exchange, or subject any officer, director or employee of the Issuer or any affiliate of the Issuer to personal liability, where such private placements are conducted in compliance with the applicable laws of the relevant jurisdiction thereof.

9. **UNITED STATES TAX CONSIDERATIONS**

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Certificates, the Certificates will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Certificates for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Certificates.

EXAMPLES

THE EXAMPLES PRESENTED BELOW ARE FOR ILLUSTRATIVE PURPOSES ONLY.

For the purposes of each Example:

- (i) in respect of each Underlying Asset, the Autocall Level is 75 per cent. (75%) of the Asset Initial Price of such Underlying Asset, the Trigger Level is 75 per cent. (75%) of the Asset Initial Price of such Underlying Asset, and the Barrier Level is 50 per cent. (50%) of the Asset Initial Price of such Underlying Asset; and
- (ii) the Autocall Event Base Amount is SEK 10,000.

For the purposes of these Examples only, (i) the Autocall Value Multiplicand is deemed to be SEK 1,800 and (ii) the Trigger Percentage is deemed to be 190 per cent. (190%). The actual Autocall Value Multiplicand and the Trigger Percentage will each be determined by the Calculation Agent on or around December 30, 2021 and, in respect of (i) the Autocall Value Multiplicand may be a lesser or greater amount than SEK 1,800 (but shall not be less than SEK 1,500) and (ii) the Trigger Percentage may be a lesser or greater percentage than 190 per cent. (190%) (but shall not be less than 175 per cent. (175%)). Therefore, as the actual Autocall Value Multiplicand and the Trigger Percentage may each be lower than the deemed values used for the purposes of these Examples, the actual amounts received by investors may be less than the amounts stated in the Examples below.

AUTOMATIC EARLY EXERCISE

Example 1 – Automatic Early Exercise: *The Reference Price of each Underlying Asset for the first Autocall Observation Date is greater than or equal to its respective Autocall Level. The Autocall Value Multiplicand is 1.*

In this Example, the Certificates will be automatically exercised early on such Autocall Observation Date, and the Automatic Early Exercise Amount payable per Certificate (of the Calculation Amount) on the Automatic Early Exercise Date immediately following such Autocall Observation Date will be an amount in the Settlement Currency equal to the *sum* of (i) the Autocall Event Base Amount, *plus* (ii) the *product* of (a) the Autocall Value Multiplier for such Autocall Observation Date, *multiplied* by (b) the Autocall Value Multiplicand., i.e., SEK 11,800.

Example 2 – no Automatic Early Exercise: *The Reference Price of one Underlying Asset for the first Autocall Observation Date is less than its Autocall Level.*

In this Example, the Certificates will not be automatically exercised on such Autocall Observation Date.

SETTLEMENT AMOUNT

Example 3 – positive scenario: *The Certificates have not been exercised on an Applicable Date, and the Final Closing Price of each Underlying Asset is 75 per cent. (75%) or more of its respective Asset Initial Price.*

In this Example, the Certificates will be automatically exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the Trigger Percentage, i.e., SEK 19,000.

Example 4 – neutral scenario: *The Certificates have not been exercised on an Applicable Date, the Final Closing Price of one Underlying Asset is 74 per cent. (74%) of its Asset Initial Price and the Final Closing Price of each other Underlying Asset is 50 per cent. (50%) or more of its respective Asset Initial Price.*

In this Example, the Certificates will be automatically exercised on the Final Reference Date and the Settlement

Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be 100 per cent. (100%) of the Calculation Amount, i.e., SEK 10,000.

Example 5 – negative scenario: *The Certificates have not been exercised on an Applicable Date, the Final Closing Price of one Underlying Asset is 49 per cent. (49%) of its Asset Initial Price and the Final Closing Price of each other Underlying Asset is 50 per cent. (50%) or more of its respective Asset Initial Price.*

In this Example, the Certificates will be automatically exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the *quotient* of (a) the Final Closing Price of the Final Worst Performing Asset, *divided* by (b) the Asset Initial Price of the Final Worst Performing Asset, i.e., SEK 4,900. **In this Example, an investor who purchased the Certificates at the Issue Price will sustain a substantial loss of the amount invested in the Certificates.**

Example 6 – negative scenario: *The Certificates have not been automatically exercised on an Applicable Date, the Final Closing Price of one Underlying Asset is zero per cent. (0%) of its Asset Initial Price and the Final Closing Price of each other Underlying Asset is 50 per cent. (50%) or more of its respective Asset Initial Price.*

In this Example, the Certificates will be automatically exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the *quotient* of (a) the Final Closing Price of the Final Worst Performing Asset, *divided* by (b) the Asset Initial Price of the Final Worst Performing Asset, i.e., zero. **In this Example, an investor will sustain a total loss of the amount invested in the Certificates.**

What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The payment of any amount due on the Securities is subject to the credit risk of the Issuer. The Securities are the Issuer's unsecured obligations. Investors are dependent on the Issuer's ability to pay all amounts due on the Securities, and therefore investors are subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness. The Securities are not bank deposits, and they are not insured or guaranteed by any compensation or deposit protection scheme. The value of and return on the Securities will be subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness.
- GSG and its consolidated subsidiaries ("**Goldman Sachs**") is a leading global investment banking, securities and investment management group and faces a variety of significant risks which may affect the Issuer's ability to fulfil their obligations under the Securities, including market and credit risks, liquidity risks, business activities and industry risks, operational risks and legal, regulatory and reputational risks.
- GSI is a wholly-owned subsidiary of the Goldman Sachs group and a key banking subsidiary of the Goldman Sachs group. As a result, it is subject to a variety of risks that are substantial and inherent in its businesses including risks relating to economic and market conditions, regulation, Brexit, market volatility, liquidity, credit markets, concentration of risk, credit quality, composition of client base, derivative transactions, operational infrastructure,

cyber security, risk management, business initiatives, operating in multiple jurisdictions, conflicts of interest, competition, changes in underliers, personnel, negative publicity, legal liability, catastrophic events and climate change.

- GSI is subject to the Bank Recovery and Resolution Directive, which is intended to enable a range of actions to be taken by a resolution authority in relation to credit institutions and investment firms considered by the resolution authority to be at risk of failing and where such action is necessary in the public interest. The resolution powers available to the resolution authority include powers to (i) write down the amount owing, including to zero, or convert the Securities into other securities, including ordinary shares of the relevant institution (or a subsidiary) – the so-called "bail-in" tool; (ii) transfer all or part of the business of the relevant institution to a "bridge bank"; (iii) transfer impaired or problem assets to an asset management vehicle; and (iv) sell the relevant institution to a commercial purchaser. In addition, the resolution authority is empowered to modify contractual arrangements, suspend enforcement or termination rights that might otherwise be triggered. The resolution regime is designed to be triggered prior to insolvency, and holders of Securities may not be able to anticipate the exercise of any resolution power by the resolution authority. Further, holders of Securities would have very limited rights to challenge the exercise of powers by the resolution authority, even where such powers have resulted in the write down of the Securities or conversion of the Securities to equity.

What are the key risks that are specific to the Securities?

Risk factors associated with the Securities: The Securities are subject to the following key risks:

The value and quoted price of your Securities (if any) at any time will reflect many factors and cannot be predicted. Depending on the performance of the Underlying Assets, you may lose some or all of your investment.

Risks relating to certain features of the Securities:

- The terms and conditions of your Securities provide that the Securities are subject to a cap, so your ability to participate in any change in the value of the Underlying Assets over the term of the Securities will be limited, no matter how much the level, price, rate or other applicable value of the Underlying Assets may rise beyond the cap level over the life of the Securities. Accordingly, the return on your Securities may be significantly less than if you had purchased the Underlying Assets directly.
- The terms and conditions of your Securities provide that the return on the Securities depends on the "worst-of" performance of the basket of Underlying Assets, you will be exposed to the performance of each Underlying Asset and, in particular, to the Underlying Asset which has the worst performance. This means that, irrespective of how the other Underlying Assets perform, if any one or more Underlying Assets fails to meet a relevant threshold or barrier for the payment of interest or the calculation of any redemption amount, you may receive no interest payments and/or could lose some or all of your initial investment.

Risks relating to the Underlying Assets:

- *The value of and return on your Securities depends on the performance of the Underlying Assets*
The return on your Securities may depend on the performance of one or more Underlying Asset(s). The level, price, rate, net asset value or other applicable value of the Underlying Asset(s) may be subject to unpredictable change over time. This degree of change is known as "volatility". The volatility of an Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. Volatility does not imply direction of the level, price, rate, net asset value or other applicable value, though an Underlying Asset that is more volatile is likely to increase or decrease in value more often and/or to a greater extent than one that is less volatile.
- *Past performance of an Underlying Asset is not indicative of future performance*
You should not regard any information about the past performance of the Underlying Asset(s) as indicative of the range of, or trends in, fluctuations in the Underlying Asset(s) that may occur in the future. Underlying Asset(s) may perform differently (or the same) as in the past, and this could have material adverse effect on the value of and return on your Securities.
- The performance of Shares is dependent upon macroeconomic factors, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as business risks faced by the issuers thereof. Any one or a combination of such factors could adversely affect the performance of the

Underlying Asset(s) which, in turn, would have a negative effect on the value of and return on your Securities.

Emittenten är föremål för följande nyckelrisker:

- Betalningen av varje belopp som förfaller under Värdepapperen är utsatt för kreditrisken förknippad med Emittenten. Värdepapperen är Emittentens icke säkerställda förpliktelser. Investerares beroende av Emittentens förmåga att betala alla belopp som förfallit till betalning under Värdepapperen, och därför är investerares föremål för Emittentens kreditrisk och för förändringar i marknadens syn på Emittentens kreditvärdighet. Värdepapperen är inte banksättningar och dessa är inte försäkrade eller garanterade av eller någon insättningsgaranti. Värdet för och avkastningen från Värdepapperen kommer att vara utsatt för Emittentens kreditrisk och för förändringar i marknadens syn på Emittentens kreditvärdighet.
- GSG och dess konsoliderade dotterföretag ("**Goldman Sachs**") är en ledande global investmentbank, värdepappers- och investeringsförvaltningskoncern och står inför en rad betydande risker som kan påverka Emittentens förmåga att uppfylla sina skyldigheter enligt Värdepapperen, inklusive marknads- och kreditrisker, likviditetsrisker, affärsaktivitets- och branschrisker, operativa risker och legala, regulatoriska och renommérisker.
- GSI är ett helägt dotterföretag till Goldman Sachs-koncernen och ett viktigt bankdotterföretag till Goldman Sachs-koncernen. Som ett resultat är det föremål för olika risker som är väsentliga och inneboende i dess verksamheter inklusive risker relaterade till ekonomiska och marknadsmässiga förhållanden, reglering, Brexit, marknadsvolatilitet, likviditet, kreditmarknader, koncentration av risk, kreditkvalitet, kundbasens sammansättning, derivatransaktioner, operationell infrastruktur, cybersäkerhet, riskhantering, affärsinitiativ, verksamhet i flera jurisdiktioner, intressekonflikter, konkurrens, förändringar i underliggande, personal, negativ publicitet, juridiskt ansvar, katastrofala händelser och klimatförändringar.

Dessutom har resolutionsmyndigheten befogenhet att ändra avtalsarrangemang, avbryta verkställighets- eller uppsägningsrättigheter som annars skulle kunna utlösas. Resolutionsregimen är utformad för att utlösas före insolvens, och innehavare av Värdepapper kanske inte kan förutse att resolutionsmyndigheten utövar resolutionsmakten. Vidare skulle innehavare av Värdepapper ha mycket begränsade rättigheter att utmana utövandet av befogenheter av resolutionsmyndigheten, även om sådana befogenheter har resulterat i nedskrivning av Värdepapperen eller omvandling av Värdepapperen till eget kapital.

Vilka nyckelrisker är specifika för Värdepapperen?

Risikfaktorer förknippade med Värdepapperen: Värdepapperen är föremål för följande nyckelrisker:

Värdet och den kvoterade kursen för dina Värdepapper (om några) kommer vid var tid reflektera många faktorer och kan inte förutsägas. Beroende på utvecklingen för de Underliggande Tillgångarna kan du förlora delar av eller hela din investering.

Risker relaterade till vissa funktioner i Värdepapperen:

- Villkoren för dina Värdepapper föreskriver att Värdepapperen är föremål för ett tak, följaktligen så kan din förmåga att delta i förändringar i värdet på de Underliggande Tillgångarna under Värdepapperens löptid vara begränsad, oavsett hur mycket nivån, kursen, räntesatsen eller annat tillämpligt för de Underliggande Tillgångarna kan stiga utöver taknivån under Värdepapperens livslängd. Följaktligen kan avkastningen på dina Värdepapper vara betydligt mindre än om du hade köpt de Underliggande Tillgångarna direkt.
- Villkoren för Dina Värdepapper föreskriver att avkastningen på Värdepapperen är beroende av "sämsta-av utvecklingen för korgen av Underliggande Tillgångar, du kommer exponeras mot utvecklingen för varje Underliggande Tillgång och, i synnerhet, mot den Underliggande Tillgång som har sämst utveckling. Detta innebär att, oberoende av hur de andra Underliggande Tillgångarna utvecklas, om en eller flera Underliggande Tillgångar misslyckas med att uppnå en relevant tröskel eller barriär för betalning av ränta eller beräkningen av vilket inlösenbelopp som helst, kanske du inte erhåller någon räntebetaling och/eller kan du förlora delar av eller hela din initiala investering.

Risker relaterade till de(n) Underliggande Tillgången(arna):

- *Värdet på och avkastningen från dina Värdepapper beror på utvecklingen för de Underliggande Tillgångarna:* Avkastningen på dina Värdepapper kan vara beroende av utvecklingen för en eller flera Underliggande Tillgångar. Nivån, kursen, räntesatsen, nettoandelsvärdet eller annat tillämpligt värde på de(n) Underliggande Tillgången(arna) kan vara föremål för oförutsebara förändringar över tid. Denna nivå av förändring är känd som "volatilitet". Volatiliteten för en Underliggande Tillgång kan påverkas av nationella och internationella finansiella, politiska, militära eller ekonomiska händelser, inkluderat statliga åtgärder, eller genom åtgärder av medlemmar på relevanta marknader. Sådana händelser eller åtgärder kan negativt påverka värdet och avkastningen på Värdepapperen. Volatilitet innebär inte en riktning av nivån, kursen, räntesatsen, nettoandelsvärdet eller annat tillämpligt värde, även om det är troligt att en Underliggande Tillgång med högre volatilitet ökar eller minskar i värde mer ofta och/eller i högre omfattning än en som är mindre volatil.
- *Historisk utveckling för en Underliggande Tillgång indikerar inte framtida utveckling:* Du ska inte se någon information om historisk utveckling för de(n) Underliggande Tillgången(arna) som en indikation på omfattningen av, eller trender för, fluktuationer i de(n) Underliggande Tillgången(arna) som kan inträffa i framtiden. Underliggande Tillgång(ar) kan utvecklas annorlunda (eller lika) som historisk sett, och detta kan ha väsentligt negativ påverkan på värdet på och avkastningen från dina Värdepapper.
- Aktiernas utveckling är beroende av makroekonomiska faktorer, såsom ränta och prisnivåer på kapitalmarknaderna, valutaförändringar, politiska faktorer såväl som företagsspecifika faktorer som vinstposition, marknadsposition, riskläge, aktieägare struktur- och distributionspolicy samt affärsrisker som emittenterna står inför. Vilken som helst eller en kombination av sådana faktorer kan påverka utvecklingen för de(n) Underliggande Tillgången(arna) som i sin tur skulle ha en negativ effekt på värdet på och avkastningen från dina Värdepapper.
