

IMPORTANT NOTICE

In accessing the attached final terms (the "Final Terms") you agree to be bound by the following terms and conditions.

EU MiFID II product governance – Solely for the purposes of the manufacturer's product approval process, the target market assessment in respect of the Notes has led to the conclusion that: (i) the target market for the Notes is eligible counterparties, professional clients and retail clients, each as defined in Directive 2014/65/EU (as amended, "**MiFID II**"); (ii) all channels for distribution of the Notes to eligible counterparties and professional clients are appropriate; and (iii) the following channels for distribution of the Notes to retail clients are appropriate - investment advice, portfolio management, non-advised sales, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable. Any person subsequently offering, selling or recommending the Notes (a "distributor") should take into consideration the manufacturer's target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Notes (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels.

PROHIBITION OF SALES TO UK RETAIL INVESTORS – The Notes are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom ("**UK**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 ("**EUWA**"); (ii) a customer within the meaning of the provisions of the FSMA and any rules or regulations made under the Financial Services and Markets Act 2000 (as amended, the "**FSMA**") to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA. Consequently no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the "**UK PRIIPs Regulation**") for offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

The information contained in the Final Terms may be addressed to and/or targeted at persons who are residents of particular countries only as specified in the Final Terms and/or in the Base Prospectus (as defined in the Final Terms) and is not intended for use and should not be relied upon by any person outside those countries and/or to whom the offer contained in the Final Terms is not addressed. **Prior to relying on the information contained in the Final Terms, you must ascertain from the Final Terms and/or the Base Prospectus whether or not you are an intended addressee of the information contained therein.**

Neither the Final Terms nor the Base Prospectus constitutes an offer to sell or the solicitation of an offer to buy securities in the United States or in any other jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration, exemption from registration or qualification under the securities law of any such jurisdiction.

The securities described in the Final Terms and the Base Prospectus have not been, and will not be, registered under the U.S. Securities Act of 1933, as amended (the "**Securities Act**") and may not be offered or sold directly or indirectly within the United States or to, or for the account or benefit of, U.S. persons or to persons within the United States of America (as such terms are defined in Regulation S under the Securities Act ("**Regulation S**")). The securities described in the Final Terms will only be offered in offshore transactions to non-U.S. persons in reliance upon Regulation S.

What are the Key Risks Specific to the Issuer?

The global coronavirus outbreak, which has negatively impacted the economies exposed to the outbreak, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations and adversely affect the Nordea Group's ability to access capital and liquidity: The outbreak of COVID 19 (also commonly referred to as the "coronavirus") spread globally in the first half of 2020 and has disrupted various markets and has resulted in significant uncertainty about the development of the economies affected by the outbreak both in Europe and elsewhere. The majority of the Nordea Group's operations are concentrated in the Nordic countries that have been, and are expected to continue to be, exposed to the coronavirus outbreak in a similar manner as a number of other European countries. The Nordea Group has been, and may continue to be, affected by the coronavirus outbreak through its direct and indirect impact on the customers, counterparties, employees and other stakeholders of the Nordea Group, both in the Nordic countries and elsewhere, as a result of, among others, public health measures, such as business closings and restrictions on travel and gatherings. There can also be no assurances that the adverse impact of the coronavirus outbreak will not lead to a tightening of liquidity conditions or funding uncertainty, or adversely affect the credit ratings assigned to Nordea or its subsidiaries. New regulatory requirements may also be introduced in the future to address any liquidity concerns or

other adverse effects the coronavirus outbreak may have on the financial sector, and financial institutions, such as the Nordea Group, could also become subject to related heightened supervisory demands. Any future adverse consequences related to the coronavirus outbreak not yet known, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations and adversely affect the Nordea Group's ability to, among others, meet its financial targets or access capital and liquidity on financial terms acceptable to the Nordea Group.

Negative economic developments and conditions in the markets in which the Nordea Group operates can adversely affect the Nordea Group's business and results of operations: The Nordea Group's performance is significantly influenced by the general economic conditions in the Nordic markets (Denmark, Finland, Norway and Sweden). Development of the economic conditions in other markets where the Nordea Group currently operates can also affect the Nordea Group's performance. Economic developments have affected and may continue to affect the Nordea Group's business in a number of ways, including, among others, the income, wealth, liquidity, business and/or financial condition of the Nordea Group's customers, which, in turn, could further reduce the Nordea Group's credit quality and demand for the Nordea Group's financial products and services.

Deterioration in counterparties' credit quality may affect the Nordea Group's financial performance: Risks arising from changes in credit quality and the recoverability of loans and amounts due from counterparties are inherent in a wide range of the Nordea Group's businesses. The Nordea Group makes provisions for loan losses in accordance with IFRS. However, the provisions made are based on available information, estimates and assumptions and are subject to uncertainty, and there can be no assurances that the provisions will be sufficient to cover the amount of loan losses as they occur. Adverse changes in the credit quality of the Nordea Group's borrowers and counterparties or a decrease in collateral values, are likely to affect the recoverability and value of the Nordea Group's assets and require an increase in the Nordea Group's individual provisions and potentially in collective provisions for impaired loans, which in turn would adversely affect the Nordea Group's financial performance. In particular, the Nordea Group's exposure to corporate customers is subject to adverse changes in credit quality should the economic environment in the Nordea Group's markets deteriorate.

The Nordea Group is exposed to market price risk: The Nordea Group's customer-driven trading operations and its treasury operations (where the Nordea Group holds investment and liquidity portfolios for its own account) are the key contributors to market price risk in the Nordea Group. To the extent volatile market conditions persist or recur, the fair value of the Nordea Group's bond, derivative and structured credit portfolios, as well as other classes, could fall more than estimated, and therefore cause the Nordea Group to record write-downs. In addition, because the Nordea Group's trading and investment income depends to a great extent on the performance of financial markets, volatile market conditions could result in a significant decline in the Nordea Group's trading and investment income, or result in a trading loss, which, in turn, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations.

The Nordea Group is subject to extensive regulation that is subject to change: Companies active in the financial services industry, including the Nordea Group, operate under an extensive regulatory regime. The Nordea Group is subject to laws and regulations, administrative actions and policies as well as related oversight from the local regulators in each of the jurisdictions in which it has operations. The Nordea Group is also under the direct supervision and subject to the regulations of the European Central Bank, as a result of the size of its assets. Regulatory developments or any other requirements, restrictions, limitations on the operations of financial institutions and costs involved, or unexpected requirements under, or uncertainty with respect to, the regulatory framework to be applied to the Nordea Group, could have a material adverse effect on the Nordea Group's business, financial condition and results of operations.

Liquidity risk is inherent in the Nordea Group's operations: Liquidity risk is the risk that the Nordea Group will be unable to meet its obligations as they fall due or meet its liquidity commitments only at an increased cost. A substantial portion of the Nordea Group's liquidity and funding requirements is met through reliance on customer deposits, as well as ongoing access to wholesale funding markets, including issuance of long-term debt market instruments, such as covered bonds. The volume of these funding sources, in particular long-term funding, may be constrained during periods of liquidity stress. Turbulence in the global financial markets and economy may adversely affect the Nordea Group's liquidity and the willingness of certain counterparties and

customers to do business with the Nordea Group, which may result in a material adverse effect on the Nordea Group's business and results of operations.

Operational risks, including risks in connection with investment advice, may affect the Nordea Group's business: The Nordea Group's business operations are dependent on the ability to process a large number of complex transactions across different markets in many currencies. The Nordea Group's operations are carried out through a number of entities. Operational losses, including monetary damages, reputational damage, costs, and direct and indirect financial losses and/or write-downs, may result from many different sources. As a part of its banking and asset management activities, the Nordea Group also provides its customers with investment advice, access to internally as well as externally managed funds and serves as custodian of third party funds. In the event of losses incurred by its customers due to investment advice from the Nordea Group, or the misconduct or fraudulent actions of external fund managers, the Nordea Group's customers may seek compensation from the Nordea Group. Although the Nordea Group has implemented risk controls and taken other actions to mitigate exposures and/or losses, there can be no assurances that such procedures will be effective in controlling each of the operational risks faced by the Nordea Group.

3. Key Information on the Securities

What are the Main Features of the Securities?

- (a) The Notes are Coupon Bearing Notes - Autocallable in Registered Form bearing ISIN SE0020849172.
- (b) The Notes are issued in SEK in denominations of SEK 10,000. The total nominal amount of the Notes will be specified in the Final Terms Confirmation Announcement following completion of the Offer Period. The Notes mature in January 2029.
- (c) ***'Worst of' Autocallable:*** The return of the Notes depends on the performance of the worst performing Reference Asset during the lifetime of the investment.

If, on a valuation date, all Reference Assets are at or above the coupon barrier, a coupon will be paid. If the coupon type of the Notes is Memory, a coupon will be paid for all preceding periods for which a coupon has not been paid.

If, on an observation date, all Reference Assets are at or above the call barrier, the Notes will redeem early and the nominal amount will be paid on the early redemption date immediately following the observation date.

If, on an observation date, the worst performing Reference Asset is below the call barrier, the Notes will not redeem and the maturity will extend at least to the next early redemption date. On the last observation date there are three possible scenarios:

1. All Reference Assets are at or above the coupon barrier. The Notes will then pay the nominal amount plus a coupon on the redemption date.
2. The worst performing Reference Asset is below the coupon barrier, but at or above the risk barrier. The Notes will then pay the nominal amount on the redemption date.
3. The worst performing Reference Asset is below the risk barrier. The Notes will then pay the nominal amount, as reduced by the negative performance of the worst performing Reference Asset, on the redemption date. This implies that investors in the Notes may not get the nominal amount back and in worst case could lose all of their investments.

- (d) By investing in the Notes, an investor will be assuming the risk that the Issuer will not be able to make payments on the securities in accordance with their terms. On an insolvency of the Issuer, there is a risk that the investors may lose some or all of their investment. The Notes constitute unsecured and unsubordinated obligations of the Issuer and rank *pari passu* without any preference among themselves and at least *pari passu* with all other outstanding unsecured and unsubordinated obligations of the Issuer, present and future. The Notes could also be subject to the bail-in power in the event of a resolution of the Issuer under directive 2014/59/EU, as implemented in Finland, and

may be written down or converted into other securities (including ordinary shares) if the resolution authority determines that this is necessary in order to restore the viability of the Issuer.

- (e) The Notes are freely transferable by their terms, although the Base Prospectus summarises certain legal restriction on the offers and sales of Notes in certain jurisdictions.

Where will the Securities be Traded?

Application will be made for the Notes to be admitted to trading on Nasdaq Stockholm effective as of 25 January 2024.

What are the Key Risks that are Specific to the Securities?

Complexity of the product: the performance structure for structured Notes is sometimes complex and may contain mathematical formulae or relationships which, for an investor, may be difficult to understand and compare with other investment alternatives. In addition, the relationship between yield and risk may be difficult to assess.

Automatic early redemption: the Notes will be automatically redeemed prior to their scheduled maturity date if certain conditions are met. In some circumstances, this may result in a loss of part or all an investor's future coupon or interest payments in respect of the Notes. Because certain costs and expenses are deducted from the issue price, an early redemption of the Notes may also result in proportionately higher expenses.

Notes are not principal protected: the Notes are not principal protected and as a result an investor may lose all or part of the invested amount.

There may be no active trading market for the Notes: the Notes will be new securities which may not be widely distributed and/or may be unlisted and, even if listed, may not have an active trading market. The lack of an active trading market may result in reduced liquidity for the Notes, with the result that the investor may have to hold such Notes until they are redeemed. Nordea is under no obligation to buy back or make a market in any Notes. Noteholders should be aware that the secondary market for the Notes and instruments of this kind may be illiquid due to, among other things, the disruptions and volatility in the global financial markets that have continued through recent years. Noteholders should also be aware that inflation could have an adverse effect on the value of the relevant Notes (including, without limitation, capital protected Notes), including where the return on the Notes is below the level of the relevant inflation rate(s).

Performance of the Reference Assets: with structured Notes, the Noteholder's right to yield and repayment of principal depends on the performance of one or more underlying assets (the "Reference Assets") and the performance structure. The value of the Notes may be affected by the value of the Reference Assets at specific points during the term of the relevant Notes, the intensity of the price fluctuations of the Reference Asset(s), expectations regarding future volatility, market interest rates and expected distributions on the Reference Asset(s). The value of Notes can fluctuate above or below their issue price during the lifetime of such Notes. Because the Notes have a "worst of" feature, the Notes will produce results that will be dependent on the performance of a single Reference Asset and may be very different to the performance of the basket as a whole. In addition to exposure to the Reference Assets, an investment in Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of the Notes.

Currency fluctuations: foreign exchange rates may be affected by complex political and economic factors, including relative rates of inflation, interest rate levels, the balance of payments between countries, the extent of any governmental surplus or deficit and the monetary, fiscal and/or trade policies pursued by the governments of the relevant currencies. Currency fluctuations may affect the value or level of the Reference Assets in complex ways. If such currency fluctuations cause the value or level of the Reference Assets to vary, the value or level of the Notes may fall. If the value or level of one or more Reference Asset(s) is denominated in a currency that is different from the currency of the Notes, investors in the Notes may be subject to increased foreign exchange risk. Previous foreign exchange rates are not necessarily indicative of future foreign exchange rates.

Risks relating to market disruption and extraordinary events: Reference Assets may be affected by disruption to their normal trading markets, or extraordinary events such as delisting, nationalisation,

bankruptcy, liquidation or dilutive events affecting the relevant Reference Asset. For all structured Notes, events such as changes in the law or increased costs for risk management may arise. If so, the Issuer may, at its sole discretion, make any adjustments in the composition of the assets and the calculation of the yield or value of Notes or replace one Reference Asset with another Reference Asset, as the Issuer deems necessary.

Indices as Reference Assets: an investor in the Notes may receive a lower payment upon redemption of the Notes than an investor would have received if he or she had invested directly in the assets that comprise the index. The sponsor of any index can add, delete, substitute components or make methodological changes that could affect the level of such index and hence the return that is payable to investors in the Notes.

Who is the Offeror and/or the Person Asking for Admission to Trading?

The offeror in respect of the Notes and the person requesting the admission of the Notes to trading is the Issuer. The Notes may also be offered by Garantum Fondkommission Aktiebolag whom the Issuer has appointed as Authorised Offeror's in respect of the Notes.

Authorised Offeror	Domicile and Country of Incorporation	Legal Form	Law under which it Operates
Garantum Fondkommission Aktiebolag	The Authorised Offeror is incorporated under the laws of Sweden	Private limited liability company	Swedish Law

Why is this Prospectus Summary Being Produced?

- a) The Offer is being made to provide funding for the Issuer and offer investors a return linked to the performance of the Reference Assets. The net proceeds of the issue of the Notes will be used for the general banking and other corporate purposes of the Issuer and the Nordea Group.
- b) The offer of the Notes is not underwritten.
- c) Authorised Offerors and other third party distributors may be paid fees in relation to the issue of the Notes. Save for the foregoing, so far as the Issuer is aware, no person involved in the issue of the Notes has an interest material to the offer.

Vad är de centrala riskerna specifika för Emittenten?

Det globala coronavirusutbrottet har påverkat de ekonomier som har utsatts för det negativt och skulle kunna ha en väsentlig negativ inverkan på Nordeakoncernens verksamhet, finansiella ställning och rörelseresultat samt inverka negativt på Nordeakoncernens tillgång till likviditet och till kapitalmarknaden: Utbrottet av COVID-19 (vilket ofta refereras till som "coronaviruset") spred sig globalt under första halvan av 2020 och har orsakat störningar på flera marknader liksom stor osäkerhet gällande utvecklingen i de ekonomier som har drabbats av utbrottet, både inom Europa och på andra platser. Merparten av Nordeakoncernens verksamhet är lokaliserad i de nordiska länderna,

vilka har utsatts för och förväntas fortsätta utsättas för coronavirusutbrottet på ett liknande sätt som ett flertal andra europeiska länder. Som ett resultat bland annat av åtgärder för att främja folkhälsan, såsom att verksamheter stängs ned och att restriktioner avseende resande och folksamlingar införs, har Nordeakoncernen påverkats och kan komma att fortsätta påverkas av coronavirusutbrottet genom dess direkta och indirekta inverkan på kunder, motparter, anställda och andra intressenter, såväl i de nordiska länderna som på andra platser. Det är inte heller säkert att coronavirusutbrottets negativa inverkan inte leder till en åtstramning av likviditetsförhållanden eller osäkerhet kring finansiering, eller att det har en negativ inverkan på Nordeas eller dess dotterbolags kreditbetyg. I framtiden kan även nya regulatoriska krav komma att införas för att adressera eventuella likviditetsproblem eller liknande negativa följder som coronavirusutbrottet kan komma att ha på den finansiella sektorn. Vidare kan finansiella institutioner, såsom Nordeakoncernen, komma att bli föremål för därtill relaterade ökade tillsynskrav. Eventuella framtida negativa följder kopplade till coronavirusutbrottet som ännu inte är kända skulle kunna ha en väsentlig negativ inverkan på Nordeakoncernens verksamhet, finansiella ställning och rörelseresultat samt inverka negativt bland annat på Nordeakoncernens tillgång till likviditet och till kapitalmarknaden på villkor som är godtagbara för Nordeakoncernen.

Negativ ekonomisk utveckling och förhållanden på marknaden på vilken Nordeakoncernen verkar kan ha en negativ inverkan på Nordeakoncernens verksamhet och rörelseresultat: Nordeakoncernens resultat påverkas i hög grad av generella ekonomiska förhållanden på de nordiska marknaderna (Danmark, Finland, Norge och Sverige). Utvecklingen av de ekonomiska förhållandena på andra marknader där Nordeakoncernen för tillfället verkar kan också påverka Nordeakoncernens resultat. Ekonomisk utveckling har påverkat, och kan komma att fortsätta påverka Nordeakoncernens verksamhet på flera sätt, bland annat Nordeakoncernens kunders intäkter, tillgångar, likviditet, verksamhet och/eller finansiell status, vilket i sin tur kan försämra Nordeakoncernens kreditvärdighet samt efterfrågan på Nordeakoncernens finansiella produkter och tjänster.

Försämring av motparters kreditvärdighet kan påverka Nordeakoncernens finansiella resultat: Risker i samband med förändringar av kreditvärdigheten hos, och möjligheten till återbetalning av lån och förfallna belopp från, motparter gäller för stora delar av Nordeakoncernens verksamheter. Nordeakoncernen gör avsättningar för kreditförluster i enlighet med IFRS. Avsättningarna är dock baserade på tillgänglig information, uppskattningar och antaganden och är föremål för osäkerhet, och det är inte säkert att avsättningarna kommer vara tillräckliga för att täcka kreditförluster när de väl uppstår. Negativa förändringar av Nordeakoncernens låntagares och motparters kreditvärdighet, eller en försämring av värdet på säkerheter påverkar sannolikt möjligheten till återbetalning och värdet på Nordeakoncernens tillgångar och kräver sannolikt en ökning av Nordeakoncernens individuella reserveringar och möjligen även av modellbaserade reserveringar för osäkra lånefordringar, vilket i sin tur skulle ha en negativ inverkan på Nordeakoncernens finansiella resultat. Särskilt Nordeakoncernens exponering mot företagskunder är föremål för försämrad kreditvärdighet för det fall ekonomin på Nordeakoncernens marknader försämras.

Nordeakoncernen är utsatt för marknadspriserisk: Nordeakoncernens kunddrivna värdepappershandel och treasury-funktion (där Nordeakoncernen håller investerings- och likviditetsportföljer för egen räkning) är de största bidragande faktorerna till marknadspriserisk i Nordeakoncernen. I den utsträckning volatila marknadsförhållanden håller i sig eller återkommer, kan värdet på Nordeakoncernens obligations-, derivat- och strukturerade kreditportföljer, likväl som andra typer av instrument, minska mer än beräknat, och därför medföra nedskrivningar. Utöver det kan volatila marknadsförhållanden, på grund av att Nordeakoncernens handels- och investeringsintäkter till stor del är beroende av förhållandena på de finansiella marknaderna, resultera i en avsevärd nedgång i Nordeakoncernens handels- och investeringsintäkter, eller resultera i en handelsförlust, vilket i sin tur kan ha en väsentlig negativ inverkan på Nordeakoncernens verksamhet, finansiella ställning och verksamhetsresultat.

Nordeakoncernen är föremål för omfattande regelverk som är föremål för förändringar: Alla bolag verksamma inom den finansiella sektorn, inklusive Nordeakoncernen, bedriver sin verksamhet under omfattande regulatoriska regelverk. Nordeakoncernen är föremål för tillsyn och måste följa ett stort antal lagar och regler, administrativa påbud och policys i de olika jurisdiktioner som koncernen verkar inom. På grund av storleken på Nordeakoncernens tillgångar står den också under direkt tillsyn av Europeiska Centralbanken och är föremål för dess regelverk. Regulatoriska förändringar och andra krav, restriktioner och begränsningar vad gäller finansiella instituts verksamhet och kostnader hänförliga därtill, eller oväntade krav under, eller osäkerhet kring, det regulatoriska

ramverk som Nordeakoncernen träffas av, kan ha en väsentlig negativ inverkan på Nordeakoncernens verksamhet, finansiella ställning och verksamhetsresultat.

Det finns en inneboende likviditetsrisk i Nordeakoncernens verksamhet: Likviditetsrisk är risken för att Nordeakoncernen inte ska kunna betala sina skulder när de förfaller eller nå upp till likviditetsåtaganden endast till en högre kostnad. En stor del av Nordeakoncernens likviditets- och finansieringskrav uppfylls genom insättningar från kunder, samt kontinuerlig tillgång till kapitalmarknaderna, bland annat utfärdandet av långfristiga skuldebrev, t.ex. säkerställda obligationer. Storleken på dessa finansieringskällor, särskilt den långfristiga finansieringen, kan vara begränsad under perioder med begränsad likviditet. Oroligheter på de globala finansmarknaderna och ekonomin kan negativt påverka Nordeakoncernens likviditet och vissa motparter och kunders benägenhet att göra affärer med Nordeakoncernen, vilket kan få en väsentlig negativ effekt på Nordeakoncernens verksamhet och verksamhetsresultat.

Operationella risker, inklusive risker i samband med investeringsrådgivning, kan påverka Nordeakoncernens verksamhet: För att Nordeakoncernens verksamhet ska fungera måste koncernen kunna genomföra ett stort antal komplexa transaktioner på olika marknader i många valutor. Nordeakoncernen bedriver sin verksamhet genom flera olika bolag. Verksamhetsförluster, inklusive skadestånd, försämrat rykte, kostnader, direkta och indirekta ekonomiska förluster och/eller nedskrivningar kan uppstå av flera olika orsaker. Som en del av bankverksamheten och tillgångsförvaltningen erbjuder Nordeakoncernen sina kunder investeringsrådgivning, tillgång till internt såväl som externt förvaltade fonder samt agerar förvaringsinstitut för fonder som förvaltas av tredje part. För det fall förluster uppstår hos kunder som fått investeringsrådgivning från Nordeakoncernen, alternativt på grund av försummelse eller bedrägliga handlingar av externa fondförvaltare, kan Nordeakoncernen krävas på ersättning. Trots att Nordeakoncernen har implementerat riskkontroller och vidtagit andra åtgärder för att minska exponeringen och/eller förlusterna, finns inga garantier för att åtagandena kommer att vara effektiva i att hantera de olika verksamhetsrisker som Nordeakoncernen står inför.

3. Central information om Värdepappren

Vad är värdepapprens centrala egenskaper?

- (a) Lånen är Aktielänkade lån i registrerad form med ISIN SE0020849172.
- (b) Lånen är utgivna i SEK med denominering 10 000 SEK. Det totala nominella beloppet för Lånen kommer att specificeras i Bekräftelsen av de Slutliga Villkoren som presenteras efter att Erbjudandeperioden avslutats. Lånen förfaller i januari 2029.
- (c) **'Worst of' Autocallable:** Lånens avkastning bestäms av värdeutvecklingen av den sämst presterande Referenstillgången under investeringens löptid.

Om samtliga Referenstillgångar på en värderingsdag är lika med eller överstiger avkastningsnivån kommer Lånen betala en kupong. Om Lånens kupongtyp är Memory kommer en kupong betalas för samtliga föregående perioder för vilka en kupong inte har betalats.

Om samtliga Referenstillgångar på en observationsdag är lika med eller överstiger inlösenivån kommer Lånen återbetalas i förtid och det nominella beloppet kommer att betalas vid den förtida återbetalningsdag som följer närmast efter observationsdagen.

Om den sämst presterande Referenstillgången på en observationsdag understiger inlösenivån kommer Lånen inte återbetalas och perioden till förfallodagen kommer förlängas åtminstone till nästkommande förtida återbetalningsdag. På den sista observationsdagen finns det tre möjliga utfall:

1. Samtliga Referenstillgångar är lika med eller överstiger avkastningsnivån. Lånen kommer i sådana fall betala det nominella beloppet plus en kupong vid återbetalningsdagen.
2. Den sämst presterande Referenstillgången understiger avkastningsnivån, men är lika med eller överstiger risknivån. Lånen kommer i sådana fall betala det nominella beloppet på återbetalningsdagen.

3. Den sämst presterande Referenstillgången understiger risknivån. Lånen kommer i sådana fall betala det nominella beloppet, som minskas med Den sämst presterande Referenstillgångens negativa värdeförändring på återbetalningsdagen. Detta innebär att den som investerar i lånen kan komma att inte få tillbaka hela det nominella beloppet, och i värsta fall kan hela det investerade beloppet gå förlorat.

- (d) Genom att investera i Lånen bär investeraren risken för att Emittenten inte kommer att kunna göra några betalningar under värdepappren i enlighet med dess villkor. Om Emittenten skulle bli insolvent finns en risk för att investerare förlorar hela eller delar av det investerade beloppet. Lånen utgör icke säkerställda och icke efterställda förpliktelser för Emittenten och är i förmånsrättsligt hänseende pari passu utan inbördes rangordning och åtminstone pari passu med Emittentens alla övriga nuvarande och framtida utestående icke säkerställda och icke efterställda förpliktelser. Lånen kan också bli föremål för skuldnedskrivning om Emittenten bli föremål för resolution enligt direktiv 2014/59/EU, så som det implementerats i Finland, och därmed skrivs ner eller ombildas till andra värdepapper (inklusive ordinarie aktier) om resolutionsmyndigheten anser att det är nödvändigt för att återställa Emittentens möjlighet till fortlevnad.
- (e) Lånen är fritt omsättningsbara enligt dess villkor. Grundprospektet sammanfattar dock vissa legala restriktioner vad gäller erbjudande och försäljning av Lånen i vissa jurisdiktioner.

Var kommer Värdepappren handlas?

Ansökan kommer göras för Lånen för att godkännas för upptagande till handel på Nasdaq Stockholm med effekt från 25 januari 2024.

Vilka är de centrala riskerna som är specifika för Värdepappren?

Produktens komplexitet: avkastningsstrukturen för strukturerade Lån är ibland komplex och kan innehålla matematiska formler eller samband som för en investerare kan vara svåra att förstå och jämföra med andra investeringsalternativ. Förhållandet mellan risk och avkastning kan dessutom vara svårt att utvärdera.

Automatisk förtida inlösen: Lånen kan bli föremål för automatisk inlösen innan dess egentliga förfalldatum om vissa förutsättningar är uppfyllda. I en del fall kan detta resultera i en förlust av hela eller delar av en investerarens framtida avkastning eller räntebetalningar. Eftersom vissa avgifter och kostnader dras av från emissionspriset, kan ett förtida inlösen av Lånen leda till i proportionsmässigt högre kostnader.

Lånens nominella belopp är inte kapitalskyddade: lånen nominella belopp är inte kapitalskyddade och som följd kan en investerare förlora delar av eller hela det investerade beloppet.

Det kan komma att saknas en aktiv marknad för handel med Lånen: Lånen kommer att vara nya värdepapper som eventuellt inte kommer att spridas i någon större utsträckning och/eller inte vara noterade och, även om de skulle vara noterade, kan komma att sakna en aktiv marknad. Avsaknaden av en aktiv marknad kan resultera i begränsad likviditet i Lånen, med följden att investeraren kan behöva inneha Lån till dess att de löses in. Nordea har ingen skyldighet att köpa tillbaka eller upprätthålla en marknad för några Lån. Innehavare av Lån bör känna till att sekundärmarknaden för Lån och lån av den här typen kan vara illikvid bland annat på grund av de störningar och den volatilitet på de globala finansiella marknaderna som har förekommit under de senaste åren. Innehavare av Lån bör även vara medvetna om att inflation kan ha en negativ inverkan på de Låns värde (vilket, utan att utesluta andra Lån, innefattar kapitalskyddade Lån), inklusive fall då Lånen avkastning understiger inflationstakten(/-erna).

Referenstillgångarnas värdeutveckling: för strukturerade Lån är Innehavarnas rätt till avkastning och återbetalning av kapitalbeloppet, beroende av värdeutvecklingen för en eller flera underliggande tillgångar ("Referenstillgångar") och den gällande avkastningsstrukturen. Värdet på strukturerade Lån påverkas av värdet på Referenstillgångarna vid vissa tidpunkter under Lånens löptid, hur mycket priserna hos Referenstillgångarna varierar, förväntningarna angående den framtida volatiliteten, marknadsräntor och förväntad utdelning på Referenstillgångarna. Lånens värde kan komma att fluktuera och över- eller understiga priset under Lånens löptid. Varje beräkning eller värde som berör en korg med "worst of"-inslag kan innebära resultat som skiljer sig mycket från dem som tar hänsyn till korgens

värdeutveckling i dess helhet. Om enskilda komponenter i korgen i hög grad är beroende av varandra kan en ändring i värdeutvecklingen hos korgens delar förstärka Lånens värdeutveckling. Utöver exponeringen mot Referenstillgångar medför en investering i Lånen en risk för att efterföljande förändringar i marknadsräntan kan på ha en negativ påverkan på Lånens värde.

Valutafluktuationer: Växelkurserna för utländska valutor kan påverkas av komplexa politiska och ekonomiska faktorer, inklusive relativa inflationstakter, räntenivåer, betalningsbalansen mellan länder, storleken på staters budgetöverskott eller budgetunderskott och monetära, skattemässiga och/eller handelspolitiska policyer som följs av de relevanta valutornas stater. Valutafluktuationer kan påverka värdet eller nivån hos Referenstillgångarna på komplexa sätt. Om sådana valutafluktuationer får värdet eller nivån hos Referenstillgångarna att variera, så kan värdet eller nivån på Lånen minska. Om värdet eller nivån hos en eller flera Referenstillgångar är angivna i en valuta som är annan än valutan i vilken Lånen är emitterade, kan den som investerar i Lånen utsättas för en ökad risk hänförlig till växelkurser för utländska valutor. Historiska växelkurser för utländska valutor behöver inte nödvändigtvis utgöra en indikation beträffande framtida växelkurser.

Risker relaterade till störningar på marknaden och extraordinära händelser: Referenstillgångar kan påverkas av störningar på de marknader där de vanligen handlas eller av extraordinära händelser såsom avnotering, nationalisering, konkurs, likvidation eller utspädning av den berörda Referenstillgången. Alla strukturerade Lån kan bli föremål för händelser såsom lagändringar eller ökade kostnader för riskhantering. Om det sker kan Emittenten ensidigt göra justeringar i tillgångarnas sammansättning och i beräkningen av avkastningen eller värdet på Lånen, eller ersätta en Referenstillgång med en annan Referenstillgång, utefter vad Emittenten finner lämpligt.

Index som Referenstillgångar: en investerare i Lån som baserar sig på index som Referenstillgångar kan få lägre betalning vid inlösen av sådana Lån än vad investeraren hade fått om han eller hon hade investerat direkt i de tillgångar som utgör indexet. Sponsorn av ett index kan lägga till, ta bort eller ersätta komponenter eller göra metodändringar som kan påverka nivån på sådant index och därmed den avkastning som skall betalas till investerare i Lånen.
