9. **UNITED STATES TAX CONSIDERATIONS**

**Section 871(m) Withholding Tax**

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Certificates, the Certificates will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Certificates for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Certificates.

In this Example, the Certificates will be automatically exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to zero. **In this Example, an investor will sustain a total loss of the amount invested in the Certificates.**

#### **What are the key risks that are specific to the Issuer?**

The Issuer is subject to the following key risks:

- The payment of any amount due on the Securities is subject to the credit risk of the Issuer. The Securities are the Issuer's unsecured obligations. Investors are dependent on the Issuer's ability to pay all amounts due on the

<sup>1</sup> "Fees and commissions" are included within "non-interest income" and therefore are not included as a single line item.

<sup>2</sup> Sum of items "Fixed assets", "Current assets" and "Pension surplus".

<sup>3</sup> "Subordinated loans" are included within "total unsecured borrowings" and therefore are not included as a single line item.

<sup>4</sup> Amounts due to broker/dealers and customers.

Securities, and therefore investors are subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness. The Securities are not bank deposits, and they are not insured or guaranteed by any compensation or deposit protection scheme. The value of and return on the Securities will be subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness.

- GSG and its consolidated subsidiaries ("**Goldman Sachs**") is a leading global investment banking, securities and investment management group and faces a variety of significant risks which may affect the Issuer's ability to fulfil their obligations under the Securities, including market and credit risks, liquidity risks, business activities and industry risks, operational risks and legal, regulatory and reputational risks.
- GSI is a wholly-owned subsidiary of the Goldman Sachs group and a key banking subsidiary of the Goldman Sachs group. As a result, it is subject to a variety of risks that are substantial and inherent in its businesses including risks relating to economic and market conditions, regulation, Brexit, market volatility, liquidity, credit markets, concentration of risk, credit quality, composition of client base, derivative transactions, operational infrastructure, cyber security, risk management, business initiatives, operating in multiple jurisdictions, conflicts of interest, competition, changes in underliers, personnel, negative publicity, legal liability, catastrophic events and climate change.
- GSI is subject to the Bank Recovery and Resolution Directive, which is intended to enable a range of actions to be taken by a resolution authority in relation to credit institutions and investment firms considered by the resolution authority to be at risk of failing and where such action is necessary in the public interest. The resolution powers available to the resolution authority include powers to (i) write down the amount owing, including to zero, or convert the Securities into other securities, including ordinary shares of the relevant institution (or a subsidiary) – the so-called "bail-in" tool; (ii) transfer all or part of the business of the relevant institution to a "bridge bank"; (iii) transfer impaired or problem assets to an asset management vehicle; and (iv) sell the relevant institution to a commercial purchaser. In addition, the resolution authority is empowered to modify contractual arrangements, suspend enforcement or termination rights that might otherwise be triggered. The resolution regime is designed to be triggered prior to insolvency, and holders of Securities may not be able to anticipate the exercise of any resolution power by the resolution authority. Further, holders of Securities would have very limited rights to challenge the exercise of powers by the resolution authority, even where such powers have resulted in the write down of the Securities or conversion of the Securities to equity.

#### Rights attached to the Securities:

The Securities will give each investor the right to receive a return, together with certain ancillary rights such as the right to receive notice of certain determinations and events. The return on the Securities will comprise the potential payment of the Settlement Amount (if applicable), and the amounts payable will depend on the performance of the following Underlying Asset:

Underlying Asset or the Index	Bloomberg / Reuters	Index Sponsor
STOXX® Europe 600 Banks (Price EUR)	SX7P <Index> / .SX7P	STOXX Limited

Index		
-------	--	--

**Settlement Amount:** unless previously automatically exercised early, or purchased and cancelled, the Settlement Amount in SEK payable in respect of each Security on the Maturity Date will be:

- if the Final Closing Price of the Underlying Asset is greater than or equal to the Barrier Level, an amount calculated in accordance with the following formula:

$$CA \times \{PL + P \times \text{Max}[\text{Perf} - \text{Strike}; 0]\}$$

- if the Final Closing Price of the Underlying Asset is less than the Barrier Level, an amount calculated in accordance with the following formula:

$$CA \times \frac{\text{Final Closing Price}}{\text{Initial Closing Price}}$$

**Non-scheduled Early Repayment Amount:** The Securities may be redeemed prior to the scheduled maturity: (i) at the Issuer's option (a) if the Issuer determines a change in applicable law has the effect that performance by the Issuer or its affiliates under the Securities or hedging transactions relating to the Securities has become (or there is a substantial likelihood in the immediate future that it will become) unlawful or impracticable (in whole or in part), or (b) where applicable, if the Calculation Agent determines that certain additional disruption events or adjustment events as provided in the terms and conditions of the Securities have occurred in relation to the underlying asset; or (ii) upon notice by a Holder declaring such Securities to be immediately repayable due to the occurrence of an event of default which is continuing.

In such case, the Non-scheduled Early Repayment Amount payable on such unscheduled early redemption shall be, for each Security, an amount representing the fair market value of the Security taking into account all relevant factors less all costs incurred by the Issuer or any of its affiliates in connection with such early redemption, including those related to unwinding of any underlying and/or related hedging arrangement. *The Non-scheduled Early Repayment Amount may be less than your initial investment and therefore you may lose some or all of your investment on an unscheduled early redemption.*

**Governing law:** The Securities are governed by English law, provided that Swedish law will apply with regard to the registration of Euroclear Sweden Registered Instruments.

**Status of the Securities:** The Securities are unsubordinated and unsecured obligations of the Issuer and will rank equally

among themselves and with all other unsubordinated and unsecured obligations of the Issuer from time to time outstanding.

The taking of any action by a resolution authority under the Bank Recovery and Resolution Directive, in relation to the Issuer could materially affect the value of, or any repayments linked to, the Securities, and/or risk a conversion into equity of the Securities.

**Description of restrictions on free transferability of the Securities:**

The Securities have not been and will not be registered under the U.S. Securities Act of 1933 (the "**Securities Act**") and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except in certain transactions exempt from the registration requirements of the Securities Act and applicable state securities laws.

No offers, sales or deliveries of the Securities, or distribution of any offering material relating to the Securities, may be made in or from any jurisdiction except in circumstances that will result in compliance with any applicable laws and regulations.

Subject to the above, the Securities will be freely transferable.

**Where will the Securities be traded?**

Application will be made by the Issuer (or on its behalf) for the Securities to be listed on the Official List and admitted to trading on the regulated market of the Nasdaq Stockholm AB with effect from at the earliest the Issue Date.

**What are the key risks that are specific to the Securities?**

**Risk factors associated with the Securities:** The Securities are subject to the following key risks:

The value and quoted price of your Securities (if any) at any time will reflect many factors and cannot be predicted. Depending on the performance of the Underlying Asset, you may lose some or all of your investment.

- The terms and conditions of your Securities may provide that the amount payable on the Securities (whether at maturity or otherwise) will be based on the performance of the Underlying Asset(s) compared to the lowest (as specified in the relevant Issue Terms) levels or prices of the Underlying Asset(s) observed across each of the specified entry level observation dates, and not just the price or level of the Underlying Asset(s) on a single initial date. Such a feature could result in a lower value of and return on the Securities than if there was no entry level feature. For example, if the applicable level or price of the particular Underlying Asset(s) increased *significantly* across the entry level observation dates, the value of and return on your Securities may be significantly less than it would have been had the return been determined by reference to only the applicable level or price of the Underlying Asset(s) on a single initial date.

**Risks relating to the Underlying Asset:**

- *The value of and return on your Securities depends on the performance of the Underlying Asset*  
The return on your Securities depends on the performance of the Underlying Asset. The price of the Underlying Asset may be subject to unpredictable change over time. This degree of change is known as "volatility". The volatility of the Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. Volatility does not imply direction of the price of the Underlying Asset, though an Underlying Asset that is more volatile is likely to increase or decrease in value more often and/or to a greater extent than one that is less volatile.
- *Past performance of the Underlying Asset is not indicative of future performance*  
You should not regard any information about the past performance of the Underlying Asset as indicative of the range of, or trends in, fluctuations in the Underlying Asset that may occur in the future. The Underlying Asset may perform differently (or the same) as in the past, and this could have material adverse effect on the value of and return on your Securities.
- Equity indices are comprised of a synthetic portfolio of shares, and as such, the performance of the Index is dependent upon the macroeconomic factors relating to the shares that underlie such Index, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as the index composition, which may change over time.

- GSG och dess konsoliderade dotterföretag ("**Goldman Sachs**") är en ledande global investmentbank, värdepappers- och investeringsförvaltningskoncern och står inför en rad betydande risker som kan påverka Emittentens förmåga att uppfylla sina skyldigheter enligt Värdepapperen, inklusive marknads- och kreditrisker, likviditetsrisker, affärsaktivitets- och branschrisker, operativa risker och legala, regulatoriska och renommérisker.
- GSI är ett helägt dotterföretag till Goldman Sachs-koncernen och ett viktigt bankdotterföretag till Goldman Sachs-koncernen. Som ett resultat är det föremål för olika risker som är väsentliga och inneboende i dess verksamheter inklusive risker relaterade till ekonomiska och marknadsmässiga förhållanden, reglering, Brexit, marknadsvolatilitet, likviditet, kreditmarknader, koncentration av risk, kreditkvalitet, kundbasens sammansättning, derivattransaktioner, operationell infrastruktur, cybersäkerhet, riskhantering, affärsinitiativ, verksamhet i flera jurisdiktioner, intressekonflikter, konkurrens, förändringar i underliggande, personal, negativ publicitet, juridiskt ansvar, katastrofala händelser och klimatförändringar.

Resolutionsregimen är utformad för att utlösas före insolvens, och innehavare av Värdepapper kanske inte kan förutse att resolutionsmyndigheten utövar resolutionsmakten. Vidare skulle innehavare av Värdepapper ha mycket begränsade rättigheter att utmana utövandet av befogenheter av resolutionsmyndigheten, även om sådana befogenheter har resulterat i nedskrivning av Värdepapperen eller omvandling av Värdepapperen till eget kapital.

**Vilka nyckelrisker är specifika för Värdepapperen?**

**Risikfaktorer förknippade med Värdepapperen:** Värdepapperen är föremål för följande nyckelrisker:

Värdet och den kvoterade kursen för dina Värdepapper (om några) kommer vid var tid reflektera många faktorer och kan inte förutsägas. Beroende på utvecklingen för den Underliggande Tillgången kan du förlora delar av eller hela din investering.

- Villkoren för dina Värdepapper kan ange att beloppet som ska erläggas avseende Värdepapperen (oavsett om vid förfall eller annars) kommer att baseras på utvecklingen för de(n) Underliggande Tillgången(arna) jämförd med de lägsta (enligt vad som anges i Emissionsvillkoren) nivåerna eller kurserna för de(n) Underliggande Tillgången(arna) observerat över var och en av de angivna observationsdagarna (ingångsnivå) och inte endast på nivån eller kursen för de(n) Underliggande Tillgången(arna) på en enskild initial dag. Sådant villkor kan resultera i ett lägre värde på och avkastning från Värdepapperen än om det inte varit något villkor avseende ingångsnivå. Till exempel, om den tillämpliga nivån eller kurser för den specifika Underliggande Tillgången(arna) ökat väsentligt över observationsdagarna (ingångsvärde), kan värdet på och avkastningen från dina Värdepapper vara väsentligt lägre än om avkastningen hade fastställts utifrån endast den tillämpliga nivån eller kursen för de(n) Underliggande Tillgången(arna) på en enskild initial dag.

**Risker relaterade till den Underliggande Tillgången:**

- *Värdet på och avkastningen från dina Värdepapper beror på utvecklingen för de Underliggande Tillgångarna:*

Avkastningen på dina Värdepapper kan vara beroende av utvecklingen för den Underliggande Tillgången. Kursen för den Underliggande Tillgången kan vara föremål för oförutsebara förändringar över tid. Denna nivå av förändring är känd som "volatilitet". Volatiliteten för den Underliggande Tillgången kan påverkas av nationella och internationella finansiella, politiska, militära eller ekonomiska händelser, inkluderat statliga åtgärder, eller genom åtgärder av medlemmar på relevanta marknader. Sådana händelser eller åtgärder kan negativt påverka värdet och avkastningen på Värdepapperen. Volatilitet innebär inte en riktning av kursen för den Underliggande Tillgången, även om det är troligt att en Underliggande Tillgång med högre volatilitet ökar eller minskar i värde mer ofta och/eller i högre omfattning än en som är mindre volatil.
- *Historisk utveckling för den Underliggande Tillgången indikerar inte framtida utveckling:*

Du ska inte se någon information om historisk utveckling för den Underliggande Tillgången som en indikation på omfattningen av, eller trender för, fluktuationer i sådan Underliggande Tillgång som kan inträffa i framtiden. Den Underliggande Tillgången kan utvecklas annorlunda (eller lika) som historisk sett, och detta kan ha väsentligt negativ påverkan på värdet på och avkastningen från dina Värdepapper.

- Aktieindex består av en syntetisk portfölj av aktier, och som sådan, är utvecklingen för Indexet beroende av de makroekonomiska faktorerna relaterade till aktierna som är underliggande till sådant Index, såsom ränta och prisnivåer på kapitalmarknaderna, valutaförändringar, politiska faktorer såväl som företagspecifika faktorer som vinstposition, marknadsposition, riskläge, aktieägare struktur- och distributionspolicy samt indexsammansättningen som kan förändras över tid.
