on or around the Issue Date.

The redemption amount due on the maturity date will be determined in accordance with the redemption provisions as follows

Redemption

The redemption amount in respect of each calculation amount will be the performance-linked redemption amount determined in accordance with the put option provisions below.

Definitions relating to redemption:

Dates

The **final valuation dates** are 29 June 2023, 31 July 2023, 29 August 2023, 29 September 2023, 30 October 2023 and 29 November 2023 (subject to adjustment – see "*Disrupted Days, Market Disruptions Events and Adjustments*" below).

The **redemption strike date** is 29 November 2018 (subject to adjustment – see "*Disrupted Days, Market Disruptions Events and Adjustments*" below).

Definitions relating to the underlying(s) relevant for redemption, the performance of such underlying(s) and levels of such underlying(s)

A **redemption underlying** means the or each underlying specified as an underlying for the purpose of the redemption provisions in Element C.20 below.

The **final performance underlying(s)** or (**FPU**) is, as "weighted basket observation" applies and for the purposes of determining the performance-linked redemption amount determined in accordance with the put option provisions below, all of the redemption underlyings (as final performance is determined by reference to the weighted basket of all of the redemption underlyings)

The **final performance** shall be determined in accordance with the:

"weighted basket observation" provisions for the purpose of determining the performance-linked redemption amount determined in accordance with the put option provisions below, meaning that the final performance is, in the determination of the calculation agent, an amount expressed as a percentage equal to the weighted sum of the performance of each redemption underlying, determined for each such redemption underlying as such redemption underlying's final reference level less its redemption strike level, all divided by its redemption initial level, expressed as a formula:

$$\sum_{n=1}^n W_n \times \frac{\text{final reference level} - \text{redemption strike level}}{\text{redemption initial level}}$$

Such percentage is subject to a minimum percentage (floor) of -80 per cent. in respect of the performance-linked redemption amount determined in accordance with the put option provisions below.

W_n of each redemption underlying is minus one-third (-1/3) (therefore the redemption underlyings are equally weighted)

The **redemption strike level** for a redemption underlying is the redemption

initial level of such redemption underlying.

The **final reference level** means, in respect of a final valuation date or, as the case may be, final valuation dates and each redemption underlying:

for the purpose of determining the performance-linked redemption amount determined in accordance with the put option provisions below "arithmetic average closing level on final valuation dates", being the arithmetic average underlying closing level for such redemption underlying for the relevant final valuation dates.

The **redemption initial level** means, in respect of a final valuation date or, as the case may be, final valuation dates and each redemption underlying:

for the purpose of determining the performance-linked redemption amount determined in accordance with the put option provisions below "closing level on redemption strike date", being the underlying closing level for such redemption underlying for the redemption strike date

Definitions relating to the determination of the performance-linked redemption amount due.

The **performance-linked redemption amount determined in accordance with the "put option" provisions** means that the redemption amount will be a "put option" amount determined by the calculation agent to be the product of the calculation amount (CA) and the sum of 100% (being the **relevant percentage**) and the final performance of the final performance underlying(s) (FPU), expressed as a formula:

$$CA \times (1 + \text{final performance of FPU})$$

The calculation amount or CA is SEK 50,000.

Disrupted Days, Market Disruption Events and Adjustments

The terms and conditions of the Notes contain provisions, as applicable, relating to events affecting the relevant underlying(s), modification or cessation of the relevant underlying(s), settlement disruption and market disruption provisions and provisions relating to subsequent corrections of the level of an underlying and details of the consequences of such events. Such provisions may, where applicable permit the Issuer either to require the calculation agent to determine what adjustments should be made following the occurrence of the relevant event (which may include deferment of any required valuation or the substitution of another underlying and/or, in the case of an increased cost of hedging, adjustments to pass onto Noteholders such increased cost of hedging (including, but not limited to, reducing any amounts payable or deliverable in respect of the Notes to reflect any such increased costs) and/or, in the case of realisation disruption, payment in the relevant local currency rather than in the relevant specified currency, deduction of or payment by Noteholder(s) of amounts in respect of any applicable taxes, delay of payments or deliveries, determination of relevant exchange rates taking into consideration all available relevant information and/or (where legally permissible) procuring the physical delivery of any underlying(s) in lieu of cash settlement (or vice versa) and/or, in the case of mutual fund interests, adjustments to 'monetise' the mutual fund interest affected by the relevant adjustment event and adjust amounts payable under the Notes to account for such monetisation) or, where applicable to cancel the Notes and to pay an amount equal to the early redemption amount as specified in Element

SECTION D – RISKS

Element	Title	
D.2	Key risks regarding the Issuers	<p>There are certain factors that may affect CGMFL's ability to fulfil its obligations under the Notes issued by it, including that such ability is dependent on the group entities to which it on-lends and funds raised through the issue of the Notes performing their obligations in respect of such funding in a timely manner. In addition, such ability and CGML's ability to fulfil its obligations as guarantor in respect of Notes issued by CGMFL is dependent on economic conditions, credit, market and market liquidity risk, by competition, country risk, operational risk, fiscal and monetary policies adopted by relevant regulatory authorities, reputational and legal risks and certain regulatory considerations.</p>
D.3	Key risks regarding the Notes	<p>Investors should note that the Notes (including Notes that are expressed to redeem at par or above) are subject to the credit risk of CGMFL and CGML. Furthermore, the Notes may be sold, redeemed or repaid early, and if so, the price for which a Note may be sold, redeemed or repaid early may be less than the investor's initial investment. There are other certain factors which are material for the purpose of assessing the risks associated with investing in any issue of Notes, which include, without limitation, (i) risk of disruption to valuations, (ii) adjustment to the conditions, substitution of the relevant underlying(s) and/or early redemption following an adjustment event or an illegality, (iii) postponement of interest payments and/or minimum and/or maximum limits imposed on interest rates, (iv) cancellation or scaling back of public offers or the issue date being deferred, (v) hedging activities of the Issuer and/or any of its affiliates, (vi) conflicts of interest between the Issuer and/or any of its affiliates and holders of Notes, (vii) modification of the terms and conditions of Notes by majority votes binding all holders, (viii) discretions of the Issuer and Calculation Agent being exercised in a manner that affects the value of the Notes or results in early redemption, (ix) change in law, (x) payments being subject to withholding or other taxes, (xi) fees and commissions not being taken into account when determining secondary market prices of Notes, (xii) there being no secondary market, (xiii) market value of Notes being affected by various factors independent of the creditworthiness of CGMFL and CGML such as market conditions, interest and exchange rates and macro-economic and political conditions and (xiv) credit ratings not reflecting all risks.</p> <p>See also Element D.6 below</p>
D.6	Key risks regarding the Notes and risk warning	<p>INVESTORS MAY LOSE THEIR ENTIRE INVESTMENT OR PART OF IT AS THE CASE MAY BE. CGMFL DOES NOT REPRESENT THAT THE LIST BELOW IS COMPREHENSIVE. PROSPECTIVE INVESTORS SHOULD READ THE BASE PROSPECTUS IN ITS ENTIRETY AND FORM THEIR OWN CONCLUSIONS REGARDING CGMFL.</p> <p>An investment in Notes may entail significant risks and risks that are not associated with an investment in a debt instrument with a fixed principal amount and which bears interest at either a fixed rate or at a floating rate determined by reference to published interest rate references. The risks of a particular Note will depend on the terms of such Note, but may include, without limitation, the possibility of significant changes in the prices of the relevant Underlying(s). Such risks generally depend on factors over which none of the relevant Issuer and, where the relevant Issuer is CGMHI, the CGMHI Guarantor or where the relevant Issuer is CGMFL, the CGMFL Guarantor, has control and which cannot readily be foreseen, such as economic and political events and the supply of and demand for the relevant Underlying(s). In recent years, currency exchange rates and prices for</p>

		<p>various Underlying(s) have been highly volatile, and such volatility may be expected in the future. Fluctuations in any such rates or prices that have occurred in the past are not necessarily indicative, however, of fluctuations that may occur during the term of any Note. The risk of loss as a result of the linkage to the relevant Underlying(s) can be substantial. Investors should note that their investment in Notes, may expose them to payments and/or deliveries which is/are determined by reference to one or more values of security indices, inflation indices, commodity indices, commodities, shares, depositary receipts, exchange traded funds, mutual funds, currencies, warrants, proprietary indices (which may be linked or referenced to one or more asset classes), dividend futures contracts, interest rates or other bases of reference of formulae (the Underlying(s)), either directly or inversely, and for physically settled Notes this may result in the Notes being redeemable for certain assets.</p>

Element	Title	
E.2b	Use of proceeds	The net proceeds of the issue of the Notes by CGMFL will be used primarily to grant loans or other forms of funding to CGML and any entity belonging to the same group, and may be used to finance CGMFL itself.
E.3	Terms and conditions of the offer	<p>The Notes are the subject of a Non-exempt Offer, the terms and conditions of which are further detailed as set out below and in the applicable Final Terms.</p> <p>A Non-exempt Offer of the Notes may be made in Sweden (the Swedish Offer) during the period from (and including) 12 October 2018 to (and including) 22 November 2018. Such period may be shortened at the option of the Issuer. The Issuer reserves the right to cancel the Swedish Offer.</p> <p>The offer price is SEK50,000 per calculation amount. AVSNITT D – RISKER

Punkt	Rubrik	
D.2	Nyckelrisker avseende Emittenten	Det finns vissa faktorer som kan komma att påverka CGFML:s förmåga att uppfylla sina åtaganden rörande de utfärdade Obligationerna, inkluderande att sådan förmåga är beroende av att de entiteter inom gruppen, vilka det lånar ut till och finansierar genom utfärdandet av Obligationerna, i tid fullgör sina skyldigheter i förhållande till sådan finansiering. Därtill är sådan förmåga och CGML:s förmåga att uppfylla sina åtaganden som garantigivare av Obligationerna utfärdade av CGMFL beroende av ekonomiska förhållanden, kredit-, marknads- och likviditetsrisker, av konkurrens, risker förknippad med olika länder, operationella risker, skatt- och penningbestämmelser antagna av de relevanta regulatoriska myndigheterna, anseende och juridiska risker samt särskilda regulatoriska överväganden.
D.3	Nyckelrisker avseende Obligationerna	<p>Investerare bör notera att Obligationerna (inklusive Obligationer som uttryckligen ska inlösas till samma eller ett högre pris) är föremål för CGMFL:s och CGML:s kreditrisker. Dessutom kan Obligationerna säljas, lösas in eller återbetalas i förtid och om så sker kan priset på Obligationerna vara lägre än investerarens initiala investering. Det finns vissa andra faktorer som är väsentliga för att bedöma risken som associeras med en investering i Obligationerna, vilket inkluderar utan begränsning, (i) risken för avbrott i värderingen, (ii) justeringar av villkoren av utbytande av underliggande och/eller förtida inlösen till följd av en justeringshändelse eller olaglighet, (iii) senareläggande av räntebetalningar och/eller lägsta och/eller högsta gränser satta på räntesatser (iv) upphävande eller minskning av offentliga erbjudanden eller emissionsdagar som skjuts upp, (v) hedgning av Emittenten och/eller dess närstående bolag, (vi) intressekonflikt mellan Emittenten och/eller dess närstående bolag och aktieägarna till Obligationerna, (vii) förändringar i villkoren för Obligationerna genom majoritetsbeslut som binder alla aktieägare, (viii) beslut av Emittenten och Beräkningsagenten som påverkar värdet på Obligationerna eller resulterar i förtida inlösen, (ix) lagförändringar, (x) betalningar som är föremål för avdrag eller andra skatter, (xi) avgifter och provisioner som inte räknas in vid bedömningen av sekundärpriset på Obligationerna, (xii) att det inte finns någon sekundär marknad, (xiii) marknadsvärdet på Obligationerna som kan påverkas av olika faktorer oberoende av CGMFL and CGML:s kreditvärdighet och (xiv) kreditvärdighetsbetyg som inte reflekterar alla risker.</p> <p>Se även Punkt D.6 nedan.</p>
D.6	Nyckelrisker avseende Obligationerna och riskvarning	INVESTERARE KAN FÖRLORA HELA ELLER DELAR AV SITT INVESTERADE KAPITAL. CGMFL GARANTERAR INTE ATT LISTAN NEDAN ÄR UTTÖMMANDE. POTENTIELLA INVESTERARE BÖR LÄSA GRUNDPROSPEKTET I DESS HELHET OCH SKAPA EN EGEN SLUTSATS OM CGMFL.

Punkt	Rubrik	
		<p>En investering i Obligationer kan innebära betydande risker och risker som inte är förenade med en investering i en obligation med fast kapitalbelopp och som uppbär antingen fast eller rörlig ränta som bestäms genom referens till offentliggjorda räntesatser. Riskerna med en särskild Obligation beror på dess villkor, men kan inkludera, utan begränsningar, möjligheten till väsentlig förändring i priset av de relevanta Underliggande tillgångarna. Sådana risker beror allmänt på faktorer som ingen av de relevanta Emittenterna, då den relevanta emittenten är CGMHI, CGMHI:s Garantigivare eller då den relevanta emittenten är CGMFL, CGMFL:s Garantigivare, kan kontrollera eller förutse, såsom ekonomiska och politiska händelser och efterfrågan och tillgång av de relevanta Underliggande tillgångarna. Under senare år har valutakurser och priser på åtskilliga Underliggande tillgångar varit mycket rörliga och sådan rörlighet förväntas även i framtiden. Fluktuationer i kurser eller priser som inträffat tidigare behöver dock inte nödvändigtvis vara indikativa för fluktuationer som kan komma att inträffa under en Obligations löptid. Risken för förlust som ett resultat av kopplingen mellan de aktuella Underliggande tillgångarna kan vara betydande. Investerares bör notera att deras investering i Obligationerna kan exponera dem mot betalningar och/eller leveranser som bestäms med hänvisnings till en eller flera värden hos olika värdepappersindex, inflationsindex, tillgångsindex, tillgångsandelar, depositionsbevis, börshandlade fonder, fonder, valutor, warrant, ägandeindex (vilken kan vara kopplad eller refererad till en eller flera tillgångsklasser), terminskontrakt, räntor och andra referensvärden (Underliggande) antingen direkt eller omvänt, och för Obligationer som avvecklas fysiskt kan detta leda till att Obligationerna blir inlösenbara för vissa tillgångar.</p>
