Rights attached to the securities

Negative pledge - The terms of the Securities will not contain a negative pledge provision.

Events of Default - The terms of the Securities will contain events of default including non-payment, non-performance or non-observance of the Issuer's or Guarantor's obligations in respect of the Securities; the insolvency or winding up of the Issuer or Guarantor.

Governing law - The Securities are governed by English law.

The objective of this product is to provide you with a periodic coupon in accordance with the Coupon provisions below in exchange for a risk on both the Notional Amount and the Coupon.

This product is "0% recovery" meaning that the investor will suffer a loss of 100% of the Notional Amount if a Credit Event occurs with respect to the Reference Entities. In exchange for not receiving the effective Recovery Rate in respect of all the Reference Entities following a Credit Event (which is the case where the product is not "0% recovery"), the investor is entitled to a higher Coupon Rate.

The events constituting Credit Events are summarised below:

- Bankruptcy: the Reference Entity experiences bankruptcy or liquidation or insolvency or related events.
- Failure to Pay: the Reference Entity fails to make payments to creditors due on its debt at all or in good time.
- Restructuring: the Reference Entity's debt is restructured on terms that are detrimental to the holder(s) of the relevant debt in a form that is binding on all holder(s).
- Governmental Intervention: a governmental authority announces a write down or detrimental change to the terms of the Reference Entity's debt pursuant to restructuring and resolution law or regulation.

Whether or not a Credit Event has occurred will be determined by a committee named CDDC, or, in the absence a CDDC determination, by the product calculation agent. Only Credit Events occurring between the Credit Event Backstop Date and the Redemption Valuation Date shall affect the product (earlier or later Credit Events shall not be taken into account).

Reduction of the Current Notional Amount per certificate following the occurrence of a Credit Event on a Reference Entity: If a Credit Event occurs in respect of one or more of the Reference Entities of the product, the Current Notional Amount per certificate shall be reduced, according to the formula further described below in the definition of Notional Amount per certificate without payment of the Recovery Rate in respect of the relevant Reference Entity to the investor. Such reduction shall be effective from the immediately prior Coupon Payment Date or the Issue Date (as the case may be). As a consequence, the Coupon will also be reduced (as described further under "Coupon" below) and the investor will be exposed to a loss in principal of the product as the amount the investor will receive upon a redemption of the product will be reduced (as described further under "Redemption on the Redemption Date" below).

Redemption on the Redemption Date: On the Redemption Date you will receive in respect of each certificate, in addition to any final payment of coupon, 100.0% of the Current Notional Amount per certificate. In the event of a reduction of the Current Notional Amount per certificate as a result of a Credit Event or Credit Events having occurred in respect of any of the Reference Entities, you will suffer a loss corresponding to the difference between the Notional Amount and the Current Notional Amount per certificate.

Redemption following a Credit Event reducing the Current Notional Amount per certificate to zero: If a Credit Event occurs with respect to each Reference Entity of the product, the outstanding Current Notional Amount will be reduced to zero and, the product will redeem early and in full at a Current Notional Amount per certificate of zero on the Redemption Date following a Credit Event (as defined below) following the determination of the Recovery Rate (as described further below). No regard shall be given to any auction final price determined by the CDDC with respect to the relevant Reference Entity in respect of which a Credit Event has occurred. In such case, the investor will suffer a loss of 100% of the Notional Amount per certificate. The product will terminate following the occurrence of an Event Determination Date in respect of the last occurring Credit Event in respect of the Reference Entities.

Coupon: A coupon is due for payment at the relevant Fixed Coupon Rate on each Fixed Coupon Payment Date for a given period of time. The amount of coupon to be paid should be multiplied by the daily average Current Notional Amount per certificate over the relevant coupon period.

Following the occurrence of a Credit Event in respect of a Reference Entity, the coupon payable will be reduced due to the reduction of the Current Notional Amount per certificate. In case the Current Notional Amount per certificate is zero, no more coupon shall be payable from the Interest Payment Date.

Where:

- CDDC is a Credit Derivatives Determinations Committee established by the International Swaps and Derivatives Association, Inc. (ISDA) (or any successor thereto), further information on the committee, its members and its rules is available at the following website: <http://dc.isda.org/>.
- The Event Determination Date is the date on which the CDDC is asked to determine whether the relevant Credit Event has occurred or, the date on which the product calculation agent notifies the Issuer that a Credit Event has occurred.
- The Current Notional Amount per certificate is the Notional Amount per certificate reduced by approximately 1.67% for each Credit Event after 15 events have already taken place, provided it is greater than 0 (subject to rounding of index weights). In mathematical terms, this is represented as :

$$\text{SEK } 10,000 \times \max[0\%; \min[100\%; \frac{100\% - \sum_{i=1}^N \text{Weight}_i * (1 - \text{RecoveryRate}_i)}{100\% - 20\%}]]$$

- The date falling 3 business days after the determination of the Recovery Rate in respect to the Event Determination Date that leads to a reduction of the Current Notional Amount per certificate to zero.
- The Recovery Rate is a percentage fixed at 0%.
- The Fixed Coupon Rate is the relevant Fixed Rate on the relevant Fixed Coupon Payment Date (per annum on a 30/360 basis of the Notional Amount).

ITRAXX EUROPE CROSSOVER SERIES 37 VERSION 1	The Reference Entity Weight, as defined in the index annex, divided by the sum of all Reference Entity Weightings in the Index Annex.	21667KJP4	www.markit.com/Documentation/Product/Itraxx/

The product terms provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the Issuer of the product may terminate the product early. These events are specified in the product terms and principally relate to the Reference Entities, the product characteristics and the Issuer of the product. The return (if any) you receive on such early termination is likely to be different depending on the scenarios described above and may be less than the amount you invested (including a possible reduction to zero).

The product terms also allow the Issuer of the product to extend the Redemption Date in certain circumstances to establish whether or not a Credit Event has occurred. In these circumstances, redemption of the product may be delayed in case of a Credit Event in order for Recovery Rate to be determined. The redemption of the product may also be delayed in case of a Credit Event in order for a Recovery Rate to be determined. This delay should be limited to 1 month in most cases but is not limited in time.

In the event that a Reference Entity transfers all or a portion of its obligations to one or more other entities, those entities may be determined to be successors to the Reference Entity and such successor entity (or entities) may replace the Reference Entity. Following such succession an investor will take credit risk on the relevant successor(s) instead of the Reference Entity specified above. In the event that an entity is split into two (or N) new entities following a succession event, each with a Weight corresponding to half (or 1/N) of the initial entity's Weight, a Credit Event in respect of any of such new entities shall constitute half (or 1/N) of a Credit Event. Similarly in the event of a merger of two (or N) entities within the index into a single entity, a Credit Event in respect of such a merged entity shall constitute two (or N) Credit Events.

All redemptions described in this document (including potential gains) are calculated on the basis of the Notional Amount, excluding costs, social contributions and taxation applicable to this type of investment.

Meetings - The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Representative of holders - No representative of the Holders has been appointed by the Issuer.

4. Adjustments to the carrying value of the BNP Paribas Group's securities and derivatives portfolios and the BNP Paribas Group's own debt could have an adverse effect on its net income and shareholders' equity

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Securities, including:

1. Risks related to the structure of the securities:

The return on the Securities depends on the credit of the Reference Entities, and the capital protection applies only at maturity and only if the Securities have not been redeemed in accordance with the Credit Terms

2. Risks related to the Reference Entity:

Investors will be exposed to the credit risk of one or more the Reference Entities (being, in general terms, the risk that a given such entity does not perform its financial obligations when due or becomes insolvent), which exposure may be to the full extent of their investment in such Credit Securities. If a Credit Event occurs, investors may suffer significant losses.

3. Correlated Credit Risks:

In purchasing the Securities, investors assume credit exposure to both the Reference Entities and the Issuer and the Guarantor. The credit risk to investors may further be increased if the Reference Entity is concentrated in the same industry sector or geographic area as the Issuer or the Guarantor.

4. Actions of the Reference Entities may affect the value of the Credit Securities:

Actions of the Reference Entities (for example, merger or demerger or the repayment or transfer of indebtedness) may adversely affect the value of the Credit Securities. Holders of the Credit Securities Investors should be aware that the Reference Entity to which the value of the Credit Securities is exposed, and the terms of such exposure, may change over the term of the Credit Securities.

5. Suspension of Obligations will suspend payment of principal and interest:

In certain circumstances (for example, where a Credit Event has occurred and the related credit loss has not been determined as at the relevant date for payment, or, if applicable, where a potential Credit Event exists as at the scheduled maturity of the Securities), investors may be adversely affected where payment of the redemption amount on the Securities is deferred for a material period in whole or part without compensation to investors.

6. Risks related to the trading markets of the securities:

The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Reference Entity, the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Reference Entity, and the correlation risk of the Reference Entity. The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

Syftet med denna produkt är att ge en periodisk kupong enligt räntebestämmelserna nedan i utbyte mot en risk för både det inledande nominella beloppet och räntan. Denna produkt har "0 procent återvinning" vilket betyder att investeraren kommer att drabbas av en förlust på 100% av det inledande nominella beloppet om en kredithändelse inträffar på alla referensenheter. I utbyte mot att inte få den effektiva återvinningsgraden för referensenheter efter en kredithändelse för alla referensenheter (vilket är fallet när produkten har "0 procent återvinning"), har investeraren rätt till en högre ränta.

Händelserna som utgör kredithändelser sammanfattas nedan :

- Konkurs: en referensenheter går i konkurs eller i likvidation eller en dithörande händelse.
- Utebliven betalning: en referensenheter misslyckas helt eller delvis att i god tid göra de betalningar till fordringsägare för referensenheters skulder vilka förfaller till betalning.
- Omstrukturering: en referensenhets skuld omstruktureras enligt villkor som är negativa för innehavaren (innehavarna) av den relevanta skulden på ett sätt som är bindande för varje/alla innehavare.
- Statligt ingripande: en statlig myndighet meddelar en nedskrivning eller en menlig förändring av villkoren för en referensenhets skuld efter en omstrukturering och en beslutad lag eller förordning.
-

Om en kredithändelse har inträffat eller ej kommer att fastställas av en kommitté kallad CDDC, eller i frånvaro av ett CDDC-beslut, av produktberäkningsombudet. Endast kredithändelser som inträffar mellan kredithändelsens säkerhetsdatum och inlösendatumet ska påverka produkten (tidigare eller senare kredithändelser ska inte beaktas).

Minskning av det aktuella nominella beloppet per certificate efter att en kredithändelse på en referensenheter: Om en kredithändelse inträffar för en eller flera av produkternas referensenheter, ska det aktuella nominella beloppet per certificate minskas, enligt den formel som beskrivs mer ingående nedan i definitionen av det aktuella nominella beloppet per certificate utan betalning av återvinningsgraden för den relevanta referensenheter till investeraren. En sådan minskning ska träda i kraft främst omedelbart föregående räntebetalningsdatumet eller emissionsdatumet (alltefter omständigheterna). Som en följd kommer även räntan att minskas (enligt vad som anges mer ingående under "Ränta" nedan) och investeraren kommer att exponeras för en kapitalförlust då det belopp som investeraren kommer att få vid en inlösen av produkten kommer att minskas (enligt vad som anges mer ingående under rubriken "Inlösen på inlösendatumet" nedan).

Inlösen på inlösendatumet : På inlösendatumet kommer du, för varje certificate, och utöver slutbetalningen av räntan, att få 100 procent av det Current Notional Amount per certificate. Vid en minskning av det aktuella nominella beloppet per certificate på grund av en eller flera kredithändelser som har inträffat på någon av referensenheter, kommer du att göra en förlust som motsvarar skillnaden mellan det inledande nominella beloppet och det aktuella nominella beloppet per certificate.

Inlösen efter en kredithändelse minskar det aktuella nominella beloppet per certificate till noll: Om en kredithändelse inträffar på produktens varje referenshet kommer det utestående aktuella nominella beloppet att minskas till noll och, produkten kommer att lösas in tidigt och till fullo på en aktuella nominella beloppet per certificate av noll på inlösendagen efter en kredithändelse (enligt definition nedan) efter fastställande av den återvinningsgraden (enligt vad som beskrivs mer nedan). Ingen hänsyn ska tas till någon slutkurs fastställd av CDDC med avseende på den relevanta referensheten på vilken en kredithändelse har inträffat. I ett sådant fall kommer investeraren att göra en förlust på 100% of the Notional Amount per certificate. Produkten kommer att löpa ut efter ett fastställande av ett datum för när den senaste kredithändelsen inträffade för referensheterna.

Ränta: Röntan ska betalas till relevant Fast ränta on each fast räntebetalningsdatumet under en viss tid period. Röntan som ska betalas bör multipliceras med dagliga genomsnittliga aktuella nominella beloppet per certificate under den relevanta ränteperioden.

Efter att en kredithändelse har inträffat på en referenshet, kommer röntan att betala att minskas på grund av det minskade aktuella nominella beloppet per certificate. Om ett aktuellt nominellt belopp per certificate är noll, kommer ingen mer ränta att betalas från den Räntebetalnings-datum.

Produktvillkoren fastslår att om vissa ytterst ovanliga händelser inträffar (1) kan produkten justeras och/eller (2) kan emittenten av produkten säga upp produkten i förtid. Dessa händelser anges i produktvillkoren och är i princip hänförliga till referensheterna, produkttegenskaperna och emittenten av produkten. Den avkastning (om sådan föreligger) som erhålls på en sådan tidig uppsägning kommer sannolikt att vara olik de scenarier som beskrivs ovan och kan vara lägre än det belopp du investerat (inklusive en möjlig minskning till noll).

Produktvillkoren gör det även möjligt för emittenten av produkten att under vissa omständigheter fastställa om en kredithändelse har inträffat eller ej med avseende på referensenheterna. Under dessa omständigheter kan inlösen av produkten försenas. Inlösen av produkten kan även försenas vid en kredithändelse för att en återvinningsgrad ska fastställas. Denna försening ska i de flesta fall begränsas till en månad men är inte begränsad i tid.

Om en referensenhet överförs för alla eller en del av sina obligationer till en eller flera enheter, kan de enheterna besluta att bli efterträdare till den referensenheten och en sådan efterträdande enhet (eller enheter) kan ersätta referensenheten. Efter ett sådant efterträdande kommer en investerare att bli föremål för en kreditrisk avseende den eller de relevanta efterträdarna istället för den relevanta referensenheten som anges ovan. Om en enhet delas upp i två (eller N) nya enheter efter en händelse med efterträdare, var och en med en viktning som motsvarar hälften (eller 1/N) av den enhetens inledande viktning, kommer en kredithändelse för sådana nya enheter att utgöra hälften (eller 1/N) av en kredithändelse. Samma sak gäller vid en fusion av två (eller N) enheter bland referensenheterna till en enda enhet, då en kredithändelse för en sådan sammanslagen enhet kommer att utgöra två (eller N) kredithändelser.

All inlösen som beskrivs i detta dokument (inklusive potentiella vinster) beräknas på basis av det aktuella nominella beloppet, exklusive kostnader, sociala avgifter och den beskattning som tillämpas på denna typ av investering.

Vilka är de centrala riskerna som är specifika för värdepapperna?

Mest väsentliga riskfaktorer som är specifika för värdepapperna

- Risker relaterade till värdepapperens struktur: Avkastningen på Värdepapperna är beroende av Referensenheteras kredit, och kapitalskyddet gäller endast vid förfall och enbart om Värdepapperna inte har lösts in i enlighet med Kreditvillkoren.
- Risker relaterade till Referensenheter: Investerare kommer att exponeras mot kreditrisken för en eller flera Referensenheter (generellt sett är risken att en given sådan enhet inte fullgör sina finansiella förpliktelser när de förfaller eller blir insolvent), denna exponering kan omfatta hela deras investering i sådana Kreditvärdepapper. Om en Kredithändelse inträffar kan investerare drabbas av betydande förluster.
- Korrelerade Kreditrisker: Vid köp av Värdepapperna tar investerare kreditexponering mot både Referensenheter och Emittenten och Garanterna. Kreditrisken för investerare kan öka ytterligare om Referensenheter är koncentrerad till samma industrisektor eller geografiska område som Emittenten eller Garanterna.

4. Åtgärder från Referensenheterna kan påverka värdet på Kreditvärdepapperen: Åtgärder från Referensenheterna (till exempel fusion eller delning eller återbetalning eller överföring av skuld) kan negativt påverka värdet på Kreditvärdepapperen. Innehavare av Kreditvärdepapper bör vara medvetna om att den Referensenhet som värdet på Kreditvärdepapperen är exponerad mot, och villkoren för sådan exponering, kan ändras under Kreditvärdepapperens löptid.
5. Avstängning av Förpliktelser kommer att skjuta upp betalning av kapitalbelopp och ränta: Under vissa omständigheter (till exempel när en Kredithändelse har inträffat och den relaterade kreditförlusten inte har fastställts vid den relevanta dagen för betalning, eller, om tillämpligt, när en potentiell Kredithändelse inträffar vid den planerade förfallodagen för Värdepapperen), kan investerare påverkas negativt om betalningen av inlösenbeloppet på Värdepapperen helt eller delvis skjuts upp under en väsentlig period utan kompensation till investerarna.
6. Risker relaterade till värdepapperens handelsplatser: Värdepapperens handelskurs kan påverkas av ett antal faktorer inklusive, men inte begränsat till, den relevanta kursen, värdet eller nivån på Referensenheten, den tid som återstår tills planerad inlösendag för Värdepapperen, den faktiska eller implicita volatiliteten förknippad med Referensenheten och korrelationsrisken för Referensenheten. Möjligheten att Värdepapperens värde och handelskurs kommer att variera (antingen positivt eller negativt) beror på ett antal faktorer som investerare bör överväga noggrant innan de köper eller säljer Värdepapper.

Mest väsentliga intressekonflikterna rörande erbjudandet eller upptagandet till handel

BNP Paribas och dess dotterbolag kan också ha varit verksamma, och kan även i framtiden bli verksamma vad gäller investeringar och börshandel och kan utföra andra tjänster för Emittenten och Garanten och deras respektive dotterbolag.

Olika företag inom BNPP-koncernen (inklusive Emittenten och Garanten) och Dotterbolag åtar sig olika roller i samband med Värdepapperna, inklusive Värdepappernas Emittent och Värdepappernas Beräkningsombud. Detta kan förorsaka möjliga intressekonflikter.

BNP Paribas som verkar som Beräkningsombud, är ett Dotterbolag till Emittenten och Garanten och potentiella intressekonflikter kan finnas mellan Värdepappernas innehavare, inklusive och med hänsyn till vissa beslut och bedömningar som Beräkningsombuden måste göra. De ekonomiska intressena hos Emittenten och hos BNP Paribas såsom Beräkningsombud, är potentiellt motsatta till intressena hos Innehavare av Värdepapperna.

Annat än vad som nämnts ovan och såvitt Emittenten vet, har ingen person som är involverad i Värdepappersemissionerna något intresse i erbjudandet, inklusive de motstridiga intressena.
