## 9. UNITED STATES TAX CONSIDERATIONS

### Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Certificates, the Certificates will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Certificates for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Certificates.

Issuer's creditworthiness. The Securities are not bank deposits, and they are not insured or guaranteed by any compensation or deposit protection scheme. - GSG and its consolidated subsidiaries ("**Goldman Sachs**") is a leading global investment banking, securities and investment management group and faces a variety of significant risks which may affect the Issuer's ability to fulfil their obligations under the Securities, including market and credit risks, liquidity risks, business activities and industry risks, operational risks and legal, regulatory and reputational risks.

As a result, it is subject to a variety of risks that are substantial and inherent in its businesses including risks relating to economic and market conditions, regulation, Brexit, market volatility, liquidity, credit markets, concentration of risk, credit quality, composition of client base, derivative transactions, operational infrastructure, cyber security, risk management, business initiatives, operating in multiple jurisdictions, conflicts of interest, competition, changes in underliers, personnel, negative publicity, legal liability, catastrophic events, climate change and the potential exercise by a resolution authority of its resolution powers in relation to GSI.

The resolution powers available to the resolution authority include powers to (i) write down the amount owing, including to zero, or convert the Securities into other securities, including ordinary shares of the relevant institution (or a subsidiary) – the so-called "bail-in" tool; (ii) transfer all or part of the business of the relevant institution to a "bridge bank"; (iii) transfer impaired or problem assets to an asset management vehicle; and (iv) sell the relevant institution to a commercial purchaser. In addition, the resolution authority is empowered to modify contractual arrangements, suspend enforcement or termination rights that might otherwise be triggered. The resolution regime is designed to be triggered prior to insolvency, and holders of Securities may not be able to anticipate the exercise of any resolution power by the resolution authority. Further, holders of Securities would have very limited rights to challenge the exercise of powers by the resolution authority, even where such powers have resulted in the write down of the Securities or conversion of the Securities to equity.

The Securities have not been and will not be registered under the U.S. Securities Act of 1933 (the "**Securities Act**") and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except in certain transactions exempt from the registration requirements of the Securities Act and applicable state securities laws.

**Where will the Securities be traded?**

Application will be made by the Issuer (or on its behalf) for the Securities to be listed on the Official List and admitted to trading on the regulated market of the Luxembourg Stock Exchange with effect from at the earliest the Issue Date.

**What are the key risks that are specific to the Securities?**

**Risk factors associated with the Securities:** The Securities are subject to the following key risks:

The value and quoted price of your Securities (if any) at any time will reflect many factors and cannot be predicted. Depending on the performance of the Underlying Asset, you may lose some or all of your investment.

**Risks relating to certain features of the Securities:**

- The terms and conditions of your Securities provide that the Securities are subject to a cap, so your ability to participate in any change in the value of the Underlying Assets over the term of the Securities will be limited, no matter how much the level, price, rate or other applicable value of the Underlying Asset may rise beyond the cap level over the life of the Securities. Accordingly, the return on your Securities may be significantly less than if you had purchased the Underlying Asset directly.

**Risks relating to the Underlying Assets:**

- *The value of and return on your Securities depends on the performance of the Underlying Assets*  
The return on your Securities depends on the performance of the Underlying Assets. The level, price, rate, net asset value or other applicable value of the Underlying Assets may be subject to unpredictable change over time. This degree of change is known as "volatility". The volatility of an Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. Volatility does not imply direction of the level, price, rate, net asset value or other applicable value, though an Underlying Asset that is more volatile is likely to increase or decrease in value more often and/or to a greater extent than one that is less volatile.
- *Past performance of an Underlying Asset is not indicative of future performance*  
You should not regard any information about the past performance of the Underlying Assets as indicative of the range of, or trends in, fluctuations in the Underlying Assets that may occur in the future. Underlying Assets may perform differently (or the same) as in the past, and this could have material adverse effect on the value of and return on your Securities.
- Equity indices are comprised of a synthetic portfolio of shares, and as such, the performance of the Index is dependent upon the macroeconomic factors relating to the shares that underlie such Index, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as the index composition, which may change over time.

- The performance of foreign exchange rates, currency units or units of account is dependent upon the supply and demand for currencies in the international foreign exchange markets, which are subject to economic factors, including inflation rates in the countries concerned, interest rate differences between the respective countries, economic forecasts, international political factors, currency convertibility and safety of making financial investments in the currency concerned, speculation and measures taken by governments and central banks. Such measures include, without limitation, imposition of regulatory controls or taxes, issuance of a new currency to replace an existing currency, alteration of the exchange rate or exchange characteristics by devaluation or revaluation of a currency or imposition of exchange controls with respect to the exchange or transfer of a specified currency that would affect exchange rates as well as the availability of a specified currency.

- GSG och dess konsoliderade dotterföretag ("**Goldman Sachs**") är en ledande global investmentbank, värdepappers- och investeringsförvaltningskoncern och står inför en rad betydande risker som kan påverka Emittentens förmåga att uppfylla dess skyldigheter enligt Värdepapperen, inklusive marknads- och kreditrisker, likviditetsrisker, affärsaktivitets- och branschrisker, operativa risker och legala, regulatoriska och renommérisker.
- GSI är ett helägt dotterföretag till Goldman Sachs-koncernen och ett viktigt bankdotterföretag till Goldman Sachs-koncernen. Som ett resultat är det föremål för olika risker som är väsentliga och inneboende i dess verksamheter inklusive risker relaterade till ekonomiska och marknadsmässiga förhållanden, reglering, Brexit, marknadsvolatilitet, likviditet, kreditmarknader, koncentration av risk, kreditkvalitet, kundbasens sammansättning, derivattransaktioner, operationell infrastruktur, cybersäkerhet, riskhantering, affärsinitiativ, verksamhet i flera jurisdiktioner, intressekonflikter, konkurrens, förändringar i underliggande, personal, negativ publicitet, juridiskt ansvar, katastrofala händelser, klimatförändringar och det potentiella utövandet av en resolutionsmyndighet av dess resolutionsbefogenhet i relation till GSI.

De resolutionsbefogenheter som finns tillgängliga för resolutionsmyndigheten inkluderar befogenheter att (i) skriva ner det skyldiga beloppet, inklusive till noll, eller konvertera Värdepapperen till andra värdepapper, inklusive vanliga aktier i den relevanta institutionen (eller ett dotterföretag) - det så kallade "räddnings"-verktyget; (ii) överföra hela eller delar av verksamheten för det relevanta institution till ett "broinstitut"; (iii) överföra nedskrivna eller problemtillgångar till ett tillgångsförvaltningsverktyg; och (iv) sälja den berörda institutionen till en kommersiell köpare. Dessutom har resolutionsmyndigheten befogenhet att ändra avtalsarrangemang, avbryta verkställighets- eller uppsägningsrättigheter som annars skulle kunna utlösas. Resolutionsregimen är utformad för att utlösas före insolvens, och innehavare av Värdepapper kanske inte kan förutse att resolutionsmyndigheten utövar resolutionsmakten. Vidare skulle innehavare av Värdepapper ha mycket begränsade rättigheter att utmana utövandet av befogenheter av resolutionsmyndigheten, även om sådana befogenheter har resulterat i nedskrivning av Värdepapperen eller omvandling av Värdepapperen till eget kapital.

#### **Vilka nyckelrisker är specifika för Värdepapperen?**

**Risikfaktorer förknippade med Värdepapperen:** Värdepapperen är föremål för följande nyckelrisker:

Värdet och den noterade kursen för dina Värdepapper (om några) kommer vid var tid reflektera många faktorer och kan inte förutsägas. Beroende på utvecklingen för de Underliggande Tillgångarna kan du förlora delar av eller hela din investering.

#### **Risker relaterade till vissa funktioner i Värdepapperen:**

- Villkoren för dina Värdepapper föreskriver att Värdepapperen är föremål för ett tak, så din förmåga att delta i förändringar i värdet på de Underliggande Tillgångarna under Värdepapperens löptid kan vara begränsad, oavsett hur mycket nivån, kursen, räntesatsen eller andra tillämpliga värden på de Underliggande Tillgångarna kan stiga utöver taknivån under Värdepapperens livslängd. Följaktligen kan avkastningen på dina Värdepapper vara betydligt mindre än om du hade köpt de Underliggande Tillgångarna direkt.

#### **Risker relaterade till de Underliggande Tillgångarna:**

- *Värdet på och avkastningen från dina Värdepapper beror på utvecklingen för de Underliggande Tillgångarna*

Avkastningen på dina Värdepapper är beroende av utvecklingen för de Underliggande Tillgångarna. Nivån, kursen, räntesatsen, nettoandelsvärdet eller annat tillämpligt värde för de Underliggande Tillgångarna kan vara föremål för oförutsebara förändringar över tid. Denna nivå av förändring är känd som "volatilitet". Volatiliteten för en Underliggande Tillgång kan påverkas av nationella och internationella finansiella, politiska, militära eller

ekonomiska händelser, inkluderat statliga åtgärder, eller genom åtgärder av medlemmar på relevanta marknader. Sådana händelser eller åtgärder kan negativt påverka värdet och avkastningen på Värdepapperen. Volatilitet innebär inte en riktning av nivån, kursen, räntesatsen eller andra tillämpliga värden, även om det är troligt att en Underliggande Tillgång med högre volatilitet ökar eller minskar i värde mer ofta och/eller i högre omfattning än en som är mindre volatil.

- *Historisk utveckling för en Underliggande Tillgång indikerar inte framtida utveckling*

Du ska inte se någon information om historisk utveckling för de Underliggande Tillgångarna som en indikation på omfattningen av, eller trender för, fluktuationer i de Underliggande Tillgångarna som kan inträffa i framtiden. Underliggande Tillgångar kan utvecklas annorlunda (eller lika) som historisk sett, och detta kan ha väsentligt negativ påverkan på värdet på och avkastningen från dina Värdepapper.

- Aktieindex består av en syntetisk portfölj av aktier, och som sådan, är utvecklingen för ett Index beroende av makroekonomiska faktorer relaterade till aktier som är underliggande sådant Index, såsom ränte- och kursnivåer på kapitalmarknaderna, valutaförändringar, politiska faktorer som företagsspecifika faktorer som vinstposition, marknadsposition, risksituation, aktieägarstruktur och distributionspolicy, såväl som indexets sammansättning, som kan förändras över tid.
- Utvecklingen av valutakurser, valutaenheter eller beräkningsenheter är beroende av utbud och efterfrågan på valutor på de internationella valutamarknaderna, som är föremål för ekonomiska faktorer, inklusive inflationstakten i de berörda länderna, ränteskillnader mellan respektive länder, ekonomiska prognoser, internationella politiska faktorer, valutakonverterbarhet och säkerhet för att göra finansiella investeringar i den berörda valutan, spekulation och åtgärder som vidtas av regeringar och centralbanker. Sådana åtgärder inkluderar, utan begränsning, införande av reglerande kontroller eller skatter, utfärdande av en ny valuta för att ersätta en befintlig valuta, ändring av växelkursen eller valutakarakteristiken genom devalvering eller omvärdering av en valuta eller införande av valutakontroller med avseende på utbytet eller överföring av en specificerad valuta som kan påverka valutakurser såväl som tillgängligheten för en specificerad valuta.
