9. **UNITED STATES TAX CONSIDERATIONS**

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Certificates, the Certificates will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Certificates for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Certificates.

EXAMPLES

THE EXAMPLES PRESENTED BELOW ARE FOR ILLUSTRATIVE PURPOSES ONLY.

For the purposes of each Example:

- (i) the Calculation Amount is SEK 10,000 and the Issue Price is 100 per cent. (100%) of the Aggregate Amount of up to SEK 100,000,000;
- (ii) the Protection Level is 0.90, the Replacement Performance is 30 per cent. (30%) and the Strike is zero; and

For the purposes of these Examples only, the Participation is deemed to be 1.20. The actual Participation will be determined by the Calculation Agent on or around July 8, 2021 and may be a lesser or greater amount than 1.20 (but shall not be less than 0.90). Therefore, as the actual Participation may be lower than the deemed value used for the purposes of these Examples, the actual amounts received by investors may be less than the amounts stated in the Examples below.

What are the key risks that are specific to the Issuer?					
The Issuer is subject to the following key risks:					
<ul style="list-style-type: none"> The payment of any amount due on the Securities is subject to the credit risk of the Issuer. The Securities are the Issuer's unsecured obligations. Investors are dependent on the Issuer's ability to pay all amounts due on the Securities, and therefore investors are subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness. The Securities are not bank deposits, and they are not insured or guaranteed by any compensation or deposit protection scheme. The value of and return on the Securities will be subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness. GSG and its consolidated subsidiaries ("Goldman Sachs") is a leading global investment banking, securities and investment management group and faces a variety of significant risks which may affect the Issuer's ability to fulfil its obligations under the Securities, including market and credit risks, liquidity risks, business activities and industry risks, operational risks and legal, regulatory and reputational risks. GSI is a wholly-owned subsidiary of the Goldman Sachs group and a key banking subsidiary of the Goldman Sachs group. As a result, it is subject to a variety of risks that are substantial and inherent in its businesses including risks relating to economic and market conditions, regulation, Brexit, market volatility, liquidity, credit markets, concentration of risk, credit quality, composition of client base, derivative transactions, operational infrastructure, cyber security, risk management, business initiatives, operating in multiple jurisdictions, conflicts of interest, competition, changes in underliers, personnel, negative publicity, legal liability, catastrophic events and climate change. GSI is subject to the Bank Recovery and Resolution Directive, which is intended to enable a range of actions to be taken by a resolution authority in relation to credit institutions and investment firms considered by the resolution

authority to be at risk of failing and where such action is necessary in the public interest. The resolution powers available to the resolution authority include powers to (i) write down the amount owing, including to zero, or convert the Securities into other securities, including ordinary shares of the relevant institution (or a subsidiary) – the so-called "bail-in" tool; (ii) transfer all or part of the business of the relevant institution to a "bridge bank"; (iii) transfer impaired or problem assets to an asset management vehicle; and (iv) sell the relevant institution to a commercial purchaser. In addition, the resolution authority is empowered to modify contractual arrangements, suspend enforcement or termination rights that might otherwise be triggered. The resolution regime is designed to be triggered prior to insolvency, and holders of Securities may not be able to anticipate the exercise of any resolution power by the resolution authority. Further, holders of Securities would have very limited rights to challenge the exercise of powers by the resolution authority, even where such powers have resulted in the write down of the Securities or conversion of the Securities to equity.

What are the key risks that are specific to the Securities?

Risk factors associated with the Securities: The Securities are subject to the following key risks:

- The value and quoted price of your Securities (if any) at any time will reflect many factors and cannot be predicted. Depending on the performance of the Underlying Assets, you may lose some or all of your investment.

Risks relating to certain features of the Securities:

- The terms and conditions of your Securities provide that the amount payable on the Securities (at maturity) will be based on the arithmetic average of the applicable prices of the Underlying Assets on each of the specified averaging dates, and not the simple performance of the Underlying Assets over the term of the Securities. An averaging feature could result in a lower value of and return on the Securities than if there was no averaging feature. For example, if the applicable price of a particular Underlying Asset dramatically increases on an averaging date (but not the other averaging dates), the return on your Securities may be significantly less than it would have been had it been linked only to the applicable price of such Underlying Asset on that single date.

Risks relating to the Underlying Assets:

- *The value of and return on your Securities depends on the performance of the Underlying Assets.* The return on your Securities depends on the performance of one or more Underlying Assets. The price of an Underlying Asset may be subject to unpredictable change over time. This degree of change is known as "volatility". The volatility of an Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. Volatility does not imply direction of the price of an Underlying Asset, though an Underlying Asset that is more volatile is likely to increase or decrease in value more often and/or to a greater extent than one that is less volatile.
- *Past performance of an Underlying Asset is not indicative of future performance.* You should not regard any information about the past performance of an Underlying Asset as indicative of the range of, or trends in, fluctuations in such Underlying Asset that may occur in the future. An Underlying Asset may perform differently (or the same) as in the past, and this could have material adverse effect on the value of and return on your Securities.
- The performance of Shares is dependent upon macroeconomic factors, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as business risks faced by the issuers thereof. Any one or a combination of such factors could adversely affect the performance of the Underlying Assets which, in turn, would have a negative effect on the value of and return on your Securities.
- The performance of foreign exchange rates, currency units or units of account is dependent upon the supply and demand for currencies in the international foreign exchange markets, which are subject to economic factors, including inflation rates in the countries concerned, interest rate differences between the respective countries, economic forecasts, international political factors, currency convertibility and safety of making financial investments in the currency concerned, speculation and measures taken by governments and central banks. Such measures include, without limitation, imposition of regulatory controls or taxes, issuance of a new currency to

replace an existing currency, alteration of the exchange rate or exchange characteristics by devaluation or revaluation of a currency or imposition of exchange controls with respect to the exchange or transfer of a specified currency that would affect exchange rates as well as the availability of a specified currency.

Vilka nyckelrisker är specifika för Emittenten?

Emittenten är föremål för följande nyckelrisker:

- Betalningen av varje belopp som förfaller under Värdepapperen är utsatt för kreditrisken förknippad med Emittenten. Investerarare är beroende av Emittentens förmåga att betala alla belopp som förfallit till betalning under Värdepapperen, och därför är investerarare föremål för Emittentens kreditrisk och för förändringar i marknadens syn på Emittentens kreditvärdighet. Värdepapperen är inte bankinsättningar och är inte försäkrade eller garanterade av eller någon insättningsgaranti. Värdet för och avkastningen från Värdepapperen kommer att vara utsatt för Emittentens kreditrisk och för förändringar i marknadens syn på Emittentens kreditvärdighet.

¹ "Arvoden och provisioner" inkluderas under "icke-ränterelaterade intäkter" och inkluderas därför inte som en enskild post.

² "Efterställda lån" inkluderas under "total icke-säkerställd upplåning" och inkluderas därför inte som en enskild post.

- GSG och dess konsoliderade dotterföretag ("**Goldman Sachs**") är en ledande global investmentbank, värdepappers- och investeringsförvaltningskoncern och står inför en rad betydande risker som kan påverka Emittentens förmåga att uppfylla sina skyldigheter enligt Värdepapperen, inklusive marknads- och kreditrisker, likviditetsrisker, affärsaktivitets- och branschrisker, operativa risker och legala, regulatoriska och renommérisker.
- GSI är ett helägt dotterföretag till Goldman Sachs-koncernen och ett viktigt bankdotterföretag till Goldman Sachs-koncernen. Som ett resultat är det föremål för olika risker som är väsentliga och inneboende i dess verksamheter inklusive risker relaterade till ekonomiska och marknadsmässiga förhållanden, reglering, Brexit, marknadsvolatilitet, likviditet, kreditmarknader, koncentration av risk, kreditkvalitet, kundbasens sammansättning, derivattransaktioner, operationell infrastruktur, cybersäkerhet, riskhantering, affärsinitiativ, verksamhet i flera jurisdiktioner, intressekonflikter, konkurrens, förändringar i underliggande, personal, negativ publicitet, juridiskt ansvar, katastrofala händelser, klimatförändringar och en resolutionsmyndighets potentiella utövande av sina resolutionsbefogenheter i förhållande till GSI.
- GSI omfattas av direktivet om återhämtning och resolution av banker, som är avsett att möjliggöra en rad åtgärder tas av en resolutionsmyndighet i förhållande till kreditinstitut och värdepappersföretag som en resolutionsmyndighet bedömer att riskerar att falla och där sådana åtgärder är nödvändiga i allmänhetens intresse. De resolutionsbefogenheter som finns tillgängliga för resolutionsmyndigheten inkluderar befogenheter att (i) skriva ner det skyldiga beloppet, inklusive till noll, eller konvertera Värdepapperen till andra värdepapper, inklusive vanliga aktier i den relevanta institutionen (eller ett dotterföretag) - det så kallade "räddnings"-verktyget; (ii) överföra hela eller delar av verksamheten för det relevanta institution till ett "broinstitut"; (iii) överföra nedskrivna eller problemtillgångar till ett tillgångsförvaltningsverktyg; och (iv) sälja den berörda institutionen till en kommersiell köpare. Dessutom har resolutionsmyndigheten befogenhet att ändra avtalsarrangemang, avbryta verkställighets- eller uppsägningsrättigheter som annars skulle kunna utlösas. Resolutionsregimen är utformad för att utlösas före insolvens, och innehavare av Värdepapper kanske inte kan förutse att resolutionsmyndigheten utövar resolutionsmakten. Vidare skulle innehavare av Värdepapper ha mycket begränsade rättigheter att utmana utövandet av befogenheter av resolutionsmyndigheten, även om sådana befogenheter har resulterat i nedskrivning av Värdepapperen eller omvandling av Värdepapperen till eget kapital.

Vilka nyckelrisker är specifika för Värdepapperen?

Riskfaktorer förknippade med Värdepapperen: Värdepapperen är föremål för följande nyckelrisker:

Värdet och den kvoterade kursen för dina Värdepapper (om några) kommer vid var tid reflektera många faktorer och kan inte förutsägas. Beroende på utvecklingen för de Underliggande Tillgångarna kan du förlora delar av eller hela din investering.

Risker relaterade till vissa funktioner i Värdepapperen:

- Villkoren för dina Värdepapper kan föreskriva att det belopp som ska betalas för Värdepapperen (vid förfalldagen) kommer att baseras de aritmetiska genomsnittet av tillämpliga kurser för de Underliggande Tillgångarna på vardera av de angivna genomsnittsdagarna, och inte bara utvecklingen för den Underliggande Tillgång under Värdepapperens löptid. En sådan genomsnittsfunktion kan resultera i ett lägre värde på och avkastning på Värdepapperen än om det inte fanns någon genomsnittsfunktion. Om till exempel den tillämpliga kursen för en specifik Underliggande Tillgång dramatiskt ökar på en genomsnittsdag (men inte de andra genomsnittsdagarna), kan avkastningen på dina Värdepapper vara betydligt mindre än det hade varit den har endast kopplats till tillämplig kurs på sådan Underliggande Tillgång på en dag.

Risker relaterade till de Underliggande Tillgångarna:

- *Värdet på och avkastningen från dina Värdepapper beror på utvecklingen för de(n) Underliggande Tillgången (arna):* Avkastningen på dina Värdepapper kan vara beroende av utvecklingen för en eller flera Underliggande Tillgångar. Kursen på en Underliggande Tillgång kan vara föremål för oförutsebara förändringar över tid. Denna nivå av förändring är känd som "volatilitet". Volatiliteten för en Underliggande Tillgång kan påverkas av nationella och internationella finansiella, politiska, militära eller ekonomiska händelser, inkluderat statliga åtgärder, eller genom åtgärder av medlemmar på relevanta marknader. Sådana händelser eller åtgärder kan negativt påverka värdet och avkastningen på Värdepapperen. Volatilitet innebär inte en riktning av kursen på en Underliggande Tillgång, även om det är troligt att en Underliggande Tillgång med högre volatilitet ökar eller minskar i värde mer ofta och/eller i högre omfattning än en som är mindre volatil.
- *Historisk utveckling för en Underliggande Tillgång indikerar inte framtida utveckling:* Du ska inte se någon information om historisk utveckling för en Underliggande Tillgång som en indikation på omfattningen av, eller trender för, fluktuationer i sådan Underliggande Tillgång som kan inträffa i framtiden. En Underliggande Tillgång kan utvecklas annorlunda (eller lika) som historisk sett, och detta kan ha väsentligt negativ påverkan på värdet och avkastningen på dina Värdepapper.
- Aktiernas utveckling är beroende av makroekonomiska faktorer, såsom ränta och prisnivåer på kapitalmarknaderna, valutaförändringar, politiska faktorer såväl som företagsspecifika faktorer som vinstposition, marknadsposition, riskläge, aktieägare struktur- och distributionspolicy samt affärsrisker som emittenterna står inför. Vilken som helst eller en kombination av sådana faktorer kan påverka utvecklingen för de Underliggande Tillgångarna som i sin tur skulle ha en negativ effekt på värdet på och avkastningen från dina Värdepapper.
- Utvecklingen för valutaväxlingskurser, valutaenheter eller beräkningsenheter är beroende på tillgången och efterfrågan på valutor på de internationella valutabörserna, som är föremål för ekonomiska faktorer, inkluderat inflationstakten i de aktuella länderna, räntesatsskillnader mellan respektive länder, ekonomiska prognoser, internationella politiska faktorer, valutaomvandlingsbarhet och säkerhet i att göra finansiella investeringar i den aktuella valutan, spekulationer och åtgärder som vidtagits av regeringar och centralbanker. Sådana åtgärder inkluderar, utan begränsning, påbud av regulatoriska kontroller eller skatter, utfärdande av ny valuta för att ersätta en befintlig valuta, förändring av valutaväxlingskursen eller växlingskaraktäristik genom ned- eller omvärdering av en valuta eller påbud av växlingskontroller avseende växlingen eller överföringen av en angiven

valuta som skulle påverka valutaväxlingskurser såväl som tillgängligheten för en angiven valuta.
