9. **UNITED STATES TAX CONSIDERATIONS**

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Certificates, the Certificates will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Certificates for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Certificates.

EXAMPLES

THE EXAMPLES PRESENTED BELOW ARE FOR ILLUSTRATIVE PURPOSES ONLY.

For the purposes of each Example:

- (i) the Issue Price is 100 per cent. (100%) of the Aggregate Nominal Amount and the Calculation Amount is SEK 10,000;
- (ii) in respect of each Underlying Asset, the Autocall Level is 90 per cent. (90%) of the Asset Initial Price of such Underlying Asset and the Barrier Level is 60 per cent. (60%) of the Asset Initial Price of such Underlying Asset; and
- (iii) the Coupon Value is deemed to be 0.007. The actual Coupon Value will be determined by the Calculation Agent on or around June 1, 2023 and may be a lesser or greater amount than 0.007 (but shall not be less than 0.0055). Therefore, as the actual Coupon Value may be lower than the deemed value used for the purposes of these Examples, the actual amounts received by investors may be less than the amounts stated in the Examples below.

The Aggregate Nominal Amount will be an amount determined by the Issuer on or around the Issue Date based on the results of the offer and which will be specified in a notice dated on or around the Issue Date. As of the date of this Final Terms, the Aggregate Nominal Amount of the Certificates in the Series is indicatively set at SEK 100,000,000 provided that it may be a greater or lesser amount but shall not exceed SEK 1,035,000,000

FIXED COUPON AMOUNT

The Fixed Coupon Amount will be payable on each Fixed Coupon Payment Date, and such Fixed Coupon Amount will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the Coupon Value, i.e., SEK 70.00.

AUTOMATIC EARLY EXERCISE

Example 1 – Automatic Early Exercise: *The Reference Price of each Underlying Asset for the Valuation Date scheduled to fall on December 2, 2024 is greater than or equal to its respective Autocall Level.*

In this Example, the Certificates will be exercised on such Valuation Date, and the Automatic Early Exercise Amount payable per Certificate (of the Calculation Amount) on the Automatic Early Exercise Date immediately following such Valuation Date will be an amount in the Settlement Currency equal to the Autocall Event Amount, i.e., SEK 10,000.

Example 2 – no Automatic Early Exercise: *The Reference Price of one Underlying Asset for the Valuation Date scheduled to fall on December 2, 2024 is less than its Autocall Level.*

In this Example, the Certificates will not be exercised on such Valuation Date.

SETTLEMENT AMOUNT

Example 3 – neutral scenario: *The Certificates have not been exercised on an Applicable Date, and the Final Closing Price of each Underlying Asset is 60 per cent. (60%) or more of its respective Asset Initial Price.*

In this Example, the Certificates will be exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to 100 per cent. (100%) of the Calculation Amount, i.e., SEK 10,000.

Example 4 – negative scenario: *The Certificates have not been exercised on an Applicable Date, the Final*

Closing Price of one Underlying Asset is 59 per cent. (59%) of its Asset Initial Price and the Final Closing Price of each other Underlying Asset is 60 per cent. (60%) or more of its respective Asset Initial Price.

In this Example, the Certificates will be exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the *quotient* of (a) the Final Closing Price of the Final Worst Performing Asset, *divided* by (b) the Initial Closing Price of the Final Worst Performing Asset, i.e., SEK 5,900. **In this Example, an investor who purchased the Certificates at the Issue Price will sustain a substantial loss of the amount invested in the Certificates.**

Example 5 – negative scenario: *The Certificates have not been exercised on an Applicable Date, the Final Closing Price of one Underlying Asset is zero per cent. (0%) of its Asset Initial Price and the Final Closing Price of each other Underlying Asset is 60 per cent. (60%) or more of its respective Asset Initial Price.*

In this Example, the Certificates will be exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the *quotient* of (a) the Final Closing Price of the Final Worst Performing Asset, *divided* by (b) the Initial Closing Price of the Final Worst Performing Asset, i.e., zero. **In this Example, an investor will sustain a total loss of the amount invested in the Certificates.**

What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The payment of any amount due on the Securities is subject to the credit risk of the Issuer. The Securities are the Issuer's unsecured obligations. Investors are dependent on the Issuer's ability to pay all amounts due on the Securities, and therefore investors are subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness. The Securities are not bank deposits, and they are not insured or guaranteed by any compensation or deposit protection scheme. The value of and return on the Securities will be subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness.
- GSG and its consolidated subsidiaries ("**Goldman Sachs**") is a leading global investment banking, securities and investment management group and faces a variety of significant risks which may affect the Issuer's ability to fulfil its obligations under the Securities, including market and credit risks, liquidity risks, business activities and industry risks, operational risks and legal, regulatory and reputational risks.
- GSI is a wholly-owned subsidiary of the Goldman Sachs group and a key banking subsidiary of the Goldman Sachs group. As a result, it is subject to a variety of risks that are substantial and inherent in its businesses including risks relating to economic and market conditions, regulation, Brexit, market volatility, liquidity, credit markets, concentration of risk, credit quality, composition of client base, derivative transactions, operational infrastructure, cyber security, risk management, business initiatives, operating in multiple jurisdictions, conflicts of interest, competition, changes in underliers, personnel, negative publicity, legal liability, catastrophic events and climate change.
- GSI is subject to the Bank Recovery and Resolution Directive, which is intended to enable a range of actions to be taken by a resolution authority in relation to credit institutions and investment firms considered by the resolution authority to be at risk of failing and where such action is necessary in the public interest. The resolution powers available to the resolution authority include powers to (i) write down the amount owing, including to zero, or convert the Securities into other securities, including ordinary shares of the relevant institution (or a subsidiary) – the so-called "bail-in" tool; (ii) transfer all or part of the business of the relevant institution to a "bridge bank"; (iii) transfer impaired or problem assets to an asset management vehicle; and (iv) sell the relevant institution to a

commercial purchaser. In addition, the resolution authority is empowered to modify contractual arrangements, suspend enforcement or termination rights that might otherwise be triggered. The resolution regime is designed to be triggered prior to insolvency, and holders of Securities may not be able to anticipate the exercise of any resolution power by the resolution authority. Further, holders of Securities would have very limited rights to challenge the exercise of powers by the resolution authority, even where such powers have resulted in the write down of the Securities or conversion of the Securities to equity.

- If the Final Closing Price of any Underlying Asset is less than its Barrier Level, the Settlement Amount payable in respect of each Security will be calculated in accordance with the formula below:

$$CA \times \frac{\text{Final Reference Value}}{\text{Initial Reference Value}}$$

Non-scheduled Early Repayment Amount: The Securities may be redeemed prior to the scheduled maturity: (i) at the Issuer's option (a) if the Issuer determines a change in applicable law has the effect that performance by the Issuer or its affiliates under the Securities or hedging transactions relating to the Securities has become (or there is a substantial likelihood in the immediate future that it will become) unlawful or impracticable (in whole or in part), or (b) where applicable, if the Calculation Agent determines that certain additional disruption events or adjustment events as provided in the terms and conditions of the Securities have occurred in relation to the underlying assets; or (ii) upon notice by a Holder declaring such Securities to be immediately repayable due to the occurrence of an event of default which is

continuing.

In such case, the Non-scheduled Early Repayment Amount payable on such unscheduled early redemption shall be, for each Security, an amount representing the fair market value of the Security taking into account all relevant factors less all costs incurred by the Issuer or any of its affiliates in connection with such early redemption, including those related to unwinding of any underlying and/or related hedging arrangement. ***The Non-scheduled Early Repayment Amount may be less than your initial investment and therefore you may lose some or all of your investment on an unscheduled early redemption.***

Governing law: The Securities are governed by English law provided that Swedish law will apply with regard to the registration of Euroclear Sweden Registered Instruments.

Status of the Securities:

The Securities are unsubordinated and unsecured obligations of the Issuer and will rank equally among themselves and with all other unsubordinated and unsecured obligations of the Issuer from time to time outstanding.

The taking of any action by a resolution authority under the Bank Recovery and Resolution Directive, in relation to the Issuer could materially affect the value of, or any repayments linked to, the Securities, and/or risk a conversion into equity of the Securities.

Description of restrictions on free transferability of the Securities:

The Securities have not been and will not be registered under the U.S. Securities Act of 1933 (the "**Securities Act**") and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except in certain transactions exempt from the registration requirements of the Securities Act and applicable state securities laws.

No offers, sales or deliveries of the Securities, or distribution of any offering material relating to the Securities, may be made in or from any jurisdiction except in circumstances that will result in compliance with any applicable laws and regulations.

Subject to the above, the Securities will be freely transferable.

Where will the Securities be traded?

Application will be made by the Issuer (or on its behalf) for the Securities to be listed on the Official List and admitted to

trading on the regulated market of the Nasdaq Stockholm AB with effect from at the earliest the Issue Date.

What are the key risks that are specific to the Securities?

Risk factors associated with the Securities: The Securities are subject to the following key risks:

The value and quoted price of your Securities (if any) at any time will reflect many factors and cannot be predicted. Depending on the performance of the Underlying Assets, you may lose some or all of your investment.

- The market price of your Securities prior to maturity may be significantly lower than the purchase price you pay for them. Consequently, if you sell your Securities before the stated scheduled redemption date, you may receive far less than your original invested amount.
- Your Securities may be redeemed in certain extraordinary circumstances set out in the conditions of the Securities prior to scheduled maturity and, in such case, the early redemption amount paid to you may be less than the amount you paid for the Securities and might be zero.

Risks relating to certain features of the Securities:

- The terms and conditions of your Securities provide that the Securities are subject to a cap. Therefore, your ability to participate in any change in the value of the Underlying Assets over the term of the Securities will be limited, no matter how much the price of the Underlying Assets may rise beyond the cap level over the life of the Securities. Accordingly, the return on your Securities may be significantly less than if you had purchased the Underlying Assets directly.
- The terms and conditions of your Securities provide that the return on the Securities depends on the "worst-of" performance of the basket of Underlying Assets. Therefore, you will be exposed to the performance of each Underlying Asset and, in particular, to the Underlying Asset which has the worst performance. This means that, irrespective of how the other Underlying Asset performs, if any Underlying Asset fails to meet a relevant threshold or barrier for the calculation of any settlement amount, you could lose some or all of your initial investment.
- The Fixed Coupon Payment Date(s) will be postponed if the Coupon Reference Date corresponding to such Fixed Coupon Payment Date is not a day on which we would usually value the Underlying Asset (despite the fact that no value of any Underlying Asset is being taken on such Coupon Reference Date), and this may result in Holders suffering a delay in the payment of the relevant Fixed Coupon Amount until after the date on which such Fixed Coupon Payment Date is scheduled to fall.

Risks relating to the Underlying Assets:

- *The value of and return on your Securities depends on the performance of the Underlying Assets.* The return on your Securities depends on the performance of the Underlying Assets. The price of the Underlying Assets may be subject to unpredictable change over time. This degree of change is known as "volatility". The volatility of an Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. Volatility does not imply direction of the price, though an Underlying Asset that is more volatile is likely to increase or decrease in value more often and/or to a greater extent than one that is less volatile.
- *Past performance of an Underlying Asset is not indicative of future performance.* You should not regard any information about the past performance of the Underlying Assets as indicative of the range of, or trends in, fluctuations in the Underlying Assets that may occur in the future. Underlying Assets may perform differently (or the same) as in the past, and this could have material adverse effect on the value of and return on your Securities.
- The performance of Shares is dependent upon macroeconomic factors, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as business risks faced by the issuers thereof. Any one or a combination of such factors could adversely affect the performance of the Underlying Assets which, in turn, would have a negative effect on the value of and return on your Securities.

Vilka nyckelrisker är specifika för Värdepapperen?

Risikfaktorer förknippade med Värdepapperen: Värdepapperen är föremål för följande nyckelrisker:

Värdet och den kvoterade kursen för dina Värdepapper (om några) kommer vid var tid reflektera många faktorer och kan inte förutsägas. Beroende på utvecklingen för de Underliggande Tillgångarna kan du förlora delar av eller hela din investering.

- Marknadskursen på dina Värdepapper före förfall kan vara betydligt lägre än inköpskursen du betalade för dem. Följaktligen, om du säljer dina Värdepapper innan den angivna planerade inlösendagen, kan du erhålla betydligt mindre än ditt ursprungligen investerade belopp.

- Dina Värdepapper kan lösas in under vissa extraordinära omständigheter som anges i Värdepapperens villkor innan den planerade förfallodagen och, i sådana fall, kan det förtida inlösenbeloppet som betalas till dig vara mindre än beloppet du betalade för Värdepapperen och kan vara noll.

Risker relaterade till vissa funktioner i Värdepapperen:

- Villkoren för dina Värdepapper föreskriver att Värdepapperen är föremål för ett tak. Följaktligen kan din förmåga att delta i förändringar i värdet på de Underliggande Tillgångarna under Värdepapperens löptid vara begränsad, oavsett hur mycket kursen för de Underliggande Tillgångarna kan stiga utöver taknivån under Värdepapperens livslängd. Följaktligen kan avkastningen på dina Värdepapper vara betydligt mindre än om du hade köpt de Underliggande Tillgångarna direkt.
- Villkoren för Dina Värdepapper föreskriver att avkastningen på Värdepapperen är beroende av "sämsta-av-utvecklingen för korgen av Underliggande Tillgångar. Följaktligen, kommer du exponeras mot utvecklingen för varje Underliggande Tillgång och, i synnerhet, mot den Underliggande Tillgång som har sämst utveckling. Detta innebär att, oberoende av hur de andra Underliggande Tillgångarna utvecklas, om en eller fler Underliggande Tillgångar misslyckas med att uppnå en relevant tröskel eller barriär för beräkning av vilket avvecklingsbelopp som helst, kan du förlora delar av eller hela din initiala investering.
- Betalningsdagarna (Fast Kupong) kommer att senareläggas om Referensdagen (Kupong) hänförlig till sådan Betalningsdag (Fast Kupong) inte är en dag på vilken vi normalt skulle värdera den Underliggande Tillgången (oaktat det faktum att inget värde för någon Underliggande Tillgång tas på sådan Referensdag (Kupong) och detta kan resultera i att Innehavare drabbas av en försening i betalningen av det relevanta Fasta Kupongbeloppet till efter dagen på vilken sådant Fast Kupongbelopp är planerat att infalla.

Risker relaterade till de Underliggande Tillgångarna:

- *Värdet på och avkastningen från dina Värdepapper beror på utvecklingen för de Underliggande Tillgångarna:* Avkastningen på dina Värdepapper kan vara beroende av utvecklingen för de Underliggande Tillgångarna. Kursen för på en Underliggande Tillgång kan vara föremål för oförutsebara förändringar över tid. Denna nivå av förändring är känd som "volatilitet". Volatiliteten för en Underliggande Tillgång kan påverkas av nationella och internationella finansiella, politiska, militära eller ekonomiska händelser, inkluderat statliga åtgärder, eller genom åtgärder av medlemmar på relevanta marknader. Sådana händelser eller åtgärder kan negativt påverka värdet och avkastningen på Värdepapperen. Volatilitet innebär inte en riktning av kursen, även om det är troligt att en Underliggande Tillgång med högre volatilitet ökar eller minskar i värde mer ofta och/eller i högre omfattning än en som är mindre volatil.
- *Historisk utveckling för en Underliggande Tillgång indikerar inte framtida utveckling:* Du ska inte se någon information om historisk utveckling för de Underliggande Tillgångarna som en indikation på omfattningen av, eller trender för, fluktuationer i de Underliggande Tillgångarna som kan inträffa i framtiden. Underliggande Tillgångar kan utvecklas annorlunda (eller lika) som historisk sett, och detta kan ha väsentligt negativ påverkan på värdet på och avkastningen från dina Värdepapper.
- Aktiernas utveckling är beroende av makroekonomiska faktorer, såsom ränta och prisnivåer på kapitalmarknaderna, valutaförändringar, politiska faktorer såväl som företagsspecifika faktorer som vinstposition, marknadsposition, riskläge, aktieägare struktur- och distributionspolicy samt affärskrisker som emittenterna står inför. Vilken som helst eller en kombination av sådana faktorer kan påverka utvecklingen för de Underliggande Tillgångarna som i sin tur skulle ha en negativ effekt på värdet på och avkastningen från dina Värdepapper.
