SUMMARY

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in sections A – E (A.1 – E.7).

This Summary contains all the Elements required to be included in a summary for this type of Securities and the Issuer. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements.

Even though an Element may be required to be inserted in the summary because of the type of Securities and Issuer, it is possible that no relevant information can be given regarding such Element. In this case a short description of the Element is included in the summary and marked as "Not applicable".

C.2	Currency:	The currency of the Securities will be Swedish Krona (" SEK ") (the " Settlement Currency ").
C.5	Description of restrictions on free transferability of the Securities:	The Securities have not been and will not be registered under the U.S. Securities Act of 1933 (the " Securities Act ") and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except in certain transactions exempt from the registration requirements of the Securities Act and applicable state securities laws. No offers, sales or deliveries of the Securities, or distribution of any offering material relating to the Securities, may be made in or from any jurisdiction except in circumstances that will result in compliance with any applicable laws and regulations. Subject to the above, the Securities will be freely transferable.
C.8	Description of rights attached to the securities, ranking of the securities and limitations to rights:	Rights: The Securities will give each holder of Securities (a " Securityholder ") the right to receive a potential return on the Securities (see Element C.18 below). The Securities will also give each Securityholder the right to vote on certain amendments. Ranking: The Securities are unsubordinated and unsecured obligations of the Issuer and will rank equally among themselves and with all other unsubordinated and unsecured obligations of the Issuer from time to time outstanding. Limitation to Rights: <ul style="list-style-type: none"> • The Issuer may redeem the Securities early for illegality reasons or following an event of default. In such case, the amount payable in respect of each Security on such early redemption will be equal to the Unscheduled Termination Amount, and no other amount shall be payable in respect of each Security on account of interest or otherwise. • Following certain events affecting the Issuer's hedging arrangements and/or the underlying asset(s), the Issuer may redeem the Securities at the scheduled maturity by payment of the Unscheduled Termination Amount instead of the Redemption Amount, and no other amounts shall be payable in respect of the Securities on account of interest or otherwise.

following such determination by the Issuer.

Where:

- **Unscheduled Termination Amount:** in respect of each Security, (a) if the Security is redeemed early for illegality reasons or following an event of default, an amount (which may be greater than or equal to zero) equal to the value of such Security immediately prior to its redemption, as calculated by the calculation agent using its internal models and methodologies, or (b) if the Security is redeemed following certain events affecting the Issuer's hedging arrangements and/or the underlying asset(s), an amount equal to the *sum* of (i) the Minimum Payment Amount, *plus* (ii) the value of the option component of the Security on the Unscheduled Termination Event Date, *plus* (iii) any interest accrued on the value of the option component from, and including the Unscheduled Termination Event Date to, but excluding, the date on which such Security is redeemed. The option component provides exposure to the underlying asset(s) (if any), the terms of which are fixed on the trade date in order to enable the Issuer to issue such Security at the relevant price and on the relevant terms and will vary depending on the terms of such Security.

For the avoidance of doubt, if a Security is redeemed following an event of default, the Unscheduled Termination Amount shall not take into account the financial position of the Issuer immediately prior to the event of default, and the Issuer shall be presumed to be able to fully perform its obligations under such Security for such purposes.

- **Unscheduled Termination Event Date:** the date on which an event resulting in the unscheduled redemption of the Securities following certain events affecting the Issuer's hedging arrangements and/or the underlying asset(s) has occurred.
- **Minimum Payment Amount:** an amount equal to (a) the Specified Denomination *minus* (b) the *sum* of the Instalment Amounts paid in respect of such Security on each Instalment Date preceding the Unscheduled Termination Event Date.
- The Issuer may adjust the terms and conditions of the Securities without the consent of Securityholders following certain events affecting the Issuer's hedging arrangements and/or the underlying asset(s), or may redeem the Securities at the scheduled maturity by payment of the Unscheduled Termination Amount instead of the Final Instalment Amount as described above (and no other amounts shall be payable in respect of the Securities on account of interest or otherwise following such determination by the Issuer).
- The terms and conditions of the Securities contain provisions for convening meetings of Securityholders to consider any matter affecting their interests, and any resolution passed by the relevant majority at a meeting will be binding on all Securityholders, whether or not they attended such meeting or voted for or against the relevant resolution. In certain

		<p>circumstances, the Issuer may modify the terms and conditions of the Securities without the consent of Securityholders.</p> <ul style="list-style-type: none"> The Securities are subject to the following events of default: if the Issuer fails to pay any amount due in respect of the Securities within 30 days of the due date, or if any events relating to the insolvency or winding up of the Issuer occur. The Issuer may at any time, without the consent of the Securityholders, substitute for itself as Issuer under the Securities any company with which it consolidates, into which it merges or to which it sells all or substantially all of its property. Governing Law: The Securities are governed by English law.

C.15	Effect of the underlying instrument(s) on value of investment:	<p>The value of the Securities and the Final Instalment Amount payable in respect of Securities being redeemed on the Maturity Date will depend on the performance of the underlying asset(s) on the Averaging Dates.</p> <p>See Element C.18. below for details on how the value of the Securities is affected by the value of the underlying asset(s).</p>
C.16	Scheduled Maturity Date or Settlement Date:	The scheduled Maturity Date of the Securities is 10 currency business days following the final Averaging Date or, if such date falls on different dates for different underlying assets, the latest of such dates to occur (expected to be 13 March 2023).

Section D – Risks		
D.2	Key risks that are specific to the Issuer:	<p>The Securities are general unsecured obligations of the Issuer. Investors in the Securities are exposed to the risk that the Issuer could become insolvent and fail to make the payments owing by it under the Securities.</p> <p>The profitability of the Issuer will be affected by, among other things, changes in global economic conditions, inflation, interest/exchange rates, capital risk, liquidity risk, market risk, credit risk, risks from estimates and valuations, risks relating to off-balance sheet entities, cross-border and foreign exchange risks, operational risks, legal and regulatory risks and competition risks.</p> <p>The Issuer is exposed to a variety of risks that could adversely affect its operations and/or financial condition:</p> <ul style="list-style-type: none"> • Liquidity risk: The Issuer's liquidity could be impaired if it were unable to access the capital markets or sell its assets, and the Issuer expects its liquidity costs to increase. If the Issuer is unable to raise funds or sell its assets, or has to sell its assets at depressed prices, this may adversely affect its financial condition. The Issuer's businesses rely significantly on its deposit base for funding; however, if deposits cease to be a stable source of funding, the Issuer's liquidity position may be adversely affected and it may be unable to meet its liabilities or fund new investments. Changes to the Issuer's credit ratings may also adversely affect the Issuer's business. • Market risk: The Issuer may incur significant losses on its trading and investment activities due to market fluctuations and volatility in financial and other markets. Its businesses are subject to the risk of loss from adverse market conditions and unfavourable economic, monetary, political, legal and other developments in the countries it operates in around the world. The Issuer's real estate-related businesses may continue to be adversely affected by any downturn in real estate markets and the economy as a whole. The Issuer has significant risk concentration in the financial services industry which may cause it to suffer losses even when economic and market conditions are generally favourable for others in the industry. Further, the Issuer's hedging strategies may not be fully effective in mitigating its risk exposure in all market environments or against all types of risk. Market risk may also

		<p>increase the other risks that the Issuer faces.</p> <ul style="list-style-type: none"> • Credit risk: The Issuer may suffer significant losses from its credit exposures across a wide range of transactions. The Issuer's exposure to credit risk may be increased by adverse economic or market trends or increased volatility in the markets. The Issuer may be unable to sell its positions, which may increase its capital requirements, which could adversely affect its businesses. Defaults or concerns about a default by a large financial institution could also adversely affect the Issuer and financial markets generally. The information which the Issuer uses to manage its credit risk (such as the credit or trading risks of a counterparty) may also be inaccurate or incomplete. • Risks from estimates and valuations: The Issuer makes estimates and valuations that affect its reported results; these estimates are based upon judgment and available information, and the actual results may differ materially from these estimates. To the extent the Issuer's models and processes become less predictive due to unforeseen market conditions, illiquidity or volatility, the Issuer's ability to make accurate estimates and valuations could be adversely affected. • Risks relating to off-balance sheet entities: The Issuer may enter into transactions with certain special purpose entities which are not consolidated and whose assets and liabilities are off-balance sheet. If the Issuer is required to consolidate a special purpose entity for any reason, this could have an adverse impact on the Issuer's operations and capital and leverage ratios. • Cross-border and currency exchange risk: Cross-border risks may increase the market and credit risks that the Issuer faces. Economic or political pressures in a country or region may adversely affect the ability of the Issuer's clients or counterparties in that country or region to perform their obligations to the Issuer, which may in turn have an adverse impact on the Issuer's operations. The Issuer has businesses in emerging markets and economic and financial disruptions in these countries may adversely affect its businesses. A substantial portion of the Issuer's assets and liabilities are denominated in currencies other than the Swiss franc and fluctuations in exchange rates may adversely affect the Issuer's results. • Operational risk: The Issuer is exposed to a wide variety of operational risks, including risks from errors made in execution or settlement of transactions or information technology risk due to dependencies on information technology and third party supplies. The Issuer may also suffer losses due to employee misconduct. • Risk management: The Issuer's risk management procedures and policies may not always be effective, and may not fully mitigate its risk exposure in all markets or against all types of risk. • Legal and regulatory risks: The Issuer faces significant legal risks in its businesses. The Issuer and its subsidiaries are subject to a number of legal proceedings, regulatory actions
--	--	--

		<p>and investigations, where an adverse result could have a material adverse effect on the operations and results of the Issuer. Regulatory changes may adversely affect the Issuer's business and ability to execute its strategic plans. The Issuer (and the financial services industry) continue to be affected by significant uncertainty over the scope and content of regulatory reform. Under Swiss banking laws, FINMA has broad powers in the case of resolution proceedings with respect to a Swiss bank such as the Issuer, and such proceedings may adversely affect the Issuer's shareholders and creditors. Changes in monetary policies adopted by relevant regulatory authorities and central banks may directly impact the Issuer's costs of funding, capital raising and investment activities, and may impact the value of financial instruments held by the Issuer and the competitive and operating environment for the financial services industry. Legal restrictions on the Issuer's clients may also adversely affect the Issuer by reducing the demand for the Issuer's services.</p> <ul style="list-style-type: none"> • Competition risks: The Issuer faces intense competition in all financial services markets and for the products and services it offers. The Issuer's competitive position could be harmed if its reputation is damaged due to any failure (or perceived failure) in its procedures and controls to address conflicts of interest, prevent employee misconduct, etc. The continued public focus on compensation in the financial services industry and related regulatory changes may adversely impact the Issuer's ability to attract and retain highly skilled employees. The Issuer also faces competition from new trading technologies which may adversely affect its revenues and businesses. • Risks relating to strategy: The Issuer may not achieve all of the expected benefits of its strategic initiatives. The Issuer has announced a program to change its legal entity structure; however, this is subject to uncertainty regarding feasibility, scope and timing. Legal and regulatory changes may require the Issuer to make further changes to its legal structure, and such changes may potentially increase operational, capital, funding and tax costs, as well as the Issuer's counterparties' credit risk.
D.6	<p>Key risks that are specific to the Securities and risk warning that investors may lose value of entire investment or part of it:</p>	<p>The Securities are subject to the following key risks:</p> <ul style="list-style-type: none"> • The market value of the Securities and the amount payable or deliverable at maturity depend on the performance of the underlying asset(s). The performance of an underlying asset may be subject to sudden and large unpredictable changes over time (known as "volatility"), which may be affected by national or international, financial, political, military or economic events or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. • If the redemption amount or settlement amount or any other amount payable under the Securities depends on the performance of the underlying asset(s) and is multiplied by a participation factor which is greater than 100 per cent., investors may participate disproportionately in the performance of the underlying asset(s). • If the redemption amount or settlement amount or any other

		<p>amount payable under the Securities depends on the performance of the underlying asset(s) and is multiplied by a participation factor which is less than 100 per cent., then the percentage change in the value of the Securities will be less than the positive or negative performance of underlying asset(s), and the return on the Securities will be disproportionately lower than any positive performance of the underlying asset(s), and may be significantly less than if you had purchased the underlying asset(s) directly.</p> <ul style="list-style-type: none"> • A secondary market for the Securities may not develop and, if it does, it may not provide the investors with liquidity and may not continue for the life of the Securities. Illiquidity may have an adverse effect on the market value of the Securities. The price in the market for a Security may be less than its issue price or its offer price and may reflect a commission or a dealer discount, which would further reduce the proceeds you would receive for your Securities. • The market value of the Securities will be affected by many factors beyond the control of the Issuer (including, but not limited to, the creditworthiness of the Issuer, the interest rates and yield rates in the market, the volatility of the underlying asset(s) (if any), etc.). Some or all of these factors will influence the value of the Securities in the market. • The issue price or the offer price of the Securities may be more than the market value of such Securities as at the issue date, and more than the price at which the Securities can be sold in secondary market transactions. The issue price or the offer price of the Securities may take into account, where permitted by law, fees, commissions or other amounts relating to the issue, distribution and sale of the Securities, or the provision of introductory services, expenses incurred by the Issuer in creating, documenting and marketing the Securities and amounts relating to the hedging of its obligations under the Securities. • The levels and basis of taxation on the Securities and any reliefs from such taxation will depend on an investor's individual circumstances and could change at any time. The tax and regulatory characterisation of the Securities may change over the life of the Securities. This could have adverse consequences for investors. • The Participation will not be set by the Issuer until the trade date so that the Issuer may take into account the prevailing market conditions at the time of the close of the offer period in order that the Issuer may issue the Securities at the relevant price and on the relevant terms. There is a risk that the final amount(s) set by the Issuer will be other than the indicative amount(s) specified in the Specific Terms, although the final amount(s) will not be less than the minimum amount(s) specified in the Specific Terms or greater than the maximum amount(s) specified in the Specific Terms, as the case may be. Nevertheless, prospective investors must base their investment decision on the indicative amount(s) (and in light of the minimum or maximum amount(s)) so specified, and will not have a right of withdrawal from their purchase obligation when the final amount(s) are set by the Issuer. Investors should note

		<p>that no supplement will be published in relation to such final setting.</p> <ul style="list-style-type: none"> • In certain circumstances (for example, if the Issuer determines that its obligations under the Securities have become unlawful or illegal or following an event of default) the Securities may be redeemed prior to their scheduled maturity. In such circumstances, the Unscheduled Termination Amount payable may be less than the original purchase price and could be as low as zero. No other amounts shall be payable in respect of the Securities on account of interest or otherwise following such determination by the Issuer. • Following certain events affecting the Issuer's hedging arrangements and/or the underlying asset(s), the Issuer may redeem the Securities at the scheduled maturity by payment of the Unscheduled Termination Amount instead of the Final Instalment Amount. In such circumstances, the Unscheduled Termination Amount payable will be at least equal to the Minimum Payment Amount, but may be less than what the Final Instalment Amount would have been if such event had not occurred. • Following early redemption of Securities, investors may not be able to reinvest the redemption proceeds at a comparable return and/or at an effective interest rate as high as the interest rate or yield on the Securities being redeemed and may only be able to do so at a significantly lower rate. Investors in Securities should consider such reinvestment risk in light of other investments available at that time. • Investors will have no rights of ownership, including, without limitation, any voting rights, any rights to receive dividends or other distributions or any other rights with respect to any underlying asset referenced by the Securities. • Investors may be exposed to currency risks because the underlying asset(s) may be denominated in a currency other than the currency in which the Securities are denominated, or the Securities and/or underlying asset(s) may be denominated in currencies other than the currency of the country in which the investor is resident. The value of the Securities may therefore increase or decrease based on fluctuations in those currencies. • Investors should note that the Issuer will not be obliged to maintain the listing of the Securities in certain circumstances, such as a change in listing requirements. • The Issuer may apply any consequential postponement of, or any alternative provisions for, valuation of an underlying asset following certain disruption events in relation to such underlying asset, each of which may have an adverse effect on the value of and return on the Securities. • The amount(s) payable (or deliverable) on the Securities will be based on the arithmetic average of the applicable values of the underlying asset(s) on the specified averaging dates. If the value of the underlying asset(s) dramatically surged on one or more of such averaging dates, the amount payable (or deliverable) may be significantly less than it would have been

		<p>had the amount payable been linked only to the value of the underlying asset(s) on a single date.</p> <ul style="list-style-type: none"> • The performance of a share is dependent upon macroeconomic factors which may adversely affect the value of Securities. The issuer of a share has no obligation to any Securityholders and may take any actions in respect of such share without regard to the interests of Securityholders, and any of these actions could adversely affect the market value of and return on the Securities. Securityholders will not participate in dividends or other distributions paid on such share. • If the basket constituents are highly correlated, any move in the performance of the basket constituents will exaggerate the impact on the value of and return on the Securities. Even in the case of a positive performance by one or more of the basket constituents, the performance of the basket as a whole may be negative if the performance of one or more of the other basket constituents is negative to a greater extent. • The Issuer may modify the terms and conditions of the Securities without the consent of Securityholders for the purposes of (a) curing any ambiguity or correcting or supplementing any provision if the Issuer determines it to be necessary or desirable, provided that such modification is not prejudicial to the interests of Securityholders, or (b) correcting a manifest error. • The Issuer may adjust the terms and conditions of the Securities without the consent of Securityholders following certain events affecting the Issuer's hedging arrangements and/or the underlying asset(s). • In making discretionary determinations under the terms and conditions of the Securities, the Issuer and the calculation agent may take into account the impact on the relevant hedging arrangements. Such determinations could have a material adverse effect on the value of and return on the Securities. • The Issuer may be substituted without the consent of Securityholders in favour of any affiliate of the Issuer or another company with which it consolidates or into which it merges or to which it sells or transfer all or substantially all of its property. • The Issuer is subject to a number of conflicts of interest, including: (a) in making certain calculations and determinations, there may be a difference of interest between the investors and the Issuer, (b) in the ordinary course of its business the Issuer (or an affiliate) may effect transactions for its own account and may enter into hedging transactions with respect to the Securities or the related derivatives, which may affect the market price, liquidity or value of the Securities, and (c) the Issuer (or an affiliate) may have confidential information in relation to the underlying asset(s) or any derivative instruments referencing them which may be material to an investor, but which the Issuer is under no obligation (and may be subject to legal prohibition) to disclose. <p>Investors may lose up to all of their investment if one or more of</p>

Section E – Other		
E.2b	Reasons for the offer and use of proceeds:	Not applicable; the net proceeds from the issue of the Securities will be used by the Issuer for its general corporate purposes (including hedging arrangements).
E.3	Terms and conditions of the offer:	<p>An offer of the Securities will be made in the Kingdom of Sweden during the period from, and including, 15 January 2016 to, and including, 18 February 2016 (the "Offer Period"). The Offer Period may be discontinued at any time. The offer price will be equal to 100 per cent. of the aggregate nominal amount.</p> <p>The Securities are offered subject to the following conditions:</p> <p>The offer of the Securities is conditional on their issue.</p> <p>The Issuer reserves the right to withdraw the offer and/or to cancel the issue of the Securities for any reason at any time on or prior to the issue date.</p> <p>Payments for the Securities shall be made to the relevant Distributor in accordance with the arrangements existing between the relevant Distributor and its customers relating to the subscription of securities generally.</p>
E.4	Interests material to the issue/offer:	Fees shall be payable to the Distributor(s). The Issuer is subject to conflicts of interest between its own interests and those of holders of Securities, as described in Element D.6 above.
E.7	Estimated expenses charged to the investor by the Issuer/offeror:	<p>Not applicable; there are no estimated expenses charged to the purchaser by the Issuer and Distributor(s).</p> <p>The dealer will pay a fee to the Distributor(s) in connection with the offer of up to 8.40 per cent. of the Specified Denomination per Security upfront. The offer price and the terms of the Securities take into account such fee and may be more than the market value of the Securities on the issue date.</p>

PART TWO
SECURITIES NOTE

RISK FACTORS

The risk factors set out below should be read in addition to the risk factors set out on each of (a) pages 39 to 46 of the Exhibit to the Form 20-F Dated 20 March 2015 (as defined in the Registration Document) and (b) pages 64 to 97 (inclusive) of the Base Prospectus (as defined above). Such risk factors are risk factors that are material to the Securities in order to assess the market risk associated with them or which may affect the Issuer's ability to fulfil its obligations under them.

1. **Investors may lose some or all of their investment if one or more of the following occurs:**
 - (a) **the Issuer fails and is unable to make payments owing under the Securities; or**
 - (b) **investors sell their Securities prior to maturity in the secondary market at an amount that is less than the initial purchase price.**
2. Securityholders are exposed to the credit risk of the Issuer as the Securities are unsecured. The Securities will be adversely affected in the event of a default, reduced credit rating or deterioration in the solvency of the Issuer.
3. The Securities involve complex risks, which include, among other things, share price risks, credit risks, foreign exchange risks, exchange rate risks, interest rate risks and/or political risks. Before buying the Securities, investors should carefully consider, among other things, (a) the trading price of the Securities, (b) the level and volatility of the Underlying Asset(s), (c) the depth of the market or liquidity of the Securities, and (d) any related transaction costs. An investment in the Securities is only suitable for investors who (either alone or in conjunction with an appropriate financial adviser) are capable of evaluating the merits and risks of such an investment. Investors should consult their own financial, tax, legal or other advisers as they consider appropriate and carefully review and consider such an investment decision in the light of the foregoing and their personal circumstances.
4. A secondary market for the Securities may not develop and, if it does, it may not provide the holders with liquidity and may not continue for the life of the Securities. A decrease in the liquidity of the Securities may cause, in turn, an increase in the volatility associated with the price of such Securities. Illiquidity may have a severely adverse effect on the market value of the Securities
5. In making calculations and determinations with regard to the Securities, there may be a conflict of interest between the investors and the Calculation Agent and/or the Issuer. Save where otherwise provided, the Calculation Agent and/or the Issuer are each required to act in good faith and in a commercially reasonable manner. However, the Calculation Agent and/or the Issuer do not have any obligations of agency or trust for any investors and have no fiduciary obligations towards them. In particular, each of the Calculation Agent, the Issuer and their affiliated entities may have interests in other capacities (such as other business relationships and activities). Prospective investors should be aware that any determination made by the Calculation Agent and/or the Issuer may have a negative impact on the value of and return on the Securities.
6. The Issuer and its affiliates are not acting as a fiduciary for, or an adviser to, any investor in respect of the Securities and each investor will be solely responsible and must have sufficient knowledge, experience and professional advice (which may be from third parties) to make its own evaluation of the merits and risks of investment of the Securities. Neither the Issuer, nor any of its affiliates, is an agent of any Securityholder for any purpose.
7. By purchasing the Securities, investors acknowledge that they are not relying on the views or advice of, or any information from, the Issuer or its affiliates in respect of the purchase of the Securities.
8. Each Security's retention of value is dependent on the creditworthiness of the Issuer, which may change over the term of the Securities. The Securities are unsubordinated and unsecured obligations of Credit Suisse AG and rank equally with all other unsubordinated and unsecured obligations of Credit Suisse AG. Securityholders are exposed to the risk that the Issuer could become insolvent and fail to make payments owing by it under the Securities. Credit Suisse AG

is licensed as a bank pursuant to the Swiss Federal Act on Banks and Saving Banks and as a securities dealer pursuant to the Swiss Federal Act on Stock Exchanges and Securities Trading and is subject to supervision by the Swiss Federal Banking Commission. Securities are not deposits, and are not covered by any deposit insurance or protection scheme.

9. Neither the Issuer nor any of its affiliates make any representation as to the performance of the Securities.
10. The levels and basis of taxation on the Securities and any relief from such taxation can change at any time. The levels and basis of taxation on the Securities and availability of any tax relief will depend on the individual circumstances of each investor and any tax regime which is applicable to the Security and/or the investor. The tax and regulatory characterisation of the Securities may change over the life of the Securities. This could have adverse consequences for investors.
