9. **UNITED STATES TAX CONSIDERATIONS**

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Certificates, the Certificates will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Certificates for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Certificates.

What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The payment of any amount due on the Securities is subject to the credit risk of the Issuer. The Securities are the Issuer's unsecured obligations. Investors are dependent on the Issuer's ability to pay all amounts due on the Securities, and therefore investors are subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness. The Securities are not bank deposits and they are not insured or guaranteed by any compensation or deposit protection scheme. The value of and return on the Securities will be subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness.
- GSG and its consolidated subsidiaries ("**Goldman Sachs**") is a leading global investment banking, securities and investment management group and faces a variety of significant risks which may affect the Issuer's ability to fulfil its obligations under the Securities, including market and credit risks, liquidity risks, business activities and industry risks, operational risks and legal, regulatory and reputational risks.
- GSI is a wholly-owned subsidiary of the Goldman Sachs group and a key banking subsidiary of the Goldman Sachs group. As a result, it is subject to a variety of risks that are substantial and inherent in its businesses including risks relating to economic and market conditions, regulation, Brexit, market volatility, liquidity, credit markets, concentration of risk, credit quality, composition of client base, derivative transactions, operational infrastructure, cyber security, risk management, business initiatives, operating in multiple jurisdictions, conflicts of interest, competition, changes in underliers, personnel, negative publicity, legal liability, catastrophic events and climate change.
- GSI is subject to the Bank Recovery and Resolution Directive, which is intended to enable a range of actions to be taken by a resolution authority in relation to credit institutions and investment firms considered by the resolution authority to be at risk of failing and where such action is necessary in the public interest. The resolution powers available to the resolution authority include powers to (i) write down the amount owing, including to zero, or convert the Securities into other securities, including ordinary shares of the relevant institution (or a subsidiary) – the so-called "bail-in" tool; (ii) transfer all or part of the business of the relevant institution to a "bridge bank"; (iii) transfer impaired or problem assets to an asset management vehicle; and (iv) sell the relevant institution to a commercial purchaser. In addition, the resolution authority is empowered to modify contractual arrangements, suspend enforcement or termination rights that might otherwise be triggered. The resolution regime is designed to be triggered prior to insolvency, and holders of Securities may not be able to anticipate the exercise of any resolution power by the resolution authority. Further, holders of Securities would have very limited rights to challenge the exercise of powers by the resolution authority, even where such powers have resulted in the write down of the Securities or conversion of the Securities to equity.

Rights attached to the Securities:

The Securities will give each investor the right to receive a return, together with certain ancillary rights such as the right to receive notice of certain determinations and events. The return on the Securities will comprise the potential payment of the Settlement Amount, and the amount payable will depend on the performance of the following Underlying Assets:

Underlying Assets or the Shares	Bloomberg / Reuters / ISIN	Exchange	Initial Closing Price
The ordinary shares of Swedbank AB	SWEDA SS <Equity> / SWEDa.ST / SE0000242455	Nasdaq Stockholm AB	SEK 165.55

- (i) if the Final Closing Price of the Final Worst Performing Asset is greater than or equal to its respective Barrier Level, an amount calculated in accordance with the following formula:

$$CA \times \{1 + P \times \min [\text{Cap}; \text{Max} (\text{BP} - 1; 0)] + \text{Max} (\text{BP} - 1 - P \times 0.20; 0)\}; \text{or}$$

- (iii) if the Final Closing Price of any Underlying Asset is less than its respective Barrier Level, an amount calculated in accordance with the following formula:

$$CA \times \frac{\text{Final Reference Value}}{\text{Initial Reference Value}}$$

Non-scheduled Early Repayment Amount: The Securities may be redeemed prior to the scheduled maturity: (i) at the Issuer's option (a) if the Issuer determines a change in applicable law has the effect that performance by the Issuer or its affiliates under the Securities or hedging transactions relating to the Securities has become (or there is a substantial likelihood in the immediate future that it will become) unlawful or impracticable (in whole or in part), or (b) where applicable, if the Calculation Agent determines that certain additional disruption events or adjustment events as provided in the terms and conditions of the Securities have occurred in relation to the underlying assets; or (ii) upon notice by a Holder declaring such Securities to be immediately repayable due to the occurrence of an event of default which is continuing.

In such case, the Non-scheduled Early Repayment Amount payable on such unscheduled early redemption shall be, for each Security, an amount representing the fair market value of the Security taking into account all relevant factors less all costs incurred by the Issuer or any of its affiliates in connection with such early redemption, including those related to unwinding of any underlying and/or related hedging arrangement. ***The Non-scheduled Early Repayment Amount may be less than your initial investment and therefore you may lose some or all of your investment on an unscheduled early redemption.***

Governing law: The Securities are governed by English law provided that Swedish law will apply with regard to the registration of Euroclear Sweden Registered Instruments.

Status of the Securities:

The Securities are unsubordinated and unsecured obligations of the Issuer and will rank equally among themselves and with all other unsubordinated and unsecured obligations of the Issuer from time to time outstanding.

The taking of any action by a resolution authority under the Bank Recovery and Resolution Directive, in relation to the Issuer could materially affect the value of, or any repayments linked to, the Securities, and/or risk a conversion into equity of the Securities.

Description of restrictions on free transferability of the Securities: The Securities have not been and will not be registered under the U.S. Securities Act of 1933 (the "**Securities Act**") and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except in certain transactions exempt from the registration requirements of the Securities Act and applicable state securities laws. No offers, sales or deliveries of the Securities, or distribution of any offering material relating to the Securities, may be made in or from any jurisdiction except in circumstances that will result in compliance with any applicable laws and regulations. Subject to the above, the Securities will be freely transferable.

Where will the Securities be traded?

Application will be made by the Issuer (or on its behalf) for the Securities to be listed on the Official List and admitted to trading on the regulated market of the Nasdaq Stockholm AB with effect from at the earliest the Issue Date.

What are the key risks that are specific to the Securities?

Risk factors associated with the Securities: The Securities are subject to the following key risks:

The value and quoted price of your Securities (if any) at any time will reflect many factors and cannot be predicted. Depending on the performance of the Underlying Assets, you may lose some or all of your investment.

- The market price of your Securities prior to maturity may be significantly lower than the purchase price you pay for them. Consequently, if you sell your Securities before the stated scheduled redemption date, you may receive far less than your original invested amount.
- Your Securities may be redeemed in certain extraordinary circumstances set out in the conditions of the Securities prior to scheduled maturity and, in such case, the early redemption amount paid to you may be less than the amount you paid for the Securities and might be zero.

Risks relating to certain features of the Securities:

- The terms and conditions of your Securities provide that the return on the Securities depends on the "worst-of" performance of the basket of Underlying Assets. Therefore, you will be exposed to the performance of each Underlying Asset and, in particular, to the Underlying Asset which has the worst performance. This means that, irrespective of how the other Underlying Assets perform, if any Underlying Asset fails to meet a relevant threshold or barrier for the payment of interest or the calculation of any settlement amount, you could lose some or all of your initial investment.

Risks relating to the Underlying Assets:

- *The value of and return on your Securities depends on the performance of the Underlying Assets.* The return on your Securities depends on the performance of one or more Underlying Assets. The price of an Underlying Asset may be subject to unpredictable change over time. This degree of change is known as "volatility". The volatility of an Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. Volatility does not imply direction of the price of an Underlying Asset, though an Underlying Asset that is more volatile is likely to increase or decrease in value more often and/or to a greater extent than one that is less volatile.
- *Past performance of an Underlying Asset is not indicative of future performance.* You should not regard any information about the past performance of the Underlying Assets as indicative of the range of, or trends in, fluctuations in the Underlying Assets that may occur in the future. Underlying Assets may perform differently (or the same) as in the past, and this could have material adverse effect on the value of and return on your Securities.
- The performance of Shares is dependent upon macroeconomic factors, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as business risks faced by the issuers thereof. Any one or a combination of such factors could adversely affect the performance of the Underlying Assets which, in turn, would have a negative effect on the value of and return on your Securities.

Vilka nyckelrisker är specifika för Emittenten?

Emittenten är föremål för följande nyckelrisker:

- Betalningen av varje belopp som förfaller under Värdepapperen är utsatt för kreditrisken förknippad med Emittenten. Värdepapperen är Emittentens icke säkerställda förpliktelser. Investerare är beroende av Emittentens förmåga att betala alla belopp som förfallit till betalning under Värdepapperen, och därför är investerare föremål för Emittentens kreditrisk och för förändringar i marknads syn på Emittentens kreditvärdighet. Värdepapperen är inte banksättningar och dessa är inte försäkrade eller garanterade av eller någon sättningsgaranti. Värdet för och avkastningen från Värdepapperen kommer att vara utsatt för Emittentens kreditrisk och för förändringar i marknads syn på Emittentens kreditvärdighet.
- GSG och dess konsoliderade dotterföretag ("**Goldman Sachs**") är en ledande global investmentbank, värdepappers- och investeringsförvaltningskoncern och står inför en rad betydande risker som kan påverka Emittentens förmåga att uppfylla sina skyldigheter enligt Värdepapperen, inklusive marknads- och kreditrisker, likviditetsrisker, affärsaktivitets- och branschrisker, operativa risker och legala, regulatoriska och renommérisker.

verksamhet i flera jurisdiktioner, intressekonflikter, konkurrens, förändringar i underliggande, personal, negativ publicitet, juridiskt ansvar, katastrofala händelser och klimatförändringar.

- GSI omfattas av direktivet om återhämtning och resolution av banker, som är avsett att möjliggöra en rad åtgärder tas av en resolutionsmyndighet i förhållande till kreditinstitut och värdepappersföretag som en resolutionsmyndighet bedömer att riskerar att fallera och där sådana åtgärder är nödvändiga i allmänhetens intresse. De resolutionsbefogenheter som finns tillgängliga för resolutionsmyndigheten inkluderar befogenheter att (i) skriva ner det skyldiga beloppet, inklusive till noll, eller konvertera Värdepapperen till andra värdepapper, inklusive vanliga aktier i den relevanta institutionen (eller ett dotterföretag) - det så kallade "räddnings"-verktyget; (ii) överföra hela eller delar av verksamheten för det relevanta institution till ett "broinstitut"; (iii) överföra nedskrivna eller problemtillgångar till ett tillgångsförvaltningsverktyg; och (iv) sälja den berörda institutionen till en kommersiell köpare. Dessutom har resolutionsmyndigheten befogenhet att ändra avtalsarrangemang, avbryta verkställighets- eller uppsägningsrättigheter som annars skulle kunna utlösas. Resolutionsregimen är utformad för att utlösas före insolvens, och innehavare av Värdepapper kanske inte kan förutse att resolutionsmyndigheten utövar resolutionsmakten. Vidare skulle innehavare av Värdepapper ha mycket begränsade rättigheter att utmana utövandet av befogenheter av resolutionsmyndigheten, även om sådana befogenheter har resulterat i nedskrivning av Värdepapperen eller omvandling av Värdepapperen till eget kapital.

Vilka nyckelrisker är specifika för Värdepapperen?

Risikfaktorer förknippade med Värdepapperen: Värdepapperen är föremål för följande nyckelrisker:

Värdet och den kvoterade kursen för dina Värdepapper (om några) kommer vid var tid reflektera många faktorer och kan inte förutsägas. Beroende på utvecklingen för den Underliggande Tillgången kan du förlora delar av eller hela din investering

- Marknadskursen på dina Värdepapper före förfall kan vara betydligt lägre än inköpskursen du betalade för dem. Följaktligen, om du säljer dina Värdepapper innan den angivna planerade inlösendagen, kan du erhålla betydligt mindre än ditt ursprungligen investerade belopp.
- Dina Värdepapper kan lösas in under vissa extraordinära omständigheter som anges i Värdepapperens villkor innan den planerade förfalldagen och, i sådana fall, kan det förtida inlösenbeloppet som betalas till dig vara mindre än beloppet du betalade för Värdepapperen och kan vara noll.

Risker relaterade till vissa funktioner i Värdepapperen:

- Villkoren för Dina Värdepapper föreskriver att avkastningen på Värdepapperen är beroende av "sämsta-av utvecklingen för korgen av Underliggande Tillgångar. Därför kommer du att exponeras mot utvecklingen för varje Underliggande Tillgång och, i synnerhet, mot den Underliggande Tillgång som har sämst utveckling. Detta innebär att, oberoende av hur den andra Underliggande Tillgången utvecklas, om en eller fler Underliggande Tillgångar misslyckas med att uppnå en relevant tröskel eller barriär för betalning av ränta eller beräkning av vilket avvecklingsbelopp som helst, kan du förlora delar av eller hela din initiala investering.

Risker relaterade till de Underliggande Tillgångarna:

- *Värdet på och avkastningen från dina Värdepapper beror på utvecklingen för de Underliggande Tillgångarna:* Avkastningen på dina Värdepapper kan vara beroende av utvecklingen för en eller fler av de Underliggande Tillgångarna. Kursen för en Underliggande Tillgång kan vara föremål för oförutsebara förändringar över tid. Denna nivå av förändring är känd som "volatilitet". Volatiliteten för en Underliggande Tillgång kan påverkas av nationella och internationella finansiella, politiska, militära eller ekonomiska händelser, inkluderat statliga åtgärder, eller genom åtgärder av medlemmar på relevanta marknader. Sådana händelser eller åtgärder kan negativt påverka värdet och avkastningen på Värdepapperen. Volatilitet innebär inte en riktning av kursen för en Underliggande Tillgång, även om det är troligt att en Underliggande Tillgång med högre volatilitet ökar eller minskar i värde mer ofta och/eller i högre omfattning än en som är mindre volatil.
- *Historisk utveckling för en Underliggande Tillgång indikerar inte framtida utveckling:* Du ska inte se någon information om historisk utveckling för de Underliggande Tillgångarna som en indikation på omfattningen av, eller trender för, fluktuationer i de Underliggande Tillgångarna som kan inträffa i framtiden. Underliggande

<p>Tillgångar kan utvecklas annorlunda (eller lika) som historisk sett, och detta kan ha väsentligt negativ påverkan på värdet på och avkastningen från dina Värdepapper.</p> <ul style="list-style-type: none"> • Aktiernas utveckling är beroende av makroekonomiska faktorer, såsom ränta och prisnivåer på kapitalmarknaderna, valutaförändringar, politiska faktorer såväl som företagsspecifika faktorer som vinstposition, marknadsposition, riskläge, aktieägare struktur- och distributionspolicy samt affärsrisker som emittenterna står inför. Vilken som helst eller en kombination av sådana faktorer kan påverka utvecklingen för de Underliggande Tillgångarna som i sin tur skulle ha en negativ effekt på värdet på och avkastningen från dina Värdepapper.
